SUBJECT INDEX

Livestock Production Science, volumes 1-25

Adipose tissue

The composition of adipose tissue and its usefulness as a parameter for carcass composition in growing pigs, 7 (1980) 291

Growth of adipose tissue in cattle; partitioning between depots, chemical composition and cellularity. A review, 14 (1986) 349

Adjustment factors cattle—AI

Adjustment of non-return rates of AI technicians and dairy bulls, 16 (1987) 363

Adjustment factors cattle—meat

Performance testing of future A.I. bulls for growth rate, feed efficiency and muscularity. Genetic parameters, adjustment for systematic environmental factors, selection indices, 11 (1984) 475

Components of variance for growth traits among Zebu and South Devon beef cattle in southeastern Nigeria, 14 (1986) 231

Adjustment factors cattle—milk

Factors associated with average herd milk production in Norway, 8 (1981) 1

Partitioning of herd, year and season variation in milk production, 16 (1987) 107

Dairy sire evaluation fitting some of the herd-year-season effects as random, 16 (1987) 117

Adjustment of lactation yield for age at calving in relation to level of production, 16 (1987) 321

Adjustment of test-day milk, fat and protein yield for age, season and stage of lactation, 16 (1987) 335

Comparison of different methods of predicting 305-day milk yield using means calculated from within-herd lactation curves, 17 (1987) 1

Estimates of variances due to sire \times herd interactions and environmental covariances between paternal half-sibs for first lactation dairy production, 17 (1987) 95

Adjustment factors goats—growth

Adjustment factors for growth characters of the Damascus goat, 10 (1983) 479

Adjustment factors sheep—growth

Adjustment factors for growth traits of Chios sheep, 19 (1988) 409

Age determination—goats and sheep

Age at permanent incisor eruption in indigenous goats and sheep in semi-arid Africa, 11 (1984) 451

Amino acid digestibility—pigs

Digestibility of amino acids in swine: results and their practical applications. A review, 15 (1986) 367

The effect of including various structural polysaccharides in pig diets on ileal and faecal digestibility of amino acids and minerals, 18 (1988) 157

Amino acid digestibility—sheep

Apparent and true digestibility of protein and amino acids in the small intestine of sheep as related to the duodenal passage of protein and non-protein dry matter, 23 (1989) 317

Amino acid metabolism—cattle

Amino acid utilization by dairy cows. I. Methods of varying amino acid supply, 7 (1980) 437

Amino acid utilization by dairy cows. II. Concept of amino acid requirements, 7 (1980) 453

Changes in ruminal and intestinal digestion during and after weaning in dairy calves fed concentrate diets containing pea or soya-bean meal. 2. Amino acid composition and flow of duodenal and ileal digesta, and blood levels of free amino acids, 24 (1990) 129

Amino acid requirements—pigs

Lysine and threonine balance and requirements for weaned piglets 10–25 kg liveweight fed cereal-based diets, 23 (1989) 195

Studies on the threonine requirements of growing pigs based on the total, ileal and faecal digestible supply, 25 (1990) 105

Anal fold measurements—cattle

Accuracy, repeatability and reproducibility of the anal fold measurements for predicting carcass backfat depth in cattle, 15 (1986) 103

Androstenedione

Effects of active immunization against androstenedione on ovulation rate and fecundity in Galway and Finnish Landrace sheep, 15 (1986) 27

Androstenone

Compounds responsible for boar taint, with special emphasis on androstenone: a review, 9 (1982) 687

Consumer testing of pork and processed meat from boars: the influence of fat androstenone level, 9 (1982) 707

Immunization against 5 α -androstenone in boars, 12 (1985) 251

Skatole, androstenone and taint in boars fed two different diets, 18 (1988) 55

Angora rabbits

Optimum structure for genetic improvement of Angora rabbits, 18 (1988) 69

Animal models

Approximate accuracy of genetic evaluation under an animal model, 21 (1989) 87

Use of mixed-model methodology to improve estimation of crossbreeding parameters, 21 (1989) 101

Antagonistic traits

Selection problems when antagonistic effects exist between production characteristics and calving difficulties, 8 (1981) 291

Antagonistic traits in pig breeding, 8 (1981) 407

Selection of low birth weight and high yearling weight in Angus beef cattle, 25 (1990) 31

Artificial insemination—cattle

Adjustment of non-return rates of AI technicians and dairy bulls, 16 (1987) 363

Artificial insemination—pigs

Development of artificial insemination in pigs in E.A.A.P. countries, 5 (1978) 285

Boar sperm production: use in artificial insemination—a review, 5 (1978) 293

Artificial insemination—sheep

Fertility in the ewe after artificial insemination with fresh and frozen semen at the induced oestrus, and influence of the photoperiod on the semen quality of the ram, 6 (1979) 153

Atlantic salmon

Complete diallel cross between five strains of Atlantic salmon, 11 (1984) 207

Automation

Development of automatic equipment for grading of pig carcasses in Denmark, 9 (1982) 675

Use of microelectronics in animal breeding. Report of E.A.A.P. Working Party, 17 (1987) 293

Automation—cattle

Detection oestrus by measuring milk temperatures of dairy cows during milking, 3 (1976) 85

Milk temperature fluctuations during milking in cows with subclinical mastitis, 20 (1988) 223

Cattle liveweight sampled on a continuous versus intermittent basis, 23 (1989) 117

Automation—pigs

Recent developments in the handling and weighing of farm animals, 2 (1975) 289

Effects of feed station design on the behaviour of group-housed sows using an electronic individual feeding system, 19 (1988) 511

Avileña cattle breed

A note on the population structure of the Avileña breed of cattle in Spain, 15 (1986) 285

Backfat—pigs

Estimates of costs and returns of selecting pigs on growth rate and backfat thickness, 7 (1980) 135

Backfat composition in pigs: differences between fat thickness groups and sexes, 22 (1989) 351

Correlated response in reproduction, growth and composition to selection in gilts for extremes in age at puberty and backfat, 24 (1990) 237

Behaviour—cattle

Effects of isolating first-lactation cows from older cows, 6 (1979) 137

The effect of floor space allowance on feedlot performance and on behaviour of Israeli-Friesian male cattle, 6 (1979) 307

Effects of drinking water flow rates and social rank on performance and drinking behaviour of tied-up dairy cows, 11 (1984) 599

The physiological and behavioural responses of crossbred Friesian steers to short-haul transport by road, 17 (1987) 63

Behaviour—pigs

The behavioural response of sows to the presence of human beings and its relation to productivity, 8 (1981) 67

Effect of environmental design on the growth and behaviour of weaned pigs, 8 (1981) 367

Thermal microclimate in winter farrowing nests of free-ranging domestic pigs, 25 (1990) 177

Behaviour—sheep

Behaviour at parturition and lamb survival of Booroola Merino sheep, 13 (1985) 359

Belgian blue cattle

Anatomical, physiological and biochemical differences between conventional and double-muscling cattle in the Belgian Blue and White Breed, 6 (1979) 5

Genetic analysis of some maternal reproductive traits in the Belgian Blue cattle breed, 23 (1989) 79

Bending theory

Application of bending theory in a pig-breeding situation, 18 (1988) 85

Beta-lactoglobulin—cattle

A method for β -lactoglobulin genotyping of cattle, 25 (1990) 173

Birth recording—cattle

A comparison of benefits and costs of birth recording on heifers and second calvers, 10 (1983) 431

Birth weight

Selection of low birth weight and high yearling weight in Angus beef cattle, 25 (1990) 31

Birth weight—pigs

The effects of birth weight and dietary lysine between 21 and 84 days of age on the subsequent performance of pigs to 225 days of age, 17 (1987) 351

Blood composition—cattle

Anatomical, physiological and biochemical differences between conventional and double-muscling cattle in the Belgian Blue and White Breed, 6 (1979) 5

A genetic analysis of the concentrations of blood metabolites and their relationships with age and liveweight gain in young British Friesian bulls, 10 (1983) 1

The effect of turn-out to pasture on blood plasma iron concentrations in beef cattle, 10 (1983) 83

Urea concentrations in milk and blood as influenced by feeding varying amounts of protein and energy to dairy cows, 10 (1983) 457

The effects of continuous or intermittent infusion of propionic acid on plasma insulin and milk yield in dairy cows nourished by intragastric infusion of nutrients, 16 (1987) 201

Blood composition—pigs

Performance and blood plasma amino acid and urea concentrations in growing pigs given diets of cereals and groundnut meal and supplements with graded amounts of L-lysine, 1 (1974) 383

Selection for haemoglobin level in piglets to develop an anemic-resistant line of swine, 5 (1978) 225

Blood composition—sheep

Means of assessing adequacy of nutrition of pregnant ewes, 11 (1984) 429

Blood groups—pigs

Association between susceptibility to the malignant hyperthermia syndrome (MHS) and *H* blood types in Danish Landrace pigs explained by linkage disequilibrium, 7 (1980) 155

The A-O and H blood group systems, some enzyme systems and halothane sensitivity of two divergent lines of Landrace pigs using index selection procedures, 10 (1983) 159

Blood parameters

The physiological reaction of halothane tested pigs to treadmill exercise, and to slaughter, 7 (1980) 473

Use of erythrocyte fragility and plasma CPK activity for the prediction of pork quality, 18 (1988) 187

The effect of dietary electrolyte balance on blood parameters and the performance of veal calves, 21 (1989) 213

Effects of oestradiol-17 β on growth and insulin-like growth factor I of steers on different pasture allowances, 21 (1989) 303

Boar taint

Genetics of sex odour in boars, 1 (1974) 53

Fattening of young boars: quantification of negative and positive aspects, 1 (1974) 187

Incidence of boar taint in Swedish Landrace and Yorkshire boars, 1 (1974) 411

Compounds responsible for boar taint, with special emphasis on androstenone: a review, 9 (1982) 687

Consumer testing of pork and processed meat from boars: the influence of fat androstenone level, 9 (1982) 707

Consumer reactions to boar meat—a review, 10 (1983) 187

Immunization against 5 α -androstenone in boars, 12 (1985) 251

The size of Cowper's (bulbo-urethral) glands as an estimate of boar taint on the slaughter line, 13 (1985) 169

Body components—cattle

Anatomical, physiological and biochemical differences between conventional and double-muscling cattle in the Belgian Blue and White Breed, 6 (1979) 5

The effects of fasting and transportation on beef cattle. 2. Body component changes, carcass composition and meat quality, 20 (1988) 25

Changes in body composition of mature dry cows of Holstein, Limousin and Charolais breeds during fattening. I. Skeleton, muscles, fatty tissues and offal, 25 (1990) 199

Body components—pigs

The effect of high environmental temperatures on fattening performance and growth of boars, 3 (1976) 65

Body composition

Machine error in X-ray computer tomography and its relevance to prediction of in vivo body composition, 13 (1985) 383

Body composition—cattle

Effect of monensin on rumen fermentation, performance and body composition of growing bulls, 8 (1982) 479

Body composition—mice and rats

Selection experiments for body composition in mice and rats: a review, 23 (1989) 17

Effect of selection for growth, body composition and food intake in mice: utilization of increased energy intake by "cafeteria" feeding, 24 (1990) 259

Body composition—pigs

Age at weaning, development of chemical body components, and energy utilization in piglets from 3–25 kg live weight, 9 (1982) 603

Growth rate and protein and fat gain in early-weaned piglets housed below thermoneutrality, 9 (1982) 731

Protein and energy balance in pregnant gilts, 15 (1986) 249

The effect of pregnancy on protein, water and fat deposition in the body of gilts, 15 (1986) 261

Relationships between energy intake and protein and energy metabolism, growth and body composition of pigs kept at 14 or 32°C from 9 to 20 kg, 18 (1988) 289

Body measurements—cattle

In vivo estimation of body composition in young bulls for slaughter. 1. The repeatability and reproducibility of a scoring system, an ultrasonic scanning technique and body measurements, 12 (1985) 221

In vivo estimation of body composition in young bulls for slaughter. 2. The prediction of carcass traits from scores, ultrasonic scanning and body measurements, 12 (1985) 231

Body protein—pigs

Partition of whole body protein in different body fractions and some constants in body composition in pigs, 20 (1988) 37

Body weight—mice

Effects of selecting for litter size and body weight on the components of litter size in mice, 14 (1986) 195

Breed evaluation—cattle

Calving ability of three French beef breeds: preliminary results, 1 (1974) 217

Evaluation of cattle breeds for beef production in New Zealand—a review, 2 (1975) 327

Cattle breed comparison and crossbreeding trials in Europe; a survey prepared by a Working Party of the European Association for Animal Production, 3 (1976) 1

Strain differences in milking performance, food consumption and body size amongst Friesian cattle in Danish test stations, 3 (1976) 165

Recommended procedures for cattle breed comparison trials; a guideline prepared by a working party of the Commission for Cattle Production of the E.A.A.P., 5 (1978) 129

Testing of different strains of Friesian cattle in Poland. I. Milk performance of F₁ paternal Friesian strain crosses under intensive feeding conditions, 10 (1983) 109

Beef breed comparisons in the U.K., 11 (1984) 491

Testing of different strains of Friesian cattle in Poland. II. Beef performance of male crossbreds of different Friesian cattle strains under intensive feeding conditions, 12 (1985) 117

Testing of different strains of Friesian cattle in Poland. III. Milk performance of the strain backcrosses under intensive feeding conditions, 18 (1988) 101

Comparison of ten Friesian strains in Poland under field conditions. I. Strain comparison for growth rate, 18 (1988) 217

Breed evaluation—pigs

An international comparison of pig breeds using a common control stock, 2 (1975) 367

Breed evaluation—sheep

Contemporary comparisons between progeny by Finnish Landrace and Romanov rams out

- of Mutton Merino and Awassi ewes, 6 (1979) 283
- Direct, maternal and heterosis effects for slaughter and carcass characteristics in three breeds of fat tailed sheep, 23 (1989) 137
- Breeding—horses**
- Inbreeding and the inheritance of fertility in the thoroughbred mare, 9 (1982) 743
- Breeding efficiency**
- Genetic and economic differences among methods of gene conservation in farm animals, 11 (1984) 65
- Breeding efficiency—cattle**
- The effect of changing the sex ratio on the efficiency of cattle breeding operations, 2 (1975) 29
- AI bull evaluation standards for dairy and dual purpose breeds, 4 (1977) 115
- Comparison of several sire evaluation methods in dairy cattle breeding, 4 (1977) 129
- Economic values in cattle breeding. I. Influences of production circumstances in situations without output limitations, 22 (1989) 1
- Economic values in cattle breeding. II. Influences of production circumstances in situations with output limitations, 22 (1989) 17
- Breeding efficiency—pigs**
- Optimization of the selection in a closed line of pigs at a low level of inbreeding (in German), 3 (1976) 351
- Economic aspects of the hybridisation programme in pig breeding in Czechoslovakia, 4 (1977) 217
- Economic efficiency of pig breeding schemes: aspects of a national two-breed programme, 4 (1977) 225
- Efficiency of breeding and utilisation of the gene pool in commercial pig production, 4 (1977) 291
- Breeding efficiency—sheep**
- Development of a synthetic dam line in a reciprocal cross between Finnish Landrace and Ile de France in The Netherlands, 17 (1987) 77

- Breeding methods—horses**
- Relative importance of performance tests and progeny tests in horse breeding, 5 (1978) 303
- Genetic problems in horse breeding, 10 (1983) 69
- Breeding methods—pigs**
- Methods of pig improvement through breeding in the European countries; a review, 2 (1975) 1
- The improvement of sow productivity, a review of recent experiments in France, 2 (1975) 235
- Estimates of costs and returns of selecting pigs on growth rate and backfat thickness, 7 (1980) 135

Results of halothane testing in offspring of Dutch Landrace A.I. boars of different halothane phenotypes, 7 (1980) 283

Antagonistic traits in pig breeding, 8 (1981) 407

Growth and carcass quality of crossbred pigs sired by Duroc, Landrace and Large White boars, 18 (1988) 275

Breeding methods—sheep

Adaptation of the principles of selection for milk production to milking ewes: a review, 9 (1982) 549

Breeding schemes—pigs

Studies on breeding schemes in a closed pig population. I. Population size and selection intensities, 19 (1988) 417

Studies on breeding schemes in a closed pig population. II. Mating policy, 19 (1988) 443

Optimal population size and sow/boar ratio in a closed dam line of pigs, 22 (1989) 305

Multi-stage selection in a closed dam line of pigs, 24 (1990) 159

Breeding schemes—rabbits

Optimum structure for genetic improvement of Angora rabbits, 18 (1988) 69

Breeding value estimation

Problems in estimating maternal effects, 7 (1980) 405

Two breeding schemes for estimation of heterosis and recombination effects, 11 (1984) 227

Breeding value estimation—cattle

General recommendations for the documentation of changes in dairy cattle populations and for estimating the expected genetic merit of bulls of various origins used on specific cow populations. Report of a working group of the E.A.A.P. commission on animal genetics, 10 (1983) 519

Optimal selection responses under varying milk prices and margins for milk production, 14 (1986) 109

Breeding value estimation—goats

The inheritance of cashmere in Australian goats. 2. Genetic parameters and breeding values, 21 (1989) 251

Breeding value estimation—horses

Genetic problems in horse breeding, 10 (1983) 69

Advantages of BLUP animal model for breeding value estimation in horses, 20 (1988) 149

Breeding value estimation—pigs

Estimation of breeding value in pigs. Report of a working group of the commission on animal genetics, 7 (1980) 269

Breeding value estimation—rabbits

Mixed model methodology for the estimation of genetic response to selection in litter size of rabbits, 21 (1989) 67

Breeding value estimation—sheep

A review of sheep recording and evaluation of breeding animals in European countries: a group report, 7 (1980) 373

Breeds—cattle

Differences in the intake of roughage between cows of three breeds fed two levels of concentrates according to milk yield, 6 (1979) 147

Differences in feed intake between Holstein Friesian, Dutch Red and White and Dutch Friesian cattle, 7 (1980) 13

The value of 'fat-corrected' conformation as an indicator of beef carcass composition within and between breeds, 7 (1980) 361

Bovine metacarpal and metatarsal dimensions: comparison of Aberdeen-Angus and Charolais steers slaughtered at three percentages of mature cow weight, 9 (1982) 653

The effect of treatment of dairy cows of different breeds with recombinantly derived bovine somatotropin in a sustained-delivery vehicle, 21 (1989) 13

Productivity of Nguni and Africander cattle in Mozambique, 24 (1990) 29

Genetic analyses of calving traits in the Swiss Black and White, Braunvieh and Simmental breeds by REML and MAPP procedures, 24 (1990) 93

Changes in body composition of mature dry cows of Holstein, Limousin and Charolais breeds during fattening. I. Skeleton, muscles, fatty tissues and offal, 25 (1990) 199

Breeds—pigs

Genetic variability expressed by marker-systems in two Belgian pig populations, 10 (1983) 386

Leg weakness and osteochondrosis in pigs; differences between the sexes of four breeds, 16 (1987) 65

Meat quality as influenced by halothane sensitivity and ultimate pH in three porcine breeds, 18 (1988) 171

Buffaloes

A note on the relationship between the production rates of volatile fatty acids and their con-

centration, digestible organic matter and total digestible nutrient intake in buffalo calves, 5 (1978) 253

Response of buffaloes to heavy working load under tropical conditions, 13 (1985) 199

Genetic environmental control of first-lactation milk yield in cows and buffaloes, 17 (1987) 225

Bulbo-urethral glands—boars

The size of Cowper's (bulbo-urethral) glands as an estimate of boar taint on the slaughter line, 13 (1985) 169

Caecotrophy

Utilization of caecal digesta by caecotrophy (soft faeces ingestion) in the rabbit, 8 (1981) 361

Calf rearing

Productivity aspects of keeping dairy cow and calf together in the post-partum period, 16 (1987) 385

Calving problems

Calving ability of three French beef breeds: preliminary results, 1 (1974) 217

Calving performance in Danish breeds of dual purpose cattle, 2 (1975) 51

Statistical efficiency in bull progeny testing for calving difficulty, 3 (1976) 147

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows, 3 (1976) 227

Calving performance and calf mortality, 3 (1976) 319

Comments on statistical efficiency in bull progeny testing for calving difficulty, 4 (1977) 203

Beef breed bulls versus selected dual purpose bulls in producing calves for meat production, 5 (1978) 245

Calving difficulties and perinatal mortality in four daughter groups of MRY bulls, 5 (1978) 405

Sire evaluation standards and breeding strategies for limiting dystocia and stillbirth. Report of an E.E.C./E.A.A.P. working group, 6 (1979) 111

Beef crossing with Dutch Friesian cows: model calculations on expected levels of calving difficulties and their consequences for profitability, 7 (1980) 419

Selection problems when antagonistic effects exist between production characteristics and calving difficulties, 8 (1981) 291

Dystocia and stillbirth in cattle—a review of causes, relations and implications, 11 (1984) 143

Responses to sire selection for dystocia, 13 (1985) 251

Mating double-muscling and normal cattle for lean beef production, 21 (1989) 201

Genetic analyses of calving traits in the Swiss Black and White, Braunvieh and Simmental breeds by REML and MAPP procedures, 24 (1990) 93

Selection of low birth weight and high yearling weight in Angus beef cattle, 25 (1990) 31

Carcass composition—cattle

Recent experimental developments in ultrasonic measurement of cattle, 2 (1975) 137

In vivo estimation of body composition in young bulls for slaughter. 2. The prediction of carcass traits from scores, ultrasonic scanning and body measurements, 12 (1985) 231

Carcass composition—pigs

Danish investigations concerning body composition of pigs in relation to nutrition, sex and slaughter weight, 3 (1976) 271

Effects of feeding level from 20 to 45 kg on the performance and carcass composition of pigs grown to 90 kg live weight, 10 (1983) 265

Carcass composition—sheep

Influence of metabolizable energy content of the diet and of feeding level on lamb performances. I. Growth and body composition, 9 (1982) 471

A novel approach to growth promotion using auto-immunisation against somatostatin. II. Effects on appetite, carcass composition and food utilisation in lambs, 10 (1983) 469

Tissue growth and development in crossbred lambs sired by ten breeds, 16 (1987) 145

Carcass conformation—cattle

The value of 'fat-corrected' conformation as an indicator of beef carcass composition within and between breeds, 7 (1980) 361

Carcass evaluation—cattle

Factors determining the carcass value of culled dairy cows, 11 (1984) 391

Carcass evaluation—goats

Standard methods and procedures for goat carcass evaluation, jointing and tissue separation, 17 (1987) 149

Carcass measurements—cattle

Relationships of ultrasonic and carcass measurements with retail yield in beef cattle, 4 (1977) 153

Carcass traits—cattle

Evaluation of cattle breeds for beef production in New Zealand—a review, 2 (1975) 327

Estimation of genetic parameters for beef traits from field data, 4 (1977) 1

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows. III. Daily gain, feed conversion and carcass quality of intensively fed young bulls, 4 (1977) 19

The effects of slaughter age on growth and carcass traits in an intensively managed crossbred beef herd, 9 (1982) 375

Influence of energy level, weight at slaughter and castration on carcass quality in cattle, 11 (1984) 571

Testing of different strains of Friesian cattle in Poland. II. Beef performance of male crossbreds of different Friesian cattle strains under intensive feeding conditions, 12 (1985) 117

Early calving heifers versus maiden heifers for beef production from dairy herds. I. The effects of genotype (Friesian and Charolais x Friesian) and two feeding levels in the rearing period on growth and carcass quality, 16 (1987) 1

Phenotypic and genetic parameters of carcass and meat-quality traits in cattle, 21 (1989) 35

Carcass traits—pigs

Effects of temperature and level of feeding during rearing on carcass and reproductive traits in pigs, 2 (1975) 247

Pruteen, a new source of protein for growing pigs. II. Feeding trial: growth rate, feed utilization and carcass and meat quality, 4 (1977) 91

Some effects on the growth and composition of the carcass of the bacon pig of feeding micronized or ground maize or barley based diets to give three different digestible energy intakes, 4 (1977) 343

Variation and trends in the weight and fat thickness of commercial British pigs, 5 (1978) 215

Production characteristics of Dutch Landrace and Dutch Yorkshire pigs as related to their susceptibility for the halothane-induced malignant hyperthermia syndrome, 5 (1978) 277

The effect of controlled growth rate on the performance of boars and on the odour of subcutaneous fat at 85 and 122 kg live weight, 7 (1980) 163

Results of halothane testing in offspring of Dutch Landrace A.I. boars of different halothane phenotypes, 7 (1980) 283

Performance of Dutch Landrace pigs with different genotypes for the halothane-induced malignant hyperthermia syndrome, 7 (1980) 317

The physiological reaction of halothane tested pigs to treadmill exercise, and to slaughter, 7 (1980) 473

The influence of preslaughter fasting on carcass and liver yield in pigs, 10 (1983) 273

Performance of purebred Dutch Yorkshire boars versus crossbred (Belgian Landrace x Dutch Yorkshire) boars. A field trial, 16 (1987) 51

Lasting effects of housing conditions after weaning on feed efficiency and carcass grades of growing-finishing pigs. An analysis of field data, 16 (1987) 175

Growth and carcass quality of crossbred pigs sired by Duroc, Landrace and Large White boars, 18 (1988) 275

Comparison of early castration at day 1, 7 or 14 on growth and carcass traits in swine, 20 (1988) 269

Carcass traits—sheep

Results of a crossbreeding experiment with sheep for different systems of fat lamb production. II. Growth and carcass traits, 2 (1975) 179

Effect on production and carcass quality characteristics of wether lambs of crossing Black-headed Mutton, Ile de France and Texel rams with Polish Merino ewes, 3 (1976) 343

The influence of the Tasmanian Fine-Woolled Merino on carcass characteristics of lambs, 4 (1977) 191

Genetic studies on carcass traits in Iceland twin ram lambs. I. Estimates of genetic parameters on carcass traits, live weight at weaning and carcass weight, 8 (1982) 489

Genetic studies on carcass traits in Iceland twin ram lambs. II. Analysis of principal components and construction of selection indices, 8 (1982) 507

An attempt to correlate early muscle characteristics with carcass traits at slaughter in lambs, 11 (1984) 195

Carcass and meat characteristics of crossbred lambs born to ewes of different genetic types and slaughtered at different weights, 12 (1985) 241

Casein

Effects of stage of lactation on the response of dairy cows to abomasal infusions of casein, 15 (1986) 97

The efficiency of casein N utilization in dairy cows, 25 (1990) 67

Cashmere production

The inheritance of cashmere in Australian goats. 1. Characteristics of the base population and the effects of environmental factors, 21 (1989) 157

The inheritance of cashmere in Australian goats. 2. Genetic parameters and breeding values, 21 (1989) 251

Castration—cattle

The influence of energy level, weight at slaughter and castration on growth and feed efficiency in cattle, 11 (1984) 559

Influence of energy level, weight at slaughter and castration on carcass quality in cattle, 11 (1984) 571

Castration—pigs

The chemical composition of fat tissues in the pig: effects of castration and feeding treatment, 15 (1986) 73

Comparison of early castration at day 1, 7 or 14 on growth and carcass traits in swine, 20 (1988) 269

Cattle—body composition

Growth of adipose tissue in cattle; partitioning between depots, chemical composition and cellularity. A review, 14 (1986) 349

Cattle—body measurements

The accuracy of some body measurements on live beef steers, 2 (1975) 357

Cattle—breeding

General recommendations on procedures for performance and progeny testing for beef characteristics, 1 (1974) 33

A note on two methods for estimation of genetic change in dairy cattle, 1 (1974) 47

Methods for measuring genetic progress in dairy traits, 1 (1974) 141

The effect of changing the sex ratio on the efficiency of cattle breeding operations, 2 (1975) 29

Cattle breed comparison and crossbreeding trials in Europe; a survey prepared by a Working Party of the European Association for Animal Production, 3 (1976) 1

Calving performance and calf mortality, 3 (1976) 319

Breeding aspects of embryo transplantation utilized in the bull dam path within a dual-purpose cattle population, 4 (1977) 305

Problems in cow evaluation and current use of cow index. Report of a working group on cow evaluation, 5 (1978) 3

- Cow evaluation in North America, 5 (1978) 19
- Calving difficulties and perinatal mortality in four daughter groups of MRY bulls, 5 (1978) 405
- Performance testing of bulls in AI: Report of a working group of the Commission on Cattle Production, 8 (1981) 101
- A genetic analysis of performance and progeny test data for young bulls of Norwegian Red Cattle and various Friesian crosses, 10 (1983) 123
- Predicting the genetic drift in small populations, 13 (1985) 207
- A method of comparing sires evaluated in different countries, 13 (1985) 321
- Maternal effects due to cytoplasmic inheritance in dairy cattle. Influence on milk production and reproduction traits, 15 (1986) 11
- An economic comparison of four insemination and culling policies in dairy herds, by method of stochastic simulation, 18 (1988) 239
- Effect of sire of foetus on current and subsequent milk yield of the dam, 20 (1988) 107
- Impact of the potential use of bovine somatotropin on the efficiency of a conventional dairy cattle breeding scheme, 22 (1989) 31

Cattle—carcass backfat depth

Accuracy, repeatability and reproducibility of the anal fold measurements for predicting carcass backfat depth in cattle, 15 (1986) 103

Cattle—carcass composition

The influence of slaughter weight and level of feeding of growth rate, feed conversion and carcass composition of bulls, 2 (1975) 341

The value of 'fat-corrected' conformation as an indicator of beef carcass composition within and between breeds, 7 (1980) 361

Prediction of beef carcass composition by tissue depth measurements taken over the 11th rib, 9 (1982) 337

Comparison of ultrasonic equipment for describing beef carcass characteristics in live cattle. (Report on a joint ultrasonic trial carried out in the U.K. and Denmark.), 10 (1983) 133

Operator and machine effects on ultrasonic measurements of beef cows, 18 (1988) 305

Cattle—carcass traits

Manual on E.A.A.P. reference methods for the assessment of carcass characteristics in cattle, 1 (1974) 151

The effect of a β -agonist (clenbuterol) on the heart rate, nitrogen balance and some carcass characteristics of veal calves, 15 (1986) 289

Cattle—carcass yield

Relationships of ultrasonic and carcass measurements with retail yield in beef cattle, 4 (1977) 153

Cattle—double musling

Anatomical, physiological and biochemical differences between conventional and double-

musled cattle in the Belgian Blue and White Breed, 6 (1979) 5

Cattle—fertility

Genetic investigations on male and female fertility in cattle, 6 (1979) 325

Genetic effects on return intervals in cows, 7 (1980) 225

Biotechnical measures for improvement of fertility in cattle, 8 (1981) 215

A reciprocal translocation difference in the autosomes of F₁ Brahman \times Hereford hybrid cattle, visualized by electron microscopy, 13 (1985) 123

A survey of the gametic products of Charolais bulls carrying an insertion in chromosome 16, 25 (1990) 61

Cattle—housing

Comparison between conventional tie-barn and loose housing systems with respect to milk production, feed conversion and reproductive performance of dairy cows, 4 (1977) 69

The effect of floor space allowance on feedlot performance and on behaviour of Israeli-Friesian male cattle, 6 (1979) 307

Cattle—immunology

Sexing bovine embryos with monoclonal antibodies against the H-Y antigen, 23 (1989) 1

Cattle—lactation production

The use of prolonged intervals between milk weighings and butterfat tests in milk recording, 3 (1976) 155

Day-to-day variation in milk yield, fat content and protein content, 4 (1977) 141

Phenotypic and genetic parameters of part lactation milk and fat records in Polish Lowland cattle, 6 (1979) 129

Lactation curves of Friesian-Bunaji crosses in Nigeria, 8 (1981) 11

Genetic relationships between level of production in different lactations, rate of maturity and longevity in a dual purpose cattle population, 23 (1989) 33

Cattle—management and health

Etiology and predisposing factors in respiratory disease of milk-fattened veal calves, 3 (1976) 285

Heart rate as a possible indicator of the energy metabolism of calves kept out-of-doors, 3 (1976) 333

Effects of isolating first-lactation cows from older cows, 6 (1979) 137

Data standards for computer systems in livestock recording for dairy herd management, 10 (1983) 419

The effect of herd characteristics on claw disorders and claw measurements in Friesians, 15 (1986) 1

Genetic aspects of claw disorders, claw measurements and 'type' scores for feet in Friesian cattle, 15 (1986) 205

Adjustment of non-return rates of AI technicians and dairy bulls, 16 (1987) 363

Factors affecting intervals between date of calving and incidence of health disorders in diseased dairy cows, 20 (1988) 203

Milk temperature fluctuations during milking in cows with subclinical mastitis, 20 (1988) 223

Analysis of relationships between veterinary recorded production diseases and milk production in dairy cows, 23 (1989) 67

Cattle liveweight sampled on a continuous versus intermittent basis, 23 (1989) 117

Management factors related to calf morbidity and mortality rates, 25 (1990) 79

Cattle—meat production

Grassland systems for beef production from dairy bred and beef calves, 2 (1975) 121

Beef production with maiden and once-calved heifers, 7 (1980) 121

The effects of slaughter age on growth and carcass traits in an intensively managed cross-bred beef herd, 9 (1982) 375

Bovine metacarpal and metatarsal dimensions: comparison of Aberdeen-Angus and Charolais steers slaughtered at three percentages of mature cow weight, 9 (1982) 653

Factors determining the carcass value of culled dairy cows, 11 (1984) 391

Beef breed comparisons in the U.K., 11 (1984) 491

Beef production from a dairy farm: a linear programming simulation approach, 11 (1984) 503

The influence of energy level, weight at slaughter and castration on growth and feed efficiency in cattle, 11 (1984) 559

Influence of energy level, weight at slaughter and castration on carcass quality in cattle, 11 (1984) 571

In vivo estimation of body composition in young bulls for slaughter. 1. The repeatability and reproducibility of a scoring system, an ultrasonic scanning technique and body measurements, 12 (1985) 221

In vivo estimation of body composition in young bulls for slaughter. 2. The prediction of carcass traits from scores, ultrasonic scanning and body measurements, 12 (1985) 231

Early calving heifers versus maiden heifers for beef production from dairy herds. I. The effects of genotype (Friesian and Charolais x Friesian) and two feeding levels in the rearing period on growth and carcass quality, 16 (1987) 1

Early calving heifers versus maiden heifers for beef production from dairy herds. II. Physico-chemical and sensorial characteristics of meat, 16 (1987) 21

Productivity of Nguni and Africander cattle in Mozambique, 24 (1990) 29

Changes in body composition of mature dry cows of Holstein, Limousin and Charolais breeds during fattening. I. Skeleton, muscles, fatty tissues and offal, 25 (1990) 199

Cattle—meat quality measurements

Procedures for measuring meat quality characteristics in beef production experiments. Report of a Working Group in the Commission of the European Communities' (CEC) Beef Production Research Programme, 8 (1981) 385

Cattle—milk production

Comparison of two techniques for estimating the milk production of suckler cows, 6 (1979) 277

Factors associated with average herd milk production in Norway, 8 (1981) 1

The effect of treatment of dairy cows of different breeds with recombinantly derived bovine somatotropin in a sustained-delivery vehicle, 21 (1989) 13

A farm-level analysis of short-term selective yield enhancing measures in milk production—the example of bovine somatotropin (bST), 25 (1990) 43

Cattle—multiple births

Effects of twinning on milk production in dairy cattle, 4 (1977) 255

Inheritance of multiple births in cattle, 11 (1984) 373

Cattle—physiological state

Effects of physiological state and body fatness on digestive-tract weight and composition in the dairy cow, 12 (1985) 379

Cattle—population structure

A note on the population structure of the Avileña breed of cattle in Spain, 15 (1986) 285

Cattle—production

Outlook on cattle production and research, 1 (1974) 261

The potential uses of metabolic profiles in the management and selection of cattle for milk and beef production, 3 (1976) 239

Effects of drinking water flow rates and social rank on performance and drinking behaviour of tied-up dairy cows, 11 (1984) 599

Maternal effects due to cytoplasmic inheritance in dairy cattle. Influence on milk production and reproduction traits, 15 (1986) 11

Productivity aspects of keeping dairy cow and calf together in the post-partum period, 16 (1987) 385

Cattle—replacement policy

Studies on the replacement policies in dairy cattle. II. Optimum policy and influence of changes in production and prices, 13 (1985) 101

Studies on the replacement policies in dairy cattle. III. Influence of variation in reproduction and production, 13 (1985) 333

Studies on the replacement policies in dairy cattle. IV. Influence of seasonal variation in performance and prices, 14 (1986) 15

Cattle—replacement rate

Economic evaluation of replacement rates in dairy herds. I. Reduction of replacement rates through improved health, 6 (1979) 15

Economic evaluation of replacement rates in dairy herds. II. Selection of cows during the first lactation, 6 (1979) 29

Cattle—reproduction

New trends in the control of reproduction in the bovine, 1 (1974) 117

Calving ability of three French beef breeds: preliminary results, 1 (1974) 217

Calving performance in Danish breeds of dual purpose cattle, 2 (1975) 51

Detection oestrus by measuring milk temperatures of dairy cows during milking, 3 (1976) 85

Physiological impact on fertility in cattle, with special emphasis on assessment of the reproductive function by progesterone assay, 8 (1981) 233

Seasonal modulation of puberty and the post-partum anestrus in cattle: a review, 12 (1985) 309

Pregnancy rate, calf mortality and calving date in unsupplemented Hereford range cows, 23 (1989) 305

Estimation of the economic value of conception rate in dairy cattle, 24 (1990) 185

Cattle—selection efficiency

A review of central performance testing of beef bulls and of recent research in New Zealand, 5 (1978) 147

Optimal selection responses under varying milk prices and margins for milk production, 14 (1986) 109

The value of daughters of bull dams in dairy cattle progeny testing schemes, 23 (1989) 267

Cattle—selection methods

A simplified method of progeny testing A.I. bulls for milk protein, 3 (1976) 33

Cattle—transport

The physiological and behavioural responses of crossbred Friesian steers to short-haul transport by road, 17 (1987) 63

The effects of fasting and transportation on beef cattle. 1. Acid-base-electrolyte balance and infrared heat loss of beef cattle, 20 (1988) 15

The effects of fasting and transportation on beef cattle. 2. Body component changes, carcass composition and meat quality, 20 (1988) 25

Cattle crossbreeding—beef

The economic consequences of beef crossing in dual-purpose or dairy cattle populations, 1 (1974) 133

Evaluation of cattle breeds for beef production in New Zealand—a review, 2 (1975) 327

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows, 3 (1976) 227

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows. III. Daily gain, feed conversion and carcass quality of intensively fed young bulls, 4 (1977) 19

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows. IV. Physical, chemical and palatability characteristics of longissimus dorsi and semitendinosus muscles from crossbred young bulls, 4 (1977) 31

Beef breed bulls versus selected dual purpose bulls in producing calves for meat production, 5 (1978) 245

Beef crossing with Dutch Friesian cows: model calculations on expected levels of calving difficulties and their consequences for profitability, 7 (1980) 419

Phenotypic and genetic parameters of carcass and meat-quality traits in cattle, 21 (1989) 35

Mating double-musled and normal cattle for lean beef production, 21 (1989) 201

Studies on sire \times environment interactions and their effect on response to selection in beef sires progeny-tested for fattening performance and carcass yield, 21 (1989) 287

Cattle crossbreeding—dairy

- The development of a new red and white breed of cattle in the United Kingdom, 1 (1974) 401
- Breed and crossbreeding effects in a crossing experiment between Dutch Friesian and Holstein Friesian cattle, 7 (1980) 235
- Testing of different strains of Friesian cattle in Poland. I. Milk performance of F_1 paternal Friesian strain crosses under intensive feeding conditions, 10 (1983) 109
- Testing of different strains of Friesian cattle in Poland. II. Beef performance of male cross-breeds of different Friesian cattle strains under intensive feeding conditions, 12 (1985) 117
- Heterosis in *Bos taurus* \times *Bos indicus* crosses, 12 (1985) 299
- Testing of different strains of Friesian cattle in Poland. III. Milk performance of the strain backcrosses under intensive feeding conditions, 18 (1988) 101
- Comparison of ten Friesian strains in Poland under field conditions. I. Strain comparison for growth rate, 18 (1988) 217
- Crossbreeding effects between two Swedish dairy breeds for production traits, 20 (1988) 175
- Dairy cattle cross-breeding in the Tropics: performance of secondary cross-bred populations, 23 (1989) 97

- Dairy cattle crossbreeding in the tropics: the importance of genotype \times environment interaction, 24 (1990) 109
- Cardio-respiratory activity in Zebu and their F_1 crosses with European breeds of dairy cattle at different ambient temperatures, 24 (1990) 119

Cattle feeding—beef

- Effect of level of feeding on growth, reproductive performance and milk production of beef females, 5 (1978) 159

Dried beet pulp as energy source for intensive bull fattening, 5 (1978) 171

The effect of straw-bedded loose houses or tie stalls on the performances of finishing bulls, 6 (1979) 369

Evaluation of energy requirements of beef cows during early lactation, 8 (1981) 139

The effect of turn-out to pasture on blood plasma iron concentrations in beef cattle, 10 (1983) 83

Cattle feeding—dairy

- Energy intake and requirement of dairy cows during the whole year, 1 (1974) 21
- The economics of using artificially dried green crops in milk production, 2 (1975) 211
- Nutrient requirements of the high yielding cow, 4 (1977) 263
- Effect of silage:concentrate ratio on feed intake, growth rate and subsequent milk yield of early calving heifers, 4 (1977) 313
- A study of the influence of the energy and protein supply on the fertility of dairy cows, 4 (1977) 327
- The role of conserved forages in the nutrition of the dairy cow, 5 (1978) 45
- Differences in the intake of roughage between cows of three breeds fed two levels of concentrates according to milk yield, 6 (1979) 147
- Differences in feed intake between Holstein Friesian, Dutch Red and White and Dutch Friesian cattle, 7 (1980) 13
- Tests of 6 energy evaluation systems for dairy cows, 9 (1982) 457
- The effect on performance of different energy concentrations in complete rations for first lactation cows before and after calving, 10 (1983) 223
- Standard and lead feeding of dairy cows, 10 (1983) 443
- Complete diet feeding for cattle, 11 (1984) 269

Effects of drinking water temperatures on water intake and milk yield of tied-up dairy cows, 12 (1985) 329

The effect of level and distribution of concentrate supplementation on performance of dairy cows, 17 (1987) 117

Influence of transition feeding pattern on milk production at the turnout of cows to pasture, 20 (1988) 119

A review of the potential of nutrition to modify milk fat and protein, 23 (1989) 219

Cattle feeding—dairy and beef

A review of requirements of dairy and beef cattle for major elements, 10 (1983) 327

Cattle nutrition

Studies on degradation and outflow rate of protein supplements in the rumen of sheep and cattle, 10 (1983) 17

Effects of the ingestion of warm, cold and frozen food on thermal balance in cattle, 23 (1989) 107

Cattle nutrition—beef

Effects of level and diurnal variation of dietary concentrate on digestion and passage rate in beef steers, 13 (1985) 267

Effects of oestradiol-17 β on growth and insulin-like growth factor I of steers on different pasture allowances, 21 (1989) 303

Intake, digestion and daily gain by cattle consuming bermudagrass hay and receiving concentrate supplements, 22 (1989) 255

Cattle nutrition—calves

Ethanol and *Torulopsis glabrata* in the rumens of milk-replacer fed farm calves: a survey, 4 (1977) 335

The effect of dietary electrolyte balance on blood parameters and the performance of veal calves, 21 (1989) 213

Changes in ruminal and intestinal digestion during and after weaning in dairy calves fed concentrate diets containing pea or soya-bean meal. 2. Amino acid composition and flow of duodenal and ileal digesta, and blood levels of free amino acids, 24 (1990) 129

Changes in ruminal and intestinal digestion during and after weaning in dairy calves fed concentrate diets containing pea or soya bean meal. 1. Digestion of organic matter and nitrogen, 24 (1990) 143

Rate of passage of digesta during and after weaning in calves fed concentrate diets containing pea or soya-bean meal, 24 (1990) 333

Cattle nutrition—dairy

Feed evaluation for dairy cows, 2 (1975) 95

Influence of the composition of the ration and the feeding frequency on pH-regulation in the rumen and on feed intake in ruminants, 3 (1976) 103

Regulation of food intake in dairy cows in relation to milk production, 3 (1976) 115

Physiological factors affecting the voluntary intake of feed by cows: a review, 3 (1976) 129

Feed evaluation for dairy cows: tests on the system proposed in the Netherlands, 4 (1977) 57

Effect of the level of feed intake on nitrogen entering the small intestine of dairy cows, 6 (1979) 255

Amino acid utilization by dairy cows. I. Methods of varying amino acid supply, 7 (1980) 437

Amino acid utilization by dairy cows. II. Concept of amino acid requirements, 7 (1980) 453

Different energy and protein levels for dairy cows in the early weeks of lactation, 7 (1980) 555

Response of dairy cows to protein level in early lactation, 8 (1981) 21

The estimation of the energy value of liveweight change in the lactating dairy cow, 9 (1982) 665

Models for the prediction of food intake and energy balance in dairy cows, 10 (1983) 149

Urea concentrations in milk and blood as influenced by feeding varying amounts of protein and energy to dairy cows, 10 (1983) 457

Urea concentrations in milk in relation to milk yield, live weight, lactation number and amount and composition of feed given to dairy cows, 12 (1985) 47

Genetic factors controlling feed efficiency in dairy cows, 13 (1985) 87

Prediction of duodenal flow of non-ammonia nitrogen and amino acid nitrogen in dairy cows, 14 (1986) 29

Relationship between milk composition and some nutritional parameters in early lactation, 14 (1986) 239

Effects of stage of lactation on the response of dairy cows to abomasal infusions of casein, 15 (1986) 97

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on rumen fermentation in dairy cows, 15 (1986) 173

The effects of continuous or intermittent infusion of propionic acid on plasma insulin and milk yield in dairy cows nourished by intragastric infusion of nutrients, 16 (1987) 201

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on milk production and whole tract digestibility in dairy cows, 17 (1987) 19

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on rumen ingesta quantity, composition and kinetics of ingesta turnover in dairy cows, 17 (1987) 37

Feed intake and utilization of maize silage-based complete diets by Australian Friesian cows and heifers at various stages of lactation, 23 (1989) 275

The efficiency of casein N utilization in dairy cows, 25 (1990) 67

Cattle nutrition—growth

Relation of the metabolisable energy intake of growing cattle to body weight, live weight gain and dry matter intake, 4 (1977) 277

Effect of monensin on rumen fermentation, performance and body composition of growing bulls, 8 (1982) 479

Cattle selection—beef and veal

Recent experimental developments in ultrasonic measurement of cattle, 2 (1975) 137

Estimation of genetic parameters for beef traits from field data, 4 (1977) 1

Comparison of sire evaluation methods for carcass gain using field data, 4 (1977) 11

Estimation of breeding values of beef bulls—Hereford and Charolais—based on data from the field recording scheme in Sweden. I. Environmental effects on birth weight, 200-day weight and yearling weight, 5 (1978) 379

Estimation of breeding values of beef bulls—Hereford and Charolais—based on data from the field recording scheme in Sweden. II. The relationship and the heritability of birth weight, 200-day weight and yearling weight, 5 (1978) 393

Variation of meat production capacity in cattle due to genotype and level of feeding: genotype—nutrition interaction, 6 (1979) 263

A genetic analysis of the concentrations of blood metabolites and their relationships with age and liveweight gain in young British Friesian bulls, 10 (1983) 1

Effects of discontinuity on heritabilities and phenotypic correlations for classified type characteristics in Japanese Black heifers, 10 (1983) 611

A selection index for beef production capacity of performance-tested young bulls in A.I. in Dutch dual-purpose breeds, 11 (1984) 381

Performance testing of future A.I. bulls for growth rate, feed efficiency and muscularity. Genetic parameters, adjustment for systematic environmental factors, selection indices, 11 (1984) 475

Model calculations for the optimal planning of beef performance tests using German dual-purpose cattle population as an example, 13 (1985) 229

Breeding for veal production in Black and White dairy cattle, 15 (1986) 325

Non-genetic influences of performance testing of beef cattle, 16 (1987) 349

Performance testing of bulls for efficiency and beef traits in dairy and dual-purpose cattle. Report of an E.A.A.P. Working Group, 20 (1988) 287

Relationships between breeding values for growth of beef sires in purebreeding and crossbreeding, 21 (1989) 275

Breeding for veal and beef production in Dutch Red and White cattle, 25 (1990) 183

Cattle selection—calving

Statistical efficiency in bull progeny testing for calving difficulty, 3 (1976) 147

Comments on statistical efficiency in bull progeny testing for calving difficulty, 4 (1977) 203

Sire evaluation standards and breeding strategies for limiting dystocia and stillbirth. Report of an E.E.C./E.A.A.P. working group, 6 (1979) 111

Selection problems when antagonistic effects exist between production characteristics and calving difficulties, 8 (1981) 291

A comparison of benefits and costs of birth recording on heifers and second calvers, 10 (1983) 431

Dystocia and stillbirth in cattle—a review of causes, relations and implications, 11 (1984) 143

Responses to sire selection for dystocia, 13 (1985) 251

Genetic analyses of calving traits in the Swiss Black and White, Braunvieh and Simmental breeds by REML and MAPP procedures, 24 (1990) 93

Selection of low birth weight and high yearling weight in Angus beef cattle, 25 (1990) 31

Cattle selection—dairy

An economic evaluation of different selection alternatives as means for improvement of milk protein yield, 2 (1975) 221

Breeding for persistency of milk yield, 3 (1976) 27

Strain differences in milking performance, food consumption and body size amongst Friesian cattle in Danish test stations, 3 (1976) 165

Comparisons of dairy progeny tests for sires and their sons, 4 (1977) 45

AI bull evaluation standards for dairy and dual purpose breeds, 4 (1977) 115

Comparison of several sire evaluation methods in dairy cattle breeding, 4 (1977) 129

Theoretical aspects of culling and selection in dairy cattle, 7 (1980) 213

Culling on low milk yield and its economic consequences for the dairy herd, 7 (1980) 349

Thyroxine degradation rate in young bulls of Danish dual-purpose breeds. Genetic relationship to weight gain, feed conversion and breeding value for butterfat production, 8 (1981) 399

General recommendations for the documentation of changes in dairy cattle populations and for estimating the expected genetic merit of bulls of various origins used on specific cow populations. Report of a working group of the E.A.A.P. commission on animal genetics, 10 (1983) 519

Scope for evaluating dairy sires using first and second lactation records, 10 (1983) 531

Genetic parameters for days open, milk yield, and fat and protein content of Swiss Braunvieh cows, 11 (1984) 261

Model for international evaluation of dairy sires, 12 (1985) 105

Genetic parameters for dairy production of Australian Black and White cows, 12 (1985) 205

Conversions of breeding values for milk from foreign populations, 14 (1986) 223

Partitioning of herd, year and season variation in milk production, 16 (1987) 107

- Dairy sire evaluation fitting some of the herd-year-season effects as random, 16 (1987) 117
- Optimal replacement and ranking of dairy cows determined by a hierarchic Markov process, 16 (1987) 131
- A comparison of different measures of persistency with special respect to variation of test-day milk yields, 16 (1987) 305
- Adjustment of lactation yield for age at calving in relation to level of production, 16 (1987) 321
- Adjustment of test-day milk, fat and protein yield for age, season and stage of lactation, 16 (1987) 335
- Comparison of different methods of predicting 305-day milk yield using means calculated from within-herd lactation curves, 17 (1987) 1
- Estimates of variances due to sire \times herd interactions and environmental covariances between paternal half-sibs for first lactation dairy production, 17 (1987) 95
- Efficiency of selection for different cumulative milk, fat and protein yields in first lactation, 17 (1987) 211
- Genetic environmental control of first-lactation milk yield in cows and buffaloes, 17 (1987) 225
- Comparison of proven sires from five Holstein-Friesian strains in high-yield Israeli dairy herds, 17 (1987) 305
- Part-lactation predictors of complete lactation milk-energy yield, food intake and food conversion efficiency, 17 (1987) 323
- Effects of incomplete records on genetic parameters among cumulative yields in first lactation and on extension of part lactations, 18 (1988) 19
- Genetic aspects of feed intake and feed efficiency in dairy cattle: a review, 20 (1988) 1
- Estimation of genetic parameters for milk production in the first three lactations, 20 (1988) 193
- Selection on fat and protein to maximise profit in dairy herds, 20 (1988) 299
- Phenotypic and genetic association between fertility and production in dairy cows, 21 (1989) 1
- Estimates of genetic parameters for first lactation test day production of Australian Black and White cows, 21 (1989) 177
- The economic value of feed intake capacity of dairy cows, 22 (1989) 269
- A simulation study comparing methods of within-herd estimation of breeding values for dairy cows, 23 (1989) 239
- International evaluation of Holstein-Friesian dairy sires from three countries, 24 (1990) 15
- A method for β -lactoglobulin genotyping of cattle, 25 (1990) 173
- Cattle selection—dairy and beef**
- Economic values in cattle breeding. I. Influences of production circumstances in situations without output limitations, 22 (1989) 1
- Economic values in cattle breeding. II. Influences of production circumstances in situations with output limitations, 22 (1989) 17
- Implications of selection for secondary traits on MOET-nucleus cattle breeding programs for dairy and dual-purpose breeds, 22 (1989) 237
- Cattle selection—disease resistance**
- Use of field records in breeding for mastitis resistance in dairy cattle, 5 (1978) 29
- Genetic aspects of feet soundness in cattle, 8 (1981) 253
- Indirect selection of bulls for improved resistance to diseases in dairy cattle, 8 (1981) 321
- Genetic influence on clinical mastitis and its relationship with milk yield, season and stage of lactation, 11 (1984) 91
- Claw measurements of young bulls at performance testing stations in Bavaria, 11 (1984) 587

Genetic analyses of nematode egg counts in Hereford and crossbred Hereford cattle in the subtropics of New South Wales, 12 (1985) 79

Importance of claw quality in cattle: review and recommendations to achieve genetic improvement. Report of the E.A.A.P. Working Group on "Claw Quality in Cattle", 15 (1986) 133

Inheritance of somatic cell count and its genetic relationship with milk yield in different parities, 18 (1988) 115

Recording of production diseases in cattle and possibilities for genetic improvements: a review, 20 (1988) 89

Claw traits in cattle breeding programs: reports of the E.A.A.P. working group "Claw Quality in Cattle", 25 (1990) 1

Cattle selection—fertility

Selection for fertility on the basis of AI data, 8 (1981) 247

Genetic aspects of female fertility in dairy cattle, 8 (1981) 307

Genetic aspects of fertility in dairy cattle based on analysis of A.I. data—a review with emphasis on areas for further research, 12 (1985) 1

Sire effects on cow fertility and late embryonic mortality in the Montbeliard breed, 14 (1986) 139

Direct and maternal genetic parameters of fertility traits in Friesian cattle, 15 (1986) 153

Genetic relationships between fertility traits for dairy cows in different parities, 17 (1987) 337

Genetic analysis of some maternal reproductive traits in the Belgian Blue cattle breed, 23 (1989) 79

Estimates of heritability and repeatability for reproductive traits in Australian beef cattle, 25 (1990) 15

Cattle selection—management traits

Management traits in dairy cattle. Dystocia, udder characteristics related to production, and a review of other traits, 3 (1976) 13

Sire evaluation for milkability traits in Swiss Braunvieh, 13 (1985) 219

Genetic parameters of conformation traits in Norwegian Red Cattle estimated with a multiple trait model, 14 (1986) 335

Cattle selection—type traits

Sire evaluations for type traits with linear and non-linear procedures, 15 (1986) 165

Restricted maximum likelihood (REML) estimation of genetic parameters for type traits in Normande cattle breed, 23 (1989) 47

Cellulase method

Estimation of digestibility, metabolizable energy and net energy of forage by a cellulase method, 5 (1978) 373

Chromosomal abnormality—cattle

A reciprocal translocation difference in the autosomes of F₁ Brahman × Hereford hybrid cattle, visualized by electron microscopy, 13 (1985) 123

Classification systems

Effects of discontinuity on heritabilities and phenotypic correlations for classified type characteristics in Japanese Black heifers, 10 (1983) 611

In vivo estimation of body composition in young bulls for slaughter. 1. The repeatability and reproducibility of a scoring system, an ultrasonic scanning technique and body measurements, 12 (1985) 221

In vivo estimation of body composition in young bulls for slaughter. 2. The prediction of carcass traits from scores, ultrasonic scanning and body measurements, 12 (1985) 231

Description and evaluation of a linear scoring system for exterior traits in pigs, 23 (1989) 163

Classimat

The estimation of the composition of lamb carcasses by use of an image analyser, "Classimat", on multiple cross-sections, 4 (1977) 283

Cold resistance—sheep

A review of genetic aspects of survival and resistance to cold in newborn lambs, 8 (1981) 419

Colour inheritance—sheep

Inheritance of colours, fur characteristics and skin quality traits in North European sheep breeds: a review, 10 (1983) 555

Computer systems

Data standards for computer systems in live-stock recording for dairy herd management, 10 (1983) 419

Computer tomography

Machine error in X-ray computer tomography and its relevance to prediction of in vivo body composition, 13 (1985) 383

Conception rate

Estimation of the economic value of conception rate in dairy cattle, 24 (1990) 185

Conformation traits—cattle

Genetic parameters of conformation traits in Norwegian Red Cattle estimated with a multiple trait model, 14 (1986) 335

Copper

Review of genetic aspects of mineral metabolism with particular reference to copper in sheep, 6 (1979) 223

Copper in the nutrition of pigs and rabbits: a review, 7 (1980) 253

The pantothenic acid status of pigs fed diets containing 200 mg copper per kg, 9 (1982) 591

Panthonic acid status of pigs fed diets containing maize oil, with and without 200 mg copper per kg diet, 12 (1985) 265

Cow evaluation

Problems in cow evaluation and current use of cow index. Report of a working group on cow evaluation, 5 (1978) 3

Cow evaluation in North America, 5 (1978) 19

Crossbreeding—cattle

Aptitudes maternelles des races laitières, mixtes, rustiques et à viande pour la production de veaux de boucherie par croisement industriel, 2 (1975) 39

Cattle breed comparison and crossbreeding trials in Europe; a survey prepared by a Working Party of the European Association for Animal Production, 3 (1976) 1

Beef breed comparisons in the U.K., 11 (1984) 491

Relationships between breeding values for growth of beef sires in purebreeding and crossbreeding, 21 (1989) 275

Crossbreeding—pigs

Economic efficiency of pig breeding schemes: aspects of a national two-breed programme, 4 (1977) 225

Economic efficiency of pig breeding schemes: a breeding company view, 4 (1977) 245

Some performance characteristics of prolific breeds of pigs in China, 10 (1983) 59

Crossbreeding—sheep

Contemporary comparisons between progeny by Finnish Landrace and Romanov rams out of Mutton Merino and Awassi ewes, 6 (1979) 283

The reproductive performance of Finn × German Mutton Merino and purebred German Mutton Merino ewes, 7 (1980) 49

Objectives and selection criteria for Dorset sheep in Australia, 8 (1981) 331

Crossbreeding parameters

Use of mixed-model methodology to improve estimation of crossbreeding parameters, 21 (1989) 101

Culling efficiency—cattle

Economic evaluation of replacement rates in dairy herds. I. Reduction of replacement rates through improved health, 6 (1979) 15

Economic evaluation of replacement rates in dairy herds. II. Selection of cows during the first lactation, 6 (1979) 29

Theoretical aspects of culling and selection in dairy cattle, 7 (1980) 213

Culling on low milk yield and its economic consequences for the dairy herd, 7 (1980) 349

Optimal replacement and ranking of dairy cows determined by a hierarchic Markov process, 16 (1987) 131

Culling efficiency—sows

Sow culling: reasons for and effect on productivity, 6 (1979) 167

Reproductive lifetime of sows in relation to economy of production, 6 (1979) 179

Sow replacement: a comparison of farmers' actual decisions and model recommendations, 23 (1989) 207

Culling rate—sows

Changes in productivity and culling rate according to pregnancy, feed intake and litter parity, 17 (1987) 247

Cytoplasmic inheritance

Maternal effects due to cytoplasmic inheritance in dairy cattle. Influence on milk production and reproduction traits, 15 (1986) 11

Data collection

Data standards for computer systems in livestock recording for dairy herd management, 10 (1983) 419

Integrated data acquisition, transmission and processing systems in two pig breeding schemes in the Federal Republic of Germany, 12 (1985) 13

Dentition—goats and sheep

Age at permanent incisor eruption in indigenous goats and sheep in semi-arid Africa, 11 (1984) 451

Digestibility—dairy cows

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on milk production and whole tract digestibility in dairy cows, 17 (1987) 19

Digestibility—horses

Digestibility interactions between forages and concentrates in horses: influences of feeding level—comparison with sheep, 17 (1987) 263

Influence of level of feeding and physiological state on diet digestibility in light and heavy breed horses, 25 (1990) 257

Digestibility—pigs

Determination of ileal digestibility by shunt technique in the early-weaned pig: methodological aspects and utilisation of starch-rich diets, 20 (1988) 233

Between- and within-herd variation in the digestibility of feed for growing-finishing pigs, 23 (1989) 183

Variations among species of animals in response to the feeding of heat-processed beans (*Phaseolus vulgaris* L.). 1. Bean processing and effects on growth, digestibility and organ weights in piglets, 25 (1990) 121

Ileal and total digestibility studies in pigs fed molasses Type A or starch diets supplemented with torula yeast or soybean meal, 25 (1990) 151

Digestibility—poultry and rats

Variations among species of animals in response to the feeding of heat-processed beans (*Phaseolus vulgaris* L.). 2. Growth and organ weights of chickens and rats and digestibility for rats, 25 (1990) 137

Digestible protein system—ruminants

A new system for the protein feeding of ruminants: the PDI system, 6 (1979) 349

Digestion—cattle

Effects of level and diurnal variation of dietary concentrate on digestion and passage rate in beef steers, 13 (1985) 267

Changes in ruminal and intestinal digestion during and after weaning in dairy calves fed concentrate diets containing pea or soya-bean meal. 2. Amino acid composition and flow of duodenal and ileal digesta, and blood levels of free amino acids, 24 (1990) 129

Changes in ruminal and intestinal digestion during and after weaning in dairy calves fed concentrate diets containing pea or soya bean meal. 1. Digestion of organic matter and nitrogen, 24 (1990) 143

Digestion—pigs

Enzyme digestion in the proximal digestive tract of the pig: a review, 9 (1982) 581

The net energy value of diets for growth in pigs in relation to the fermentative processes in the digestive tract and the site of absorption of the nutrients, 10 (1983) 171

Digestion—ruminants

Recent informations on processing of grain for ruminants, 6 (1979) 335

Digestive system

Some views on the interaction between the gastro-intestinal microflora of animals and their diet, 6 (1979) 243

Digestive tract

Growth rate and pattern of gut development in mammals and birds, 11 (1984) 461

Effects of physiological state and body fatness on digestive-tract weight and composition in the dairy cow, 12 (1985) 379

Rate of passage of digesta during and after weaning in calves fed concentrate diets containing pea or soya-bean meal, 24 (1990) 333

Disease resistance

Investigations in farm animals of associations between the MHC system and disease resistance and fertility, 22 (1989) 49

Diseases and disorders cattle

Importance of claw quality in cattle: review and recommendations to achieve genetic improvement. Report of the E.A.A.P. Working Group on "Claw Quality in Cattle", 15 (1986) 133

Diseases and disorders cattle—bulls

A survey of the gametic products of Charolais bulls carrying an insertion in chromosome 16, 25 (1990) 61

Diseases and disorders cattle—calves

Etiology and predisposing factors in respiratory disease of milk-fattened veal calves, 3 (1976) 285

Management factors related to calf morbidity and mortality rates, 25 (1990) 79

Diseases and disorders cattle—dairy

Use of field records in breeding for mastitis resistance in dairy cattle, 5 (1978) 29

Genetic aspects of feet soundness in cattle, 8 (1981) 253

Indirect selection of bulls for improved resistance to diseases in dairy cattle, 8 (1981) 321

Genetic influence on clinical mastitis and its relationship with milk yield, season and stage of lactation, 11 (1984) 91

The effect of herd characteristics on claw disorders and claw measurements in Friesians, 15 (1986) 1

Genetic aspects of claw disorders, claw measurements and 'type' scores for feet in Friesian cattle, 15 (1986) 205

Inheritance of somatic cell count and its genetic relationship with milk yield in different parities, 18 (1988) 115

Factors affecting intervals between date of calving and incidence of health disorders in diseased dairy cows, 20 (1988) 203

Milk temperature fluctuations during milking in cows with subclinical mastitis, 20 (1988) 223

Analysis of relationships between veterinary recorded production diseases and milk production in dairy cows, 23 (1989) 67

Diseases and disorders pigs

Selection for haemoglobin level in piglets to develop an anemic-resistant line of swine, 5 (1978) 225

A study of air quality and respiratory infections in pigs raised in confinement, 9 (1982) 521

Methods of early recognition of puerperal and fertility disorders in the sow, 10 (1983) 253

Leg weakness and osteochondrosis in pigs; differences between the sexes of four breeds, 16 (1987) 65

The effect of different climatic environment on metabolism and its relation to time of *Haemophilus pleuropneumoniae* infection in pigs, 17 (1987) 365

Genetic control of front-leg weakness in Duroc swine. I. Direct response to five generations of divergent selection, 19 (1988) 459

Genetic control of front-leg weakness in Duroc swine. II. Correlated responses in growth rate, backfat and reproduction from five generations of divergent selection, 19 (1988) 473

Severity of osteochondrosis in three genetic lines of Duroc swine divergently selected for front-leg weakness, 19 (1988) 487

Diseases and disorders pigs—boars

Congenital defects inheritance of AI boars: genetic parameters and breeding value estimation procedures, 15 (1986) 337

Diseases and disorders pigs—piglets

Influence of season, litter size, parity, gestation length, birth weight, sex and farrowing pen on frequency of congenital splayleg in piglets, 21 (1989) 143

Diseases and disorders sheep

Review of genetic aspects of mineral metabolism with particular reference to copper in sheep, 6 (1979) 223

An assessment of genetical methods in the control of scrapie, 6 (1979) 233

Double muscling—cattle

Mating double-muscled and normal cattle for lean beef production, 21 (1989) 201

Dressage—horses

Estimation of the breeding value of stallions from the tournament performance of their offspring, 8 (1981) 465

Estimated parameters of performance in jumping and dressage competition of the Dutch Warmblood horse, 21 (1989) 333

Duroc pigs

Genetic control of front-leg weakness in Duroc swine. I. Direct response to five generations of divergent selection, 19 (1988) 459

Genetic control of front-leg weakness in Duroc swine. II. Correlated responses in growth

rate, backfat and reproduction from five generations of divergent selection, 19 (1988) 473

Severity of osteochondrosis in three genetic lines of Duroc swine divergently selected for front-leg weakness, 19 (1988) 487

Early lactation—cattle

Different energy and protein levels for dairy cows in the early weeks of lactation, 7 (1980) 555

Response of dairy cows to protein level in early lactation, 8 (1981) 21

Evaluation of energy requirements of beef cows during early lactation, 8 (1981) 139

The estimation of the energy value of liveweight change in the lactating dairy cow, 9 (1982) 665

Standard and lead feeding of dairy cows, 10 (1983) 443

Relationship between milk composition and some nutritional parameters in early lactation, 14 (1986) 239

Early weaned piglets

Effect of replacing barley with tapioca meal at two different levels of feeding on the growth and health of early weaned pigs, 2 (1975) 281

Housing and climatic conditions for early weaned piglets, 5 (1978) 71

Effects of environmental temperature on the growth rates of early-weaned piglets, 8 (1981) 75

Age at weaning, development of chemical body components, and energy utilization in piglets from 3–25 kg live weight, 9 (1982) 603

Effect of environmental temperature and feeding level on energy balance traits of early-weaned piglets, 9 (1982) 619

Growth rate and protein and fat gain in early-weaned piglets housed below thermoneutrality, 9 (1982) 731

The effect of various flooring materials on performance and foot health of early-weaned pigs, 13 (1985) 373

Effect of dietary energy level on the performance of individually housed early-weaned piglets in relation to environmental temperature, 14 (1986) 255

Efficiency—dairy cows

Main report—E.A.A.P. working group on: Efficiency of the dairy cow, 24 (1990) 287

Embryo manipulation

Biotechnical measures for improvement of fertility in cattle, 8 (1981) 215

New perspectives in animal breeding by embryo manipulations, 10 (1983) 215

Sexing bovine embryos with monoclonal antibodies against the H-Y antigen, 23 (1989) 1

Energy balance—cattle

The estimation of the energy value of liveweight change in the lactating dairy cow, 9 (1982) 665

Models for the prediction of food intake and energy balance in dairy cows, 10 (1983) 149

Relationship between milk composition and some nutritional parameters in early lactation, 14 (1986) 239

Energy balance—pigs

Energetic aspects of feed conversion in growing pigs, 7 (1980) 483

Effect of environmental temperature and feeding level on energy balance traits of early-weaned piglets, 9 (1982) 619

Maintenance requirement and the net energy value of different diets for growth in pigs, 10 (1983) 487

Energy intake—cattle

Energy intake and requirement of dairy cows during the whole year, 1 (1974) 21

Energy intake—pigs

The effect of daily energy intake on growth rate and composition of weight gain in pigs, 7 (1980) 79

Relationships between energy intake and protein and energy metabolism, growth and body composition of pigs kept at 14 or 32°C from 9 to 20 kg, 18 (1988) 289

Energy metabolism

The energetic efficiency of growth, 7 (1980) 243

Energy metabolism—cattle

Feed evaluation for dairy cows, 2 (1975) 95

Heart rate as a possible indicator of the energy metabolism of calves kept out-of-doors, 3 (1976) 333

Relation of the metabolisable energy intake of growing cattle to body weight, live weight gain and dry matter intake, 4 (1977) 277

Different energy and protein levels for dairy cows in the early weeks of lactation, 7 (1980) 555

Energy metabolism—non-ruminants

Factors influencing thermal losses in non-ruminants: a review, 8 (1981) 449

Energy metabolism—pigs

The net energy value of balanced diets for growing pigs, 8 (1982) 541

The net energy value of crude (catabolized) protein for growth in pigs, 9 (1982) 349

The metabolic body size of the growing pig, 9 (1982) 389

The net energy value of crude fat for growth in pigs, 9 (1982) 501

The influence of crude fibre from cereals on the net energy value of diets for growth in pigs, 9 (1982) 569

The influence of ground barley straw on the net energy value of diets for growth in pigs, 9 (1982) 717

Prediction of metabolizable energy for pigs on the basis of crude nutrients in the feeds, 11 (1984) 105

Metabolic utilization of energy and maintenance requirements in pregnant sows, 16 (1987) 243

Relationships between energy intake and protein and energy metabolism, growth and body composition of pigs kept at 14 or 32°C from 9 to 20 kg, 18 (1988) 289

Effect of ambient temperature and addition of straw or alfalfa in the diet on energy metabolism in pregnant sows, 21 (1989) 309

The effect of environmental temperature on metabolic rate and partitioning of energy intake in breeding boars, 23 (1989) 329

Energy metabolism—poultry

Energetic feed evaluation for poultry, 2 (1975) 109

Energy metabolism—ruminants

Feed evaluation for ruminants: new energy systems in The Netherlands, France and Switzerland, 5 (1978) 327

Feed evaluation for ruminants. I. The systems in use from May 1977 onwards in The Netherlands, 5 (1978) 331

Feed evaluation for ruminants. II. The new energy systems proposed in France, 5 (1978) 347

Feed evaluation of ruminants. III. Proposed application of the new system of energy evaluation in Switzerland, 5 (1978) 367

Energy metabolism—sheep

Efficiency of energy utilization in undernourished and realimented sheep, 7 (1980) 465

Energy requirements—cattle

Energy intake and requirement of dairy cows during the whole year, 1 (1974) 21

Evaluation of energy requirements of beef cows during early lactation, 8 (1981) 139

Energy requirements—horses

Energy requirements and the feeding of mares during lactation: a review, 20 (1988) 53

Energy requirements—pigs

Energy requirements of pigs during pregnancy: a review, 16 (1987) 75

Energy utilization—cattle

Holstein Friesians, Dutch Friesians and Dutch Red and Whites on two complete diets with a different amount of roughage: performance in first lactation, 11 (1984) 401

Holstein Friesians, Dutch Friesians and Dutch Red and Whites on two complete diets with a different amount of roughage: differences in performance between first and second lactation, 11 (1984) 417

Energy utilization—mice

Effect of selection for growth, body composition and food intake in mice: utilization of increased energy intake by "cafeteria" feeding, 24 (1990) 259

Energy utilization—pigs

Protein and energy retentions in pregnant and non-pregnant gilts. II. Energy retention, 7 (1980) 505

The net energy value of balanced diets for growing pigs, 8 (1982) 541

The net energy value of crude (catabolized) protein for growth in pigs, 9 (1982) 349

The net energy value of crude fat for growth in pigs, 9 (1982) 501

The influence of crude fibre from cereals on the net energy value of diets for growth in pigs, 9 (1982) 569

Age at weaning, development of chemical body components, and energy utilization in piglets from 3–25 kg live weight, 9 (1982) 603

The net energy value of diets for growth in pigs in relation to the fermentative processes in the digestive tract and the site of absorption of the nutrients, 10 (1983) 171

Maintenance requirement and the net energy value of different diets for growth in pigs, 10 (1983) 487

Prediction of metabolizable energy for pigs on the basis of crude nutrients in the feeds, 11 (1984) 105

Comparison of halothane-sensitive and halothane-resistant litter-mate pigs for growth, carcass composition, hormonal status and energy balance, 11 (1984) 303

Utilization of high fibre feeds and cereals by sows, a review, 16 (1987) 229

Environmental factors cattle

Etiology and predisposing factors in respiratory disease of milk-fattened veal calves, 3 (1976) 285

Estimation of breeding values of beef bulls—Hereford and Charolais—based on data from the field recording scheme in Sweden. I. Environmental effects on birth weight, 200-day weight and yearling weight, 5 (1978) 379

Seasonal modulation of puberty and the postpartum anestrus in cattle: a review, 12 (1985) 309

Non-genetic influences of performance testing of beef cattle, 16 (1987) 349

Cardio-respiratory activity in Zebu and their F_1 crosses with European breeds of dairy cattle at different ambient temperatures, 24 (1990) 119

Environmental factors goats

Physiological reactions of three breeds of goats to cold, heat and high altitude, 5 (1978) 57

Flavour of goat's milk: a review of studies on the sources of its variations, 6 (1979) 397

The inheritance of cashmere in Australian goats. 1. Characteristics of the base population and the effects of environmental factors, 21 (1989) 157

Environmental factors horses

Some interactions of season of foaling, photoperiod and ovarian activity in the equine, 10 (1983) 197

Environmental factors pigs—boars

The effect of high environmental temperatures on fattening performance and growth of boars, 3 (1976) 65

The effect of environmental temperature on metabolic rate and partitioning of energy intake in breeding boars, 23 (1989) 329

Environmental factors pigs—growing pigs

The assessment of thermal environment in relation to pig production, 2 (1975) 381

Rate of gain and carcass quality in fattening pigs at low ambient temperatures, 6 (1979) 51

A study of air quality and respiratory infections in pigs raised in confinement, 9 (1982) 521

Effect of season and environmental control on mortality and feed conversion of pigs, 11 (1984) 235

Effect of environmental temperature and dietary energy concentration on the performance and carcass characteristics of growing-finishing pigs fed to equal rate of gain, 17 (1987) 235

Influences of climatic treatments on systematic immunological parameters in pigs, 24 (1990) 249

Environmental factors pigs—piglets

Housing and climatic conditions for early weaned piglets, 5 (1978) 71

Effects of environmental temperature on the growth rates of early-weaned piglets, 8 (1981) 75

Effect of environmental temperature and feeding level on energy balance traits of early-weaned piglets, 9 (1982) 619

Growth rate and protein and fat gain in early-weaned piglets housed below thermoneutrality, 9 (1982) 731

Effect of dietary energy level on the performance of individually housed early-weaned piglets in relation to environmental temperature, 14 (1986) 255

Lasting effects of housing conditions after weaning on feed efficiency and carcass grades of growing-finishing pigs. An analysis of field data, 16 (1987) 175

The effect of different climatic environment on metabolism and its relation to time of

Haemophilus pleuropneumoniae infection in pigs, 17 (1987) 365

Relationships between energy intake and protein and energy metabolism, growth and body composition of pigs kept at 14 or 32°C from 9 to 20 kg, 18 (1988) 289

Influence of season, litter size, parity, gestation length, birth weight, sex and farrowing pen on frequency of congenital splayleg in piglets, 21 (1989) 143

Environmental factors pigs—sows

Effects of temperature and level of feeding during rearing on carcass and reproductive traits in pigs, 2 (1975) 247

Effects of air-conditioned versus naturally ventilated housing during hot weather on the reproductive efficiency of gilts or sows, 10 (1983) 387

Seasonal influence on fecundity and litter performance characteristics in Iberian pigs, 10 (1983) 601

Effect of ambient temperature and addition of straw or alfalfa in the diet on energy metabolism in pregnant sows, 21 (1989) 309

Influence of an extended photoperiod on sow and litter performance, 24 (1990) 83

Thermal microclimate in winter farrowing nests of free-ranging domestic pigs, 25 (1990) 177

Environmental factors ruminants

Effects of lighting pattern on growth, lactation and food intake of sheep, cattle and deer, 9 (1982) 361

Environmental factors sheep

Fertility in the ewe after artificial insemination with fresh and frozen semen at the induced oestrus, and influence of the photoperiod on the semen quality of the ram, 6 (1979) 153

Environmental and genetic factors influencing milk production and lamb output of Chios sheep, 8 (1982) 519

The influence of superior cervical sympathetic ganglionectomy on cycles of appetite and growth in Soay rams on a six-month photoperiod, 11 (1984) 529

Performance-related responses of lambs to changes in environmental temperature and daylength, 16 (1987) 37

Physiological response to climatic changes in Finnish Landrace ewes imported to Egypt and their half-sibs raised in Finland, 17 (1987) 179

Changes in size and shape with time of cross-bred West African hair sheep raised under tree-crop plantations, 21 (1989) 235

Improvement of the reproductive performance of Rasa Aragonesa flocks in frequent lambing systems. I. Effects of management system, age of ewe and season, 22 (1989) 69

An assessment of the interaction between photoperiod and sex phenotype in relation to appetite development in sheep, 22 (1989) 283

Factors affecting milk yield and prolificacy of Karagouniko sheep in West Thessaly (Greece), 24 (1990) 179

Enzymic activity—goats

Effect of Zn deficiency on serum vitamin A level, tissue enzymes and histological alterations in goats, 12 (1985) 69

Enzymic activity—pigs

Glutathione peroxidase activity in liver and kidney as indicator of selenium status in swine, 7 (1980) 175

Enzyme digestion in the proximal digestive tract of the pig: a review, 9 (1982) 581

The A-O and H blood group systems, some enzyme systems and halothane sensitivity of two divergent lines of Landrace pigs using index selection procedures, 10 (1983) 159

Biotin in swine production: a review, 14 (1986) 65

Anomalous tissue vitamin E distribution in stress-susceptible pigs after dietary vitamin E supplementation and effects on plasma pyruvate kinase and creatine kinase activities, 17 (1987) 169

Experimental design

Problems in experimental design for station and field experiments with growing pigs, 7 (1980) 525

Design and analysis of quantitative genetic experiments: a review with particular reference to pigs, 7 (1980) 539

Design of milk production trials, 16 (1987) 373

Exterior traits—pigs

Description and evaluation of a linear scoring system for exterior traits in pigs, 23 (1989) 163

Genetic parameters of fattening performance and exterior traits of boars tested in central stations, 24 (1990) 65

Fasting effects

The influence of preslaughter fasting on carcass and liver yield in pigs, 10 (1983) 273

The effects of fasting and transportation on beef cattle. 1. Acid-base-electrolyte balance and infrared heat loss of beef cattle, 20 (1988) 15

The effects of fasting and transportation on beef cattle. 2. Body component changes, carcass composition and meat quality, 20 (1988) 25

Fat quality—pigs

Meat and fat quality in boars, castrates and gilts, 16 (1987) 187

Fecundity—pigs

- Seasonal influence on fecundity and litter performance characteristics in Iberian pigs, 10 (1983) 601

Fecundity—sheep

- Effects of active immunization against androstenedione on ovulation rate and fecundity in Galway and Finnish Landrace sheep, 15 (1986) 27

Feed additives

- Use of feed additives in E.A.A.P. member countries—a survey, 5 (1978) 237

- A review of ten years of experience in feed additives in pig diets on large-scale farms in Yugoslavia, 6 (1979) 61

- Les additifs en nutrition animale. Effets sur l'homme, les animaux et l'environnement, 6 (1979) 67

- Effect of monensin on rumen fermentation, performance and body composition of growing bulls, 8 (1982) 479

- The pantothenic acid status of pigs fed diets containing 200 mg copper per kg, 9 (1982) 591

- The effects of restricted floor space allowance and virginiamycin supplementation on the feedlot performance of swine, 10 (1983) 397

- Panthonenic acid status of pigs fed diets containing maize oil, with and without 200 mg copper per kg diet, 12 (1985) 265

- Selenium-vitamin E supplementation and production efficiency in ewes marginally deficient in selenium, 14 (1986) 149

- Influence of the gut flora and of some growth-promoting feed additives on nitrogen metabolism in pigs. I. Studies in vitro, 14 (1986) 161

- Influence of the gut flora and of some growth-promoting feed additives on nitrogen metabolism in pigs. II. Studies in vivo, 14 (1986) 177

- Anomalous tissue vitamin E distribution in stress-susceptible pigs after dietary vitamin E supplementation and effects on plasma pyruvate kinase and creatine kinase activities, 17 (1987) 169

- Effect of ascorbic acid supplementation on performance and foot-leg traits in swine, 17 (1987) 277

Feed efficiency

- Les additifs en nutrition animale. Effets sur l'homme, les animaux et l'environnement, 6 (1979) 67

- Growth rate and pattern of gut development in mammals and birds, 11 (1984) 461

Feed efficiency cattle

- The influence of slaughter weight and level of feeding on growth rate, feed conversion and carcass composition of bulls, 2 (1975) 341

Feed efficiency cattle—beef

- Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows. III. Daily gain, feed conversion and carcass quality of intensively fed young bulls, 4 (1977) 19

- Effect of level of feeding on growth, reproductive performance and milk production of beef females, 5 (1978) 159

- Variation of meat production capacity in cattle due to genotype and level of feeding: genotype-nutrition interaction, 6 (1979) 263

- The effect of straw-bedded loose houses or tie stalls on the performances of finishing bulls, 6 (1979) 369

- Effect of monensin on rumen fermentation, performance and body composition of growing bulls, 8 (1982) 479

- The influence of energy level, weight at slaughter and castration on growth and feed efficiency in cattle, 11 (1984) 559

Feed efficiency cattle—calves

Evaluation of rapeseed meal with low and high glucosinolates as a protein source in calf starters, 12 (1985) 131

Feed efficiency cattle—dairy

The economics of using artificially dried green crops in milk production, 2 (1975) 211

Genetic factors controlling feed efficiency in dairy cows, 13 (1985) 87

Genetic aspects of feed intake and feed efficiency in dairy cattle: a review, 20 (1988) 1

Parity effects on feed intake and feed efficiency in four dairy breeds fed ad libitum two different diets, 21 (1989) 115

Feed efficiency goats

Effect of feeding methods and age at slaughter on growth performances and carcass characteristics of entire young male goats, 3 (1976) 183

Feed efficiency mice

Effect of selection for growth, body composition and food intake in mice: utilization of increased energy intake by "cafeteria" feeding, 24 (1990) 259

Feed efficiency pigs—growing pigs

Fattening of young boars: quantification of negative and positive aspects, 1 (1974) 187

The chemical composition of the live-weight gain and the performance of growing pigs, 3 (1976) 257

Danish investigations concerning body composition of pigs in relation to nutrition, sex and slaughter weight, 3 (1976) 271

Pruteen, a new source of protein for growing pigs. I. Metabolic experiment: utilization of nitrogen, 4 (1977) 79

Pruteen, a new source of protein for growing pigs. II. Feeding trial: growth rate, feed utilization and carcass and meat quality, 4 (1977) 91

The effect of controlled growth rate on the performance of boars and on the odour of subcutaneous fat at 85 and 122 kg live weight, 7 (1980) 163

Energetic aspects of feed conversion in growing pigs, 7 (1980) 483

Effects of feeding level from 20 to 45 kg on the performance and carcass composition of pigs grown to 90 kg live weight, 10 (1983) 265

The effects of restricted floor space allowance and virginiamycin supplementation on the feedlot performance of swine, 10 (1983) 397

Effect of season and environmental control on mortality and feed conversion of pigs, 11 (1984) 235

Restriction of feed intake to optimize the overall performance and composition of pigs, 15 (1986) 353

Lasting effects of housing conditions after weaning on feed efficiency and carcass grades of growing-finishing pigs. An analysis of field data, 16 (1987) 175

Feed efficiency pigs—growing pigs and piglets

A review of ten years of experience in feed additives in pig diets on large-scale farms in Yugoslavia, 6 (1979) 61

Feed efficiency pigs—piglets

Effect of dietary energy level on the performance of individually housed early-weaned piglets in relation to environmental temperature, 14 (1986) 255

Feed efficiency pigs—sows

The effect of nutrition during the growing period and the oestrous cycle on the reproductive performance of the pig, 1 (1974) 7

An assessment of the most profitable length of lactation for producing piglets of 20 kg body weight, 5 (1978) 81

The effect of mating age on the reproductive performance, food utilisation and liveweight change of the female pig, 7 (1980) 67

Protein and energy retentions in pregnant and non-pregnant gilts. II. Energy retention, 7 (1980) 505

Feed efficiency sheep

Efficiency of energy utilization in undernourished and realimented sheep, 7 (1980) 465

Influence of metabolizable energy content of the diet and of feeding level on lamb performances. II. Utilization of metabolizable energy for growth and fattening, 9 (1982) 487

A novel approach to growth promotion using auto-immunisation against somatostatin. II. Effects on appetite, carcass composition and food utilisation in lambs, 10 (1983) 469

Feed evaluation

Feed evaluation and nutritional requirements, 1. Introduction, 19 (1988) 211

Feed evaluation—dairy cows

Feed evaluation for dairy cows, 2 (1975) 95

Feed evaluation for dairy cows: tests on the system proposed in the Netherlands, 4 (1977) 57

The efficiency of casein N utilization in dairy cows, 25 (1990) 67

Feed evaluation—farmed fish

Feed evaluation and nutritional requirements, 6. Farmed Atlantic salmon and rainbow trout, 19 (1988) 369

Feed evaluation—fur-bearing animals

Feed evaluation and nutritional requirements, 5. Fur-bearing animals, 19 (1988) 355

Feed evaluation—horses

Feed evaluation and nutritional requirements, 3. Non-ruminant herbivores; horses, 19 (1988) 279

Feed evaluation—pigs

Correlations of protein deposited in growing female pigs to ileal and faecal digestible crude protein and amino acids, 12 (1985) 145

Feed evaluation and nutritional requirements, 4. Pigs and poultry, 19 (1988) 299

Ileal and total digestibility studies in pigs fed molasses Type A or starch diets supplemented with torula yeast or soybean meal, 25 (1990) 151

Feed evaluation—poultry

Energetic feed evaluation for poultry, 2 (1975) 109

Feed evaluation and nutritional requirements, 4. Pigs and poultry, 19 (1988) 299

Feed evaluation—rabbits

Feed evaluation and nutritional requirements, 3. Non-ruminant herbivores; rabbits, 19 (1988) 289

Feed evaluation—ruminants

- Feed evaluation and nutritional requirements,
2. Ruminants, 19 (1988) 217

Feed evaluation methods—pigs

- Digestibility and availability of amino acids
from feedstuffs for pigs: a review, 9 (1982)
511

Feed evaluation methods—ruminants

- Nutritional principles and evaluation of by-
products, waste products and new feeds for
ruminants, 4 (1977) 165
- Estimation of digestibility, metabolizable en-
ergy and net energy of forage by a cellulase
method, 5 (1978) 373

Feed evaluation systems—pigs

- The net energy value of balanced diets for grow-
ing pigs, 8 (1982) 541

Feed evaluation systems—ruminants

- Feed evaluation for ruminants: new energy sys-
tems in The Netherlands, France and Switzer-
land, 5 (1978) 327
- Feed evaluation for ruminants. I. The systems
in use from May 1977 onwards in The Nether-
lands, 5 (1978) 331
- Feed evaluation for ruminants. II. The new en-
ergy systems proposed in France, 5 (1978) 347
- Feed evaluation of ruminants. III. Proposed ap-
plication of the new system of energy evalua-
tion in Switzerland, 5 (1978) 367
- A new system for the protein feeding of rumi-
nants: the PDI system, 6 (1979) 349
- Tests of 6 energy evaluation systems for dairy
cows, 9 (1982) 457

Feed intake—cattle

- Regulation of food intake in dairy cows in rela-
tion to milk production, 3 (1976) 115
- Physiological factors affecting the voluntary in-
take of feed by cows: a review, 3 (1976) 129
- Effect of silage:concentrate ratio on feed in-
take, growth rate and subsequent milk yield
of early calving heifers, 4 (1977) 313
- The role of conserved forages in the nutrition of
the dairy cow, 5 (1978) 45
- Effect of the level of feed intake on nitrogen
entering the small intestine of dairy cows, 6
(1979) 255
- Differences in feed intake between Holstein
Friesian, Dutch Red and White and Dutch
Friesian cattle, 7 (1980) 13
- Models for the prediction of food intake and
energy balance in dairy cows, 10 (1983) 149
- The effect on performance of different energy
concentrations in complete rations for first
lactation cows before and after calving, 10
(1983) 223
- The importance of roughage in the rearing pe-
riod on the feed intake and performance of
adult dairy cows, 11 (1984) 287
- Genetic aspects of feed intake and feed effi-
ciency in dairy cattle: a review, 20 (1988) 1
- The economic value of feed intake capacity of
dairy cows, 22 (1989) 269

- Feed intake and utilization of maize silage-based
complete diets by Australian Friesian cows
and heifers at various stages of lactation, 23
(1989) 275

Feed intake—pigs

- Dietary factors involved in feed intake regula-
tion in growing pigs: a review, 12 (1985) 339
- Voluntary feed intake by lactating sows, 12
(1985) 355
- Genetic variation and covariation in voluntary
feed intake in pig selection programmes, 12
(1985) 367

A refinement and evaluation of the isotope dilution method for estimating milk intake by piglets, 16 (1987) 163

Feed intake—ruminants

Effects of lighting pattern on growth, lactation and food intake of sheep, cattle and deer, 9 (1982) 361

An assessment of the interaction between photoperiod and sex phenotype in relation to appetite development in sheep, 22 (1989) 283

Feed temperature—cattle

Effects of the ingestion of warm, cold and frozen food on thermal balance in cattle, 23 (1989) 107

Feed utilization matrix

A methodology to complete a national feed utilisation matrix using European data, 19 (1988) 375

Feeding frequency—cattle

Influence of the composition of the ration and the feeding frequency on pH-regulation in the rumen and on feed intake in ruminants, 3 (1976) 103

Feeding level—cattle

The influence of energy level, weight at slaughter and castration on growth and feed efficiency in cattle, 11 (1984) 559

Influence of energy level, weight at slaughter and castration on carcass quality in cattle, 11 (1984) 571

Effects of level and diurnal variation of dietary concentrate on digestion and passage rate in beef steers, 13 (1985) 267

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on rumen fermentation in dairy cows, 15 (1986) 173

Early calving heifers versus maiden heifers for beef production from dairy herds. I. The effects of genotype (Friesian and Charolais \times Friesian) and two feeding levels in the rearing period on growth and carcass quality, 16 (1987) 1

Early calving heifers versus maiden heifers for beef production from dairy herds. II. Physico-chemical and sensorial characteristics of meat, 16 (1987) 21

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on milk production and whole tract digestibility in dairy cows, 17 (1987) 19

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on rumen ingesta quantity, composition and kinetics of ingesta turnover in dairy cows, 17 (1987) 37

The effect of level and distribution of concentrate supplementation on performance of dairy cows, 17 (1987) 117

Feeding level—horses

Digestibility interactions between forages and concentrates in horses: influences of feeding level—comparison with sheep, 17 (1987) 263

Feeding level—pigs

Effects of temperature and level of feeding during rearing on carcass and reproductive traits in pigs, 2 (1975) 247

Effect of replacing barley with tapioca meal at two different levels of feeding on the growth and health of early weaned pigs, 2 (1975) 281

Effect of environmental temperature and feeding level on energy balance traits of early-weaned piglets, 9 (1982) 619

Effects of feeding level from 20 to 45 kg on the performance and carcass composition of pigs grown to 90 kg live weight, 10 (1983) 265

Effect of feeding level on Ca, P, K and Na content in the bodies of growing boars and gilts, 14 (1986) 211

The chemical composition of fat tissues in the pig: effects of castration and feeding treatment, 15 (1986) 73

Changes in productivity and culling rate according to pregnancy feed intake and litter parity, 17 (1987) 247

Feeding level—sheep

Influence of metabolizable energy content of the diet and of feeding level on lamb performances. I. Growth and body composition, 9 (1982) 471

Influence of metabolizable energy content of the diet and of feeding level on lamb performances. II. Utilization of metabolizable energy for growth and fattening, 9 (1982) 487

Factors affecting milk yield and prolificacy of Karagouniko sheep in West Thessaly (Greece), 24 (1990) 179

Feeding systems—cattle

Grassland systems for beef production from dairy bred and beef calves, 2 (1975) 121

The effect of turn-out to pasture on blood plasma iron concentrations in beef cattle, 10 (1983) 83

Pattern of milk intake as related to weaning traits of Angus calves grazing fescue-legume or fescue pastures, 10 (1983) 351

Standard and lead feeding of dairy cows, 10 (1983) 443

Complete diet feeding for cattle, 11 (1984) 269

Influence of transition feeding pattern on milk production at the turnout of cows to pasture, 20 (1988) 119

Feed intake and utilization of maize silage-based complete diets by Australian Friesian cows and heifers at various stages of lactation, 23 (1989) 275

Pregnancy rate, calf mortality and calving date in unsupplemented Hereford range cows, 23 (1989) 305

Feeding systems—pigs

Selection index for central test in Dutch pig herdbook breeding from 1984, 12 (1985) 85

Reproductive performance of first and second parity sows fed daily or every third day, 13 (1985) 179

Some aspects of the nutritional requirements of sows: their relevance in the development of a feeding strategy, 15 (1986) 39

Restriction of feed intake to optimize the overall performance and composition of pigs, 15 (1986) 353

Influence of postpartum feeding method on performance of the lactating sow, 16 (1987) 91

Joint effects of fraternity size, plane of nutrition and nursing schedule on pig growth from birth to 20 weeks of age, 18 (1988) 141

Effects of feed station design on the behaviour of group-housed sows using an electronic individual feeding system, 19 (1988) 511

Feeding systems—ruminants

Phosphorus in rangeland ruminant nutrition: a review, 7 (1980) 25

Feeding systems—sheep

Some aspects of the production of weaner sheep in the winter rainfall regions of Australia, 10 (1983) 239

Feeds livestock

- Impact of feed in livestock production, 19 (1988) 3
- Food waste disposal in Dutch livestock husbandry, 7 (1980) 39
- Feedstuffs, 1. Introduction, 19 (1988) 11
- Feedstuffs, 2. Forages, 19 (1988) 13
- Feedstuffs, 3. Cereals, pulses and oilseeds, 19 (1988) 47
- Feedstuffs, 4. Vegetable by-products of agro-industrial origin, 19 (1988) 97
- Feedstuffs, 5. Straw and other fibrous by-products, 19 (1988) 137
- Feedstuffs, 6. By-products of animal origin, 19 (1988) 159
- Feedstuffs, 7. Compound animal feed and feed additives, 19 (1988) 197
- Variations among species of animals in response to the feeding of heat-processed beans (*Phaseolus vulgaris* L.). 1. Bean processing and effects on growth, digestibility and organ weights in piglets, 25 (1990) 121
- Variations among species of animals in response to the feeding of heat-processed beans (*Phaseolus vulgaris* L.). 2. Growth and organ weights of chickens and rats and digestibility for rats, 25 (1990) 137

Feeds pigs

- Influence of methionine and palm oil supplementation of cassava flour-soybean meal diets on performance, nitrogen retention and rate of tissue deposition in weanling pigs, 11 (1984) 315

Feeds pigs—carbohydrates

- Effect of replacing barley with tapioca meal at two different levels of feeding on the growth and health of early weaned pigs, 2 (1975) 281
- Some effects on the growth and composition of the carcass of the bacon pig of feeding

micronized or ground maize or barley based diets to give three different digestible energy intakes, 4 (1977) 343

- The influence of crude fibre from cereals on the net energy value of diets for growth in pigs, 9 (1982) 569
- The influence of ground barley straw on the net energy value of diets for growth in pigs, 9 (1982) 717
- Utilization of high fibre feeds and cereals by sows, a review, 16 (1987) 229
- The effect of including various structural polysaccharides in pig diets on ileal and faecal digestibility of amino acids and minerals, 18 (1988) 157
- Effect of ambient temperature and addition of straw or alfalfa in the diet on energy metabolism in pregnant sows, 21 (1989) 309

Feeds pigs—fat

- The net energy value of crude fat for growth in pigs, 9 (1982) 501
- The influence of additional fat in the diet of sows before and after parturition on piglet viability and performance, 13 (1985) 191

Feeds pigs—protein and amino acids

- Effect of dietary horse beans (*Vicia faba*) on colostrum and milk composition and milk yield in sows, 1 (1974) 179
- Performance and blood plasma amino acid and urea concentrations in growing pigs given diets of cereals and groundnut meal and supplements with graded amounts of L-lysine, 1 (1974) 383
- Nitrogen balance in lactating sows fed on diets containing soybean oil meal or horsebean (*Vicia faba*) as a protein concentrate, 2 (1974) 147
- The net energy value of crude (catabolized) protein for growth in pigs, 9 (1982) 349

Correlations of protein deposited in growing female pigs to ileal and faecal digestible crude protein and amino acids, 12 (1985) 145

The effects of birth weight and dietary lysine between 21 and 84 days of age on the subsequent performance of pigs to 225 days of age, 17 (1987) 351

Feeds ruminants

Nutritional principles and evaluation of by-products, waste products and new feeds for ruminants, 4 (1977) 165

Recent informations on processing of grain for ruminants, 6 (1979) 335

Feeds ruminants—compound feeds

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on rumen fermentation in dairy cows, 15 (1986) 173

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on milk production and whole tract digestibility in dairy cows, 17 (1987) 19

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on rumen ingesta quantity, composition and kinetics of ingesta turnover in dairy cows, 17 (1987) 37

Feeds ruminants—forages

The economics of using artificially dried green crops in milk production, 2 (1975) 211

The role of conserved forages in the nutrition of the dairy cow, 5 (1978) 45

Dried beet pulp as energy source for intensive bull fattening, 5 (1978) 171

Feeds ruminants—protein sources

Studies on degradation and outflow rate of protein supplements in the rumen of sheep and cattle, 10 (1983) 17

Evaluation of rapeseed meal with low and high glucosinolates as a protein source in calf starters, 12 (1985) 131

Changes in ruminal and intestinal digestion during and after weaning in dairy calves fed concentrate diets containing pea or soya-bean meal. 2. Amino acid composition and flow of duodenal and ileal digesta, and blood levels of free amino acids, 24 (1990) 129

Changes in ruminal and intestinal digestion during and after weaning in dairy calves fed concentrate diets containing pea or soya bean meal. 1. Digestion of organic matter and nitrogen, 24 (1990) 143

Fertility cattle

Physiological impact on fertility in cattle, with special emphasis on assessment of the reproductive function by progesterone assay, 8 (1981) 233

Selection for fertility on the basis of AI data, 8 (1981) 247

Fertility cattle—beef

Pregnancy rate, calf mortality and calving date in unsupplemented Hereford range cows, 23 (1989) 305

Fertility cattle—dairy

A study of the influence of the energy and protein supply on the fertility of dairy cows, 4 (1977) 327

Genetic aspects of female fertility in dairy cattle, 8 (1981) 307

Genetic aspects of fertility in dairy cattle based on analysis of A.I. data—a review with emphasis on areas for further research, 12 (1985) 1

Sire effects on cow fertility and late embryonic mortality in the Montbeliard breed, 14 (1986) 139

Direct and maternal genetic parameters of fertility traits in Friesian cattle, 15 (1986) 153

Genetic relationships between fertility traits for dairy cows in different parities, 17 (1987) 337

Phenotypic and genetic association between fertility and production in dairy cows, 21 (1989) 1

Fertility horses

Effect of inbreeding on fertility in Norwegian trotter, 21 (1989) 263

Fertility livestock

Investigations in farm animals of associations between the MHC system and disease resistance and fertility, 22 (1989) 49

Fertility mice

Effects of selecting for litter size and body weight on the components of litter size in mice, 14 (1986) 195

Fertility pigs

The effect of mating age on the reproductive performance, food utilisation and liveweight change of the female pig, 7 (1980) 67

Some notes concerning the genetic possibilities of improving sow fertility, 8 (1981) 431

Some performance characteristics of prolific breeds of pigs in China, 10 (1983) 59

Effects of air-conditioned versus naturally ventilated housing during hot weather on the reproductive efficiency of gilts or sows, 10 (1983) 387

Selection for components of reproduction in swine, 11 (1984) 541

A note on the effect of the halothane-type of sows on lifetime prolificacy and litter parity at culling, 14 (1986) 205

Fertility sheep

Controlled breeding in sheep using the prostaglandin analogue, ICI 80996, 5 (1978) 313

Control of reproduction in adult ewes and ewe lambs, and estimation of reproductive wastage in ewe lambs following treatment with progestagen impregnated sponges and PMSG, 6 (1979) 295

The reproductive performance of Finn \times German Mutton Merino and purebred German Mutton Merino ewes, 7 (1980) 49

Regulation of puberty and reproduction in female lambs: a review, 8 (1981) 37

Natural factors affecting puberty and reproductive performance in ewe lambs: a review, 8 (1981) 55

Finnish landrace sheep

Productivity of pure Finnsheep in Finland and abroad, 4 (1977) 355

Physiological response to climatic changes in Finnish Landrace ewes imported to Egypt and their half-sibs raised in Finland, 17 (1987) 179

Fish—crossbreeding

Complete diallel cross between five strains of Atlantic salmon, 11 (1984) 207

Foetal death—ruminants

Interference of trophoblastin in ruminant embryonic mortality. A review, 17 (1987) 193

Follicle population dynamics—sheep

Follicle population dynamics in sheep with different ovulation rate potentials, 13 (1985) 21

Freezing techniques

Methods of conserving gametes and embryos of farm mammals, 11 (1984) 49

Gastro-intestinal cannulas

Replaceable gastro-intestinal cannulas for small ruminants and pigs, 11 (1984) 179

Genetic drift

Predicting the genetic drift in small populations, 13 (1985) 207

Genetic engineering

Methods and achievements of genetic engineering: prospects in agriculture. A review, 15 (1986) 109

Genetic evaluation methods

A review of theoretical aspects in the estimation of breeding values for multi-trait selection, 15 (1986) 299

A general approach to the use of multiple traits with repeated measurements in estimation of breeding values, 15 (1986) 315

Approximate accuracy of genetic evaluation under an animal model, 21 (1989) 87

Use of mixed-model methodology to improve estimation of crossbreeding parameters, 21 (1989) 101

Genetic evaluation methods—cattle

A note on two methods for estimation of genetic change in dairy cattle, 1 (1974) 47

Methods for measuring genetic progress in dairy traits, 1 (1974) 141

Conversions of breeding values for milk from foreign populations, 14 (1986) 223

A simulation study comparing methods of within-herd estimation of breeding values for dairy cows, 23 (1989) 239

Genetic evaluation methods—pigs

Congenital defects inheritance of AI boars: genetic parameters and breeding value estimation procedures, 15 (1986) 337

Effect of selection index versus mixed model methods of prediction of breeding value on response to selection in a simulated pig population, 20 (1988) 135

Genetic markers—pigs

Genetic variability expressed by marker-systems in two Belgian pig populations, 10 (1983) 386

Genetic parameters cattle

A genetic analysis of the concentrations of blood metabolites and their relationships with age and liveweight gain in young British Friesian bulls, 10 (1983) 1

A genetic analysis of performance and progeny test data for young bulls of Norwegian Red Cattle and various Friesian crosses, 10 (1983) 123

Genetic parameters cattle—beef and veal

Estimation of genetic parameters for beef traits from field data, 4 (1977) 1

- Estimation of breeding values of beef bulls—
Hereford and Charolais—based on data from
the field recording scheme in Sweden. II.
The relationship and the heritability of birth
weight, 200-day weight and yearling weight,
5 (1978) 393
- Performance testing of future A.I. bulls for
growth rate, feed efficiency and muscularity.
Genetic parameters, adjustment for system-
atic environmental factors, selection indices,
11 (1984) 475
- Breeding for veal production in Black and
White dairy cattle, 15 (1986) 325
- Phenotypic and genetic parameters of carcass
and meat-quality traits in cattle, 21 (1989)
35
- Breeding for veal and beef production in Dutch
Red and White cattle, 25 (1990) 183
- Genetic parameters cattle—calving**
- Calving performance in Danish breeds of dual
purpose cattle, 2 (1975) 51
- Calving performance and calf mortality, 3
(1976) 319
- Calving difficulties and perinatal mortality in
four daughter groups of MRY bulls, 5 (1978)
405
- Selection problems when antagonistic effects ex-
ist between production characteristics and
calving difficulties, 8 (1981) 291
- Genetic analyses of calving traits in the Swiss
Black and White, Braunvieh and Simmental
breeds by REML and MAPP procedures, 24
(1990) 93
- Genetic parameters cattle—dairy**
- Breeding for persistency of milk yield, 3 (1976)
27
- A simplified method of progeny testing A.I.
bulls for milk protein, 3 (1976) 33
- Phenotypic and genetic parameters of part lac-
tation milk and fat records in Polish Lowland
cattle, 6 (1979) 129
- Genetic parameters for days open, milk yield,
and fat and protein content of Swiss Braun-
vieh cows, 11 (1984) 261
- Genetic parameters for dairy production of Aus-
tralian Black and White cows, 12 (1985) 205
- Genetic factors controlling feed efficiency in
dairy cows, 13 (1985) 87
- A comparison of different measures of persis-
tency with special respect to variation of test-
day milk yields, 16 (1987) 305
- Efficiency of selection for different cumulative
milk, fat and protein yields in first lactation,
17 (1987) 211
- Effects of incomplete records on genetic param-
eters among cumulative yields in first lac-
tation and on extension of part lactations, 18
(1988) 19
- Estimation of genetic parameters for milk pro-
duction in the first three lactations, 20 (1988)
193
- Phenotypic and genetic association between fer-
tility and production in dairy cows, 21 (1989)
1
- Estimates of genetic parameters for first lac-
tation test day production of Australian Black
and White cows, 21 (1989) 177
- Genetic relationships between level of produc-
tion in different lactations, rate of maturity
and longevity in a dual purpose cattle popu-
lation, 23 (1989) 33
- Genetic parameters cattle—disease resis-
tance**
- Use of field records in breeding for mastitis re-
sistance in dairy cattle, 5 (1978) 29
- Genetic influence on clinical mastitis and its re-
lationship with milk yield, season and stage
of lactation, 11 (1984) 91
- Genetic analyses of nematode egg counts in
Hereford and crossbred Hereford cattle in the
subtropics of New South Wales, 12 (1985) 79
- Genetic aspects of claw disorders, claw measure-
ments and 'type' scores for feet in Friesian
cattle, 15 (1986) 205

Recording of production diseases in cattle and possibilities for genetic improvements: a review, 20 (1988) 89

Genetic parameters cattle—fertility

Genetic investigations on male and female fertility in cattle, 6 (1979) 325

Genetic effects on return intervals in cows, 7 (1980) 225

Inheritance of multiple births in cattle, 11 (1984) 373

Direct and maternal genetic parameters of fertility traits in Friesian cattle, 15 (1986) 153

Genetic analysis of some maternal reproductive traits in the Belgian Blue cattle breed, 23 (1989) 79

Estimates of heritability and repeatability for reproductive traits in Australian beef cattle, 25 (1990) 15

Genetic parameters cattle—management traits

Sire evaluation for milkability traits in Swiss Braunvieh, 13 (1985) 219

Genetic parameters of conformation traits in Norwegian Red Cattle estimated with a multiple trait model, 14 (1986) 335

Genetic parameters cattle—type traits

Restricted maximum likelihood (REML) estimation of genetic parameters for type traits in Normande cattle breed, 23 (1989) 47

Genetic parameters goats

Flavour of goat's milk: a review of studies on the sources of its variations, 6 (1979) 397

The inheritance of cashmere in Australian goats. 2. Genetic parameters and breeding values, 21 (1989) 251

Genetic parameters horses

Heritability of racing performance in thoroughbred horses, 1 (1974) 87

Genetical-statistical analysis of traits in the German trotter, 6 (1979) 407

Heritability of racing ability in thoroughbreds—a review, 7 (1980) 591

Estimation of the breeding value of stallions from the tournament performance of their offspring, 8 (1981) 465

Genetic selection indices for Swedish trotter broodmares, 8 (1982) 557

Estimated parameters of performance in jumping and dressage competition of the Dutch Warmblood horse, 21 (1989) 333

Genetic parameters mice

Investigation of a selection limit for litter size in mice, 20 (1988) 161

Genetic parameters pigs

Genetic variation and covariation in voluntary feed intake in pig selection programmes, 12 (1985) 367

Congenital defects inheritance of AI boars: genetic parameters and breeding value estimation procedures, 15 (1986) 337

A note on the genetics of aggressiveness of primiparous sows towards their piglets, 17 (1987) 161

Genetic parameters of fattening performance and exterior traits of boars tested in central stations, 24 (1990) 65

Genetic parameters pigs—fertility

Some notes concerning the genetic possibilities of improving sow fertility, 8 (1981) 431

Comparison of selection schemes for improving litter size in pigs—results of a simulation study, 8 (1982) 535

Genetic parameters pigs—meat quality

- Genetics of sex odour in boars, 1 (1974) 53
- The heritability of pH₁ in longissimus dorsi muscle in landrace and large white pigs, 2 (1975) 271

Genetic parameters sheep

- Genetic studies on carcass traits in Iceland twin ram lambs. I. Estimates of genetic parameters on carcass traits, live weight at weaning and carcass weight, 8 (1982) 489
- Environmental and genetic factors influencing milk production and lamb output of Chios sheep, 8 (1982) 519
- Improvement of the reproductive performance of Rasa Aragonesa flocks in frequent lambing systems. II. Repeatability and heritability of sexual precocity, fertility and litter size. Selection strategies, 22 (1989) 87

Genetic resources

- An alternative philosophy for livestock breeding, 8 (1981) 95
- Conservation of animal genetic resources in Europe. Final report of an E.A.A.P. Working Party, 11 (1984) 3
- Conservation of animal genetic resources—a review, 11 (1984) 23
- Genetic aspects of conservation in farm livestock, 11 (1984) 37
- Methods of conserving gametes and embryos of farm mammals, 11 (1984) 49
- Aspects of conservation of animal genetic resources—Italian experiences, 11 (1984) 61
- Genetic and economic differences among methods of gene conservation in farm animals, 11 (1984) 65

Genotype—cattle

- Early calving heifers versus maiden heifers for beef production from dairy herds. I. The effects of genotype (Friesian and Charolais × Friesian) and two feeding levels in the rearing period on growth and carcass quality, 16 (1987) 1
- Early calving heifers versus maiden heifers for beef production from dairy herds. II. Physico-chemical and sensorial characteristics of meat, 16 (1987) 21

Genotype—pigs

- Influence of farm management and breed type on sow's conception-weaning interval and productivity in France, 3 (1976) 75
- Meat quality of British crossbred pigs, 5 (1978) 265
- Meat and fat quality in boars, castrates and gilts, 16 (1987) 187
- Longevity and maternal productivity of F₁ crossbred Landrace sows managed in two different gestation systems, 19 (1988) 499

Genotype—environment interaction—cattle

- Variation of meat production capacity in cattle due to genotype and level of feeding: genotype-nutrition interaction, 6 (1979) 263
- Studies on sire × sex/environment interactions and their effect on response to selection in beef sires progeny-tested for fattening performance and carcass yield, 21 (1989) 287
- Dairy cattle crossbreeding in the tropics: the importance of genotype × environment interaction, 24 (1990) 109

Genotype—environment interaction—pigs

- The importance of selection criteria and feeding regimes in the selection and improvement of pigs, 5 (1978) 415

Genotype environment interaction in pig breeding programmes: methods of estimation and relevance of the estimates, 13 (1985) 135

Selection regime by production system interaction in pig improvement: a review of possible causes and solutions, 14 (1986) 41

Genotype \times environment interactions in pig breeding programmes. I. Central test, 14 (1986) 365

Genotype \times environment interactions in pig breeding programmes. II. Environmental effects and genetic parameters in central test, 16 (1987) 215

Genotype \times environment interactions in pig breeding programmes. III. Environmental effects and genetic parameters in on-farm test, 18 (1988) 129

Genotype \times environment interactions in pig breeding programmes. IV. Sire \times herd interaction in on-farm test results, 20 (1988) 325

Genotype \times environment interactions in pig breeding programmes. V. Genetic parameters and sire \times herd interaction in commercial fattening, 22 (1989) 99

Genotype \times environment interactions in pig breeding programmes. VI. Genetic relations between performances in central test, on-farm test and commercial fattening, 22 (1989) 325

Genotype-environment interaction—sheep

The significance of interactions in practical sheep breeding in northern Europe, 10 (1983) 39

Gestation period—horses

Length of gestation periods of horses and ponies belonging to different breeds, 7 (1980) 181

Glucosinates

Evaluation of rapeseed meal with low and high glucosinolates as a protein source in calf starters, 12 (1985) 131

Goats—breeds

Physiological reactions of three breeds of goats to cold, heat and high altitude, 5 (1978) 57

Physiological responses of Anglo-Nubian and Baladi goats and their crossbreds to water deprivation under sub-tropical conditions, 22 (1989) 295

Goats—feeding

Effect of feeding methods and age at slaughter on growth performances and carcass characteristics of entire young male goats, 3 (1976) 183

Nutrition and optimum performance of dairy goats, 5 (1978) 203

Goats—meat production

Standard methods and procedures for goat carcass evaluation, jointing and tissue separation, 17 (1987) 149

Goats—milk quality

Flavour of goat's milk: a review of studies on the sources of its variations, 6 (1979) 397

Goats—nutrition

Effect of Zn deficiency on serum vitamin A level, tissue enzymes and histological alterations in goats, 12 (1985) 69

Effect of lactation and of roughage to concentrate ratios on outflow rates of protein supplements from the rumen of sheep and goats, 24 (1990) 37

Goats—production

- The future of sheep and goat production, 1 (1974) 265
- The role of goats in the Mediterranean area, 10 (1983) 569

Goats—reproduction

- Evidence for different types of seasonal anoestrus in the dairy goat as revealed by progesterone determination in milk fat, 13 (1985) 71
- Possibilities for using bucks to stimulate ovarian and oestrous cycles in anovulatory goats—a review, 17 (1987) 135
- Livestock production in central Mali; reproductive components in traditionally-managed sheep and goats, 19 (1988) 523

Goats—selection

- Adjustment factors for growth characters of the Damascus goat, 10 (1983) 479
- The inheritance of cashmere in Australian goats. 1. Characteristics of the base population and the effects of environmental factors, 21 (1989) 157
- The inheritance of cashmere in Australian goats. 2. Genetic parameters and breeding values, 21 (1989) 251
- Effects of smoothing data on estimation of parameters for multiphasic lactation curves of dairy goats, 24 (1990) 205

Grassland management

- Grassland systems for beef production from dairy bred and beef calves, 2 (1975) 121
- The effect on wool production of changes in management designed to increase output in lamb from hill land in the United Kingdom, 3 (1976) 173
- The technical development of sheep production from hill land in Great Britain, 6 (1979) 379

Growth

- The energetic efficiency of growth, 7 (1980) 243
- Growth rate and pattern of gut development in mammals and birds, 11 (1984) 461
- Hormonal systems regulating growth. A review, 12 (1985) 31

Growth cattle

- Comparison of sire evaluation methods for carcass gain using field data, 4 (1977) 11
- Relation of the metabolisable energy intake of growing cattle to body weight, live weight gain and dry matter intake, 4 (1977) 277
- A genetic analysis of the concentrations of blood metabolites and their relationships with age and liveweight gain in young British Friesian bulls, 10 (1983) 1
- Growth of adipose tissue in cattle; partitioning between depots, chemical composition and cellularity. A review, 14 (1986) 349

Growth cattle—beef

- Effect of silage:concentrate ratio on feed intake, growth rate and subsequent milk yield of early calving heifers, 4 (1977) 313
- A review of central performance testing of beef bulls and of recent research in New Zealand, 5 (1978) 147
- The effects of slaughter age on growth and carcass traits in an intensively managed cross-bred beef herd, 9 (1982) 375
- The influence of energy level, weight at slaughter and castration on growth and feed efficiency in cattle, 11 (1984) 559
- Components of variance for growth traits among Zebu and South Devon beef cattle in southeastern Nigeria, 14 (1986) 231
- Early calving heifers versus maiden heifers for beef production from dairy herds. I. The effects of genotype (Friesian and Charolais \times Friesian) and two feeding levels in the

rearing period on growth and carcass quality, 16 (1987) 1

Relationships between breeding values for growth of beef sires in purebreeding and crossbreeding, 21 (1989) 275

Effects of oestradiol-17 β on growth and insulin-like growth factor I of steers on different pasture allowances, 21 (1989) 303

Intake, digestion and daily gain by cattle consuming bermudagrass hay and receiving concentrate supplements, 22 (1989) 255

Selection of low birth weight and high yearling weight in Angus beef cattle, 25 (1990) 31

Growth cattle—dairy

The effect on performance of different energy concentrations in complete rations for first lactation cows before and after calving, 10 (1983) 223

Holstein Friesians, Dutch Friesians and Dutch Red and Whites on two complete diets with a different amount of roughage: performance in first lactation, 11 (1984) 401

Holstein Friesians, Dutch Friesians and Dutch Red and Whites on two complete diets with a different amount of roughage: differences in performance between first and second lactation, 11 (1984) 417

Comparison of ten Friesian strains in Poland under field conditions. I. Strain comparison for growth rate, 18 (1988) 217

Growth pigs—boars

The effect of high environmental temperatures on fattening performance and growth of boars, 3 (1976) 65

The effect of controlled growth rate on the performance of boars and on the odour of subcutaneous fat at 85 and 122 kg live weight, 7 (1980) 163

Growth pigs—growing pigs

Performance and blood plasma amino acid and urea concentrations in growing pigs given diets of cereals and groundnut meal and supplements with graded amounts of L-lysine, 1 (1974) 383

Some effects on the growth and composition of the carcass of the bacon pig of feeding micronized or ground maize or barley based diets to give three different digestible energy intakes, 4 (1977) 343

Production characteristics of Dutch Landrace and Dutch Yorkshire pigs as related to their susceptibility for the halothane-induced malignant hyperthermia syndrome, 5 (1978) 277

Rate of gain and carcass quality in fattening pigs at low ambient temperatures, 6 (1979) 51

Estimates of costs and returns of selecting pigs on growth rate and backfat thickness, 7 (1980) 135

The composition of adipose tissue and its usefulness as a parameter for carcass composition in growing pigs, 7 (1980) 291

Energetic aspects of feed conversion in growing pigs, 7 (1980) 483

Problems in experimental design for station and field experiments with growing pigs, 7 (1980) 525

Content and retention of calcium phosphorus, potassium and sodium in the bodies of growing gilts, 9 (1982) 399

Restriction of feed intake to optimize the overall performance and composition of pigs, 15 (1986) 353

The effects of birth weight and dietary lysine between 21 and 84 days of age on the subsequent performance of pigs to 225 days of age, 17 (1987) 351

Growth and carcass quality of crossbred pigs sired by Duroc, Landrace and Large White boars, 18 (1988) 275

Growth pigs—piglets

Retarded growth in Hampshire piglets, 2 (1975) 69

Effects of environmental temperature on the growth rates of early-weaned piglets, 8 (1981) 75

Growth rate and protein and fat gain in early-weaned piglets housed below thermoneutrality, 9 (1982) 731

Influence of methionine and palm oil supplementation of cassava flour—soybean meal diets on performance, nitrogen retention and rate of tissue deposition in weanling pigs, 11 (1984) 315

Joint effects of fraternity size, plane of nutrition and nursing schedule on pig growth from birth to 20 weeks of age, 18 (1988) 141

Relationships between energy intake and protein and energy metabolism, growth and body composition of pigs kept at 14 or 32°C from 9 to 20 kg, 18 (1988) 289

Growth pigs—sows

The partition of body weight gain in the pregnant sow, 11 (1984) 517

Growth promoters

A novel approach to growth promotion using auto-immunisation against somatostatin. I. Effects on growth and hormone levels in lambs, 10 (1983) 25

A novel approach to growth promotion using auto-immunisation against somatostatin. II. Effects on appetite, carcass composition and food utilisation in lambs, 10 (1983) 469

A novel approach to growth promotion using autoimmunization against somatostatin. III. Effects in a commercial breed of sheep, 13 (1985) 43

The effect of a β -agonist (clenbuterol) on the heart rate, nitrogen balance and some carcass characteristics of veal calves, 15 (1986) 289

The effect of treatment of dairy cows of different breeds with recombinantly derived bovine somatotropin in a sustained-delivery vehicle, 21 (1989) 13

Effects of oestradiol-17 β on growth and insulin-like growth factor I of steers on different pasture allowances, 21 (1989) 303

Impact of the potential use of bovine somatotropin on the efficiency of a conventional dairy cattle breeding scheme, 22 (1989) 31

A farm-level analysis of short-term selective yield enhancing measures in milk production—the example of bovine somatotropin (bST), 25 (1990) 43

Growth rabbits

Development of commercial characteristics of rabbit carcasses during growth, 15 (1986) 271

Growth recording—beef cattle

Estimation of breeding values of beef bulls—Hereford and Charolais—based on data from the field recording scheme in Sweden. I. Environmental effects on birth weight, 200-day weight and yearling weight, 5 (1978) 379

Estimation of breeding values of beef bulls—Hereford and Charolais—based on data from the field recording scheme in Sweden. II. The relationship and the heritability of birth weight, 200-day weight and yearling weight, 5 (1978) 393

Growth recording—goats

Adjustment factors for growth characters of the Damascus goat, 10 (1983) 479

Growth recording—sheep

Adjustment factors for growth traits of Chios sheep, 19 (1988) 409

Growth sheep

Results of a crossbreeding experiment with sheep for different systems of fat lamb production. II. Growth and carcass traits, 2 (1975) 179

Influence of metabolizable energy content of the diet and of feeding level on lamb performances. I. Growth and body composition, 9 (1982) 471

A novel approach to growth promotion using auto-immunisation against somatostatin. I. Effects on growth and hormone levels in lambs, 10 (1983) 25

A novel approach to growth promotion using autoimmunization against somatostatin. III. Effects in a commercial breed of sheep, 13 (1985) 43

Hair sheep crossbreds

Changes in size and shape with time of crossbred West African hair sheep raised under tree-crop plantations, 21 (1989) 235

Halothane genotype

Performance of Dutch Landrace pigs with different genotypes for the halothane-induced malignant hyperthermia syndrome, 7 (1980) 317

Halothane sensitivity

Production characteristics of Dutch Landrace and Dutch Yorkshire pigs as related to their susceptibility for the halothane-induced malignant hyperthermia syndrome, 5 (1978) 277

Halothane-induced malignant hyperthermia in Irish pig breeds, 7 (1980) 147

Association between susceptibility to the malignant hyperthermia syndrome (MHS) and *H* blood types in Danish Landrace pigs explained by linkage disequilibrium, 7 (1980) 155

The physiological reaction of halothane tested pigs to treadmill exercise, and to slaughter, 7 (1980) 473

The A-O and H blood group systems, some enzyme systems and halothane sensitivity of two divergent lines of Landrace pigs using index selection procedures, 10 (1983) 159

Changes in the phenotype for halothane sensitivity in pigs, 10 (1983) 365

Comparison of halothane-sensitive and halothane-resistant litter-mate pigs for growth, carcass composition, hormonal status and energy balance, 11 (1984) 303

Effect of stress susceptibility on some reproductive traits in Belgian Landrace pigs, 13 (1985) 279

A note on the effect of the halothane-type of sows on lifetime prolificacy and litter parity at culling, 14 (1986) 205

Anomalous tissue vitamin E distribution in stress-susceptible pigs after dietary vitamin E supplementation and effects on plasma pyruvate kinase and creatine kinase activities, 17 (1987) 169

Meat quality as influenced by halothane sensitivity and ultimate pH in three porcine breeds, 18 (1988) 171

Vitamin E and vitamin C supplementation and stress-susceptible pigs: effects of halothane and pharmacologically induced muscle contractions, 22 (1989) 341

Halothane testing

Results of halothane testing in offspring of Dutch Landrace A.I. boars of different halothane phenotypes, 7 (1980) 283

Hampshire piglets

Retarded growth in Hampshire piglets, 2 (1975) 69

Heart rate—calves

Heart rate as a possible indicator of the energy metabolism of calves kept out-of-doors, 3 (1976) 333

Herbivores—nutrition

Separation and retrograde transport in the large intestine of herbivores, 8 (1981) 351

Heterosis

Quantitative analysis of components of hybridization, 9 (1982) 639

Two breeding schemes for estimation of heterosis and recombination effects, 11 (1984) 227

Heterosis in *Bos taurus* × *Bos indicus* crosses, 12 (1985) 299

Heterosis for milk production traits by crossing Red Danish, Finnish Ayrshire and Holstein-Friesian cattle, 23 (1989) 253

Hides and skins—sheep

Inheritance of colours, fur characteristics and skin quality traits in North European sheep breeds: a review, 10 (1983) 555

Hormonal regulation—growth

A novel approach to growth promotion using auto-immunisation against somatostatin. I. Effects on growth and hormone levels in lambs, 10 (1983) 25

Hormonal systems regulating growth. A review, 12 (1985) 31

Effects of a β -adrenoceptor agonist on growth performance, nitrogen balance, body composition and retention of nitrogen, fat and energy of finishing pigs during restricted and ad libitum feeding, 25 (1990) 231

Twenty-four hour profiles of growth hormone (GH) concentrations in mature female and entire male domestic pigs in comparison with mature wild boars (*Sus scrofa* L.), 25 (1990) 247

Hormonal regulation—metabolism

Hormonal regulation of metabolism in ruminants: a review, 14 (1986) 313

Hormonal regulation—reproduction

New trends in the control of reproduction in the bovine, 1 (1974) 117

Controlled breeding in sheep using the prostaglandin analogue, ICI 80996, 5 (1978) 313

Hormonal control of oestrous cycle in the ewe (a review), 6 (1979) 39

Fertility in the ewe after artificial insemination with fresh and frozen semen at the induced oestrus, and influence of the photoperiod on the semen quality of the ram, 6 (1979) 153

Control of reproduction in adult ewes and ewe lambs, and estimation of reproductive wastage in ewe lambs following treatment with progestagen impregnated sponges and PMSG, 6 (1979) 295

Regulation of puberty and reproduction in female lambs: a review, 8 (1981) 37

Biotechnical measures for improvement of fertility in cattle, 8 (1981) 215

The physiological responses of anovulatory ewes to the introduction of rams—a review, 15 (1986) 219

Interference of trophoblastin in ruminant embryonic mortality. A review, 17 (1987) 193

HCG-induced ovulation in two rabbit breeds: effects of dose, season and sexual behaviour, 20 (1988) 257

Horses—behaviour

Evidence of heredity of cribbing, weaving and stall-walking in Thoroughbred horses, 14 (1986) 91

Horses—blood groups

Blood groups in horses: current position (in French), 7 (1980) 89

Horses—breeding

Effect of inbreeding on fertility in Norwegian trotter, 21 (1989) 263

Horses—breeds

Length of gestation periods of horses and ponies belonging to different breeds, 7 (1980) 181

Horses—feeding

Energy requirements and the feeding of mares during lactation: a review, 20 (1988) 53

Influence of level of feeding and physiological state on diet digestibility in light and heavy breed horses, 25 (1990) 257

Horses—fertility

Fertilité des juments de pur sang élevées en Italie, 8 (1982) 567

Inbreeding and the inheritance of fertility in the thoroughbred mare, 9 (1982) 743

A note on the fertility and some demographical parameters of Icelandic toelter horses, 12 (1985) 161

Horses—milk production

Recent knowledge on mare milk production: a review, 22 (1989) 213

Composition of horse milk during the suckling period, 25 (1990) 163

Horses—nutrition

Digestibility interactions between forages and concentrates in horses: influences of feeding level—comparison with sheep, 17 (1987) 263

Horses—reproduction

Early pregnancy diagnosis in the mare by estimation of the level of progesterone in the peripheral blood, 1 (1974) 197

The use of a vasectomized stallion for heat detection in a herd of mares kept at liberty, 1 (1974) 219

Some interactions of season of foaling, photoperiod and ovarian activity in the equine, 10 (1983) 197

Horses—selection

Heritability of racing performance in thoroughbred horses, 1 (1974) 87

Interprétation statistique et génétique des gains des chevaux dans les compétition equestres françaises, 2 (1975) 191

Relative importance of performance tests and progeny tests in horse breeding, 5 (1978) 303

Genetical-statistical analysis of traits in the German trotter, 6 (1979) 407

Heritability of racing ability in thoroughbreds—a review, 7 (1980) 591

Results on a more objective measurement of performance traits of stallions in performance testing at station, 7 (1980) 607

Estimation of the breeding value of stallions from the tournament performance of their offspring, 8 (1981) 465

Genetic selection indices for Swedish trotter broodmares, 8 (1982) 557

Genetic problems in horse breeding, 10 (1983) 69

Contribution of various factors to genetic evaluations of stallions, 16 (1987) 407

Advantages of BLUP animal model for breeding value estimation in horses, 20 (1988) 149

Estimated parameters of performance in jumping and dressage competition of the Dutch Warmblood horse, 21 (1989) 333

Alternative selection strategies for performance of the Swedish warmblood horse, 24 (1990) 273

Housing—cattle

The effect of straw-bedded loose houses or tie stalls on the performances of finishing bulls, 6 (1979) 369

Effects of drinking water flow rates and social rank on performance and drinking behaviour of tied-up dairy cows, 11 (1984) 599

Housing—pigs

Effect of environmental design on the growth and behaviour of weaned pigs, 8 (1981) 367

A study of air quality and respiratory infections in pigs raised in confinement, 9 (1982) 521

Effects of air-conditioned versus naturally ventilated housing during hot weather on the reproductive efficiency of gilts or sows, 10 (1983) 387

The effects of restricted floor space allowance and virginiamycin supplementation on the feedlot performance of swine, 10 (1983) 397

The effect of various flooring materials on performance and foot health of early-weaned pigs, 13 (1985) 373

Lasting effects of housing conditions after weaning on feed efficiency and carcass grades of growing-finishing pigs. An analysis of field data, 16 (1987) 175

Longevity and maternal productivity of F₁ crossbred Landrace sows managed in two different gestation systems, 19 (1988) 499

Icelandic sheep

Reproductive efficiency of Iceland sheep, 5 (1978) 231

Icelandic toelter horses

A note on the fertility and some demographic parameters of Icelandic toelter horses, 12 (1985) 161

Identification—livestock

Use of microelectronics in animal breeding. Report of E.A.A.P. Working Party, 17 (1987) 293

Immunity

Genetic and environmental aspects of the immune response, 9 (1982) 537

Multigenic control of specific and non-specific immunity in mice. A review, 20 (1988) 277

Vitamin E and its role in the nutrition of the gilt and sow: a review, 24 (1990) 1

Influences of climatic treatments on systematic immunological parameters in pigs, 24 (1990) 249

Immunogenetics

An assessment of genetical methods in the control of scrape, 6 (1979) 233

Immunogenetics: a review and future prospects, 7 (1980) 1

Investigations in farm animals of associations between the MHC system and disease resistance and fertility, 22 (1989) 49

Immunogenetics—mice

Multigenic control of specific and non-specific immunity in mice. A review, 20 (1988) 277

Immunology

Application of monoclonal antibodies in animal production: a review, 18 (1988) 199

Immunology—sheep

Effects of active immunization against androstenedione on ovulation rate and fecundity in Galway and Finnish Landrace sheep, 15 (1986) 27

Inbreeding

A note on minimization of inbreeding in small-scale selection programmes, 20 (1988) 317

Effect of inbreeding on fertility in Norwegian trotter, 21 (1989) 263

Information processing

Use of microelectronics in animal breeding. Report of E.A.A.P. Working Party, 17 (1987) 293

Intensive livestock production

Intensive animal production and its interaction with human society in Sweden, 1 (1974) 207

Intensive animal production and health of animal and man, 1 (1974) 257

International cooperation

25 years European association for animal production. History of foundation, activities and objects, 1 (1974) 239

Institutional possibilities for improving co-operation in European animal production science, 2 (1976) 79

Computer programs for teaching animal breeding and genetics, 10 (1983) 589

Conservation of animal genetic resources in Europe. Final report of an E.A.A.P. Working Party, 11 (1984) 3

European Association for Animal Production: the first forty years, 22 (1989) 121

International cooperation—AI-bulls

AI bull evaluation standards for dairy and dual purpose breeds, 4 (1977) 115

Performance testing of bulls in AI: Report of a working group of the Commission on Cattle Production, 8 (1981) 101

International cooperation—beef

General recommendations on procedures for performance and progeny testing for beef characteristics, 1 (1974) 33

Manual on E.A.A.P. reference methods for the assessment of carcass characteristics in cattle, 1 (1974) 151

Beef production in the E.E.C. and the co-ordination of research by the Commission of the European Communities, 3 (1976) 305

Procedures for measuring meat quality characteristics in beef production experiments. Report of a Working Group in the Commission of the European Communities' (CEC) Beef Production Research Programme, 8 (1981) 385

Comparison of ultrasonic equipment for describing beef carcass characteristics in live

cattle. (Report on a joint ultrasonic trial carried out in the U.K. and Denmark.), 10 (1983) 133

Performance testing of bulls for efficiency and beef traits in dairy and dual-purpose cattle. Report of an E.A.A.P. Working Group, 20 (1988) 287

International cooperation—calving problems

Sire evaluation standards and breeding strategies for limiting dystocia and stillbirth. Report of an E.E.C./E.A.A.P. working group, 6 (1979) 111

International cooperation—cattle breed comparison

Recommended procedures for cattle breed comparison trials; a guideline prepared by a working party of the Commission for Cattle Production of the E.A.A.P., 5 (1978) 129

Testing of different strains of Friesian cattle in Poland. I. Milk performance of F_1 paternal Friesian strain crosses under intensive feeding conditions, 10 (1983) 109

Testing of different strains of Friesian cattle in Poland. II. Beef performance of male cross-breeds of different Friesian cattle strains under intensive feeding conditions, 12 (1985) 117

Testing of different strains of Friesian cattle in Poland. III. Milk performance of the strain backcrosses under intensive feeding conditions, 18 (1988) 101

Comparison of ten Friesian strains in Poland under field conditions. I. Strain comparison for growth rate, 18 (1988) 217

International cooperation—claw quality

Importance of claw quality in cattle: review and recommendations to achieve genetic improvement. Report of the E.A.A.P. Working Group on "Claw Quality in Cattle", 15 (1986) 133

Claw traits in cattle breeding programs: reports of the E.A.A.P. working group "Claw Quality in Cattle", 25 (1990) 1

International cooperation—dairy

General recommendations for the documentation of changes in dairy cattle populations and for estimating the expected genetic merit of bulls of various origins used on specific cow populations. Report of a working group of the E.A.A.P. commission on animal genetics, 10 (1983) 519

Main report—E.A.A.P. working group on: Efficiency of the dairy cow, 24 (1990) 287

International cooperation—pigs

An international comparison of pig breeds using a common control stock, 2 (1975) 367

Sow and litter recording procedures. Report of a working party of the E.A.A.P. commission on pig production, 7 (1980) 393

Intestinal microorganisms

Some views on the interaction between the gastro-intestinal microflora of animals and their diet, 6 (1979) 243

Influence of the gut flora and of some growth-promoting feed additives on nitrogen metabolism in pigs. I. Studies in vitro, 14 (1986) 161

Influence of the gut flora and of some growth-promoting feed additives on nitrogen metabolism in pigs. II. Studies in vivo, 14 (1986) 177

Intragastric nutrition—cattle

Effects of stage of lactation on the response of dairy cows to abomasal infusions of casein, 15 (1986) 97

The effects of continuous or intermittent infusion of propionic acid on plasma insulin and milk yield in dairy cows nourished by intragastric infusion of nutrients, 16 (1987) 201

The efficiency of casein N utilization in dairy cows, 25 (1990) 67

Isotope dilution method

A refinement and evaluation of the isotope dilution method for estimating milk intake by piglets, 16 (1987) 163

Jumping

Interprétation statistique et génétique des gains des chevaux dans les compétition equestres françaises, 2 (1975) 191

Estimation of the breeding value of stallions from the tournament performance of their offspring, 8 (1981) 465

Estimated parameters of performance in jumping and dressage competition of the Dutch Warmblood horse, 21 (1989) 333

Laboratory animals selection—growth

Side effects of selection for growth in laboratory animals, 6 (1979) 93

Lactating mares

Energy requirements and the feeding of mares during lactation: a review, 20 (1988) 53

Lactating sows

Voluntary feed intake by lactating sows, 12 (1985) 355

Influence of postpartum feeding method on performance of the lactating sow, 16 (1987) 91

Lactation curves

Lactation curves of Friesian-Bunaji crosses in Nigeria, 8 (1981) 11

Pattern of milk intake as related to weaning traits of Angus calves grazing fescue-legume or fescue pastures, 10 (1983) 351

Comparison of different methods of predicting 305-day milk yield using means calculated from within-herd lactation curves, 17 (1987) 1

Lactation curves—goats

Effects of smoothing data on estimation of parameters for multiphasic lactation curves of dairy goats, 24 (1990) 205

Lactation length—sows

An assessment of the most profitable length of lactation for producing piglets of 20 kg body weight, 5 (1978) 81

Lactation persistency—cattle

Breeding for persistency of milk yield, 3 (1976) 27

A comparison of different measures of persistency with special respect to variation of test-day milk yields, 16 (1987) 305

Lactation production—cattle

Theoretical aspects of culling and selection in dairy cattle, 7 (1980) 213

Testing of different strains of Friesian cattle in Poland. I. Milk performance of F₁ paternal Friesian strain crosses under intensive feeding conditions, 10 (1983) 109

A comparison of Holstein Friesians, Dutch Friesians and Dutch Red and Whites. I. Production characteristics, 11 (1984) 69

- Holstein Friesians, Dutch Friesians and Dutch Red and Whites on two complete diets with a different amount of roughage: performance in first lactation, 11 (1984) 401
- Holstein Friesians, Dutch Friesians and Dutch Red and Whites on two complete diets with a different amount of roughage: differences in performance between first and second lactation, 11 (1984) 417
- Genetic parameters for dairy production of Australian Black and White cows, 12 (1985) 205
- Partitioning of herd, year and season variation in milk production, 16 (1987) 107
- Dairy sire evaluation fitting some of the herd-year-season effects as random, 16 (1987) 117
- Adjustment of lactation yield for age at calving in relation to level of production, 16 (1987) 321
- Comparison of different methods of predicting 305-day milk yield using means calculated from within-herd lactation curves, 17 (1987) 1
- Estimates of variances due to sire \times herd interactions and environmental covariances between paternal half-sibs for first lactation dairy production, 17 (1987) 95
- The effect of level and distribution of concentrate supplementation on performance of dairy cows, 17 (1987) 117
- Efficiency of selection for different cumulative milk, fat and protein yields in first lactation, 17 (1987) 211
- Comparison of proven sires from five Holstein-Friesian strains in high-yield Israeli dairy herds, 17 (1987) 305
- Effects of incomplete records on genetic parameters among cumulative yields in first lactation and on extension of part lactations, 18 (1988) 19
- Testing of different strains of Friesian cattle in Poland. III. Milk performance of the strain backcrosses under intensive feeding conditions, 18 (1988) 101
- Effect of sire of foetus on current and subsequent milk yield of the dam, 20 (1988) 107
- Crossbreeding effects between two Swedish dairy breeds for production traits, 20 (1988) 175
- Estimation of genetic parameters for milk production in the first three lactations, 20 (1988) 193
- Analysis of relationships between veterinary recorded production diseases and milk production in dairy cows, 23 (1989) 67
- International evaluation of Holstein-Friesian dairy sires from three countries, 24 (1990) 15
- Lactation production—cattle and buffaloes**
- Genetic environmental control of first-lactation milk yield in cows and buffaloes, 17 (1987) 225
- Lactobacillus acidophilus**
- Survival of orally administered *Lactobacillus* strains in the gut of cannulated pigs, 12 (1985) 279
- Lamb production**
- Results of a crossbreeding experiment with sheep for different systems of fat lamb production. I. Reproductive traits, 2 (1975) 167
- Results of a crossbreeding experiment with sheep for different systems of fat lamb production. II. Growth and carcass traits, 2 (1975) 179
- The effect on wool production of changes in management designed to increase output in lamb from hill land in the United Kingdom, 3 (1976) 173
- Productivity of crosses based on prolific breeds of sheep (Summarizing report), 4 (1977) 379
- Performance of Merinolandschaf and Bergschaf under an accelerated lambing system, 21 (1989) 131

Lambing frequency

Frequent lambing of sheep flocks in Spain: productivity and management consequences, 10 (1983) 49

Limb bone growth—cattle

Bovine metacarpal and metatarsal dimensions: comparison of Aberdeen-Angus and Charolais steers slaughtered at three percentages of mature cow weight, 9 (1982) 653

Limbs and claws—cattle

The effect of herd characteristics on claw disorders and claw measurements in Friesians, 15 (1986) 1

Genetic aspects of feet soundness in cattle, 8 (1981) 253

Claw measurements of young bulls at performance testing stations in Bavaria, 11 (1984) 587

Importance of claw quality in cattle: review and recommendations to achieve genetic improvement. Report of the E.A.A.P. Working Group on "Claw Quality in Cattle", 15 (1986) 133

Genetic aspects of claw disorders, claw measurements and 'type' scores for feet in Friesian cattle, 15 (1986) 205

Claw traits in cattle breeding programs: reports of the E.A.A.P. working group "Claw Quality in Cattle", 25 (1990) 1

Limbs and claws—pigs

The effect of various flooring materials on performance and foot health of early-weaned pigs, 13 (1985) 373

Foothold of sows on farrowing crate floors, 15 (1986) 191

Leg weakness and osteochondrosis in pigs; differences between the sexes of four breeds, 16 (1987) 65

Effect of ascorbic acid supplementation in performance and foot-leg traits in swine, 17 (1987) 277

Genetic control of front-leg weakness in Duroc swine. I. Direct response to five generations of divergent selection, 19 (1988) 459

Genetic control of front-leg weakness in Duroc swine. II. Correlated responses in growth rate, backfat and reproduction from five generations of divergent selection, 19 (1988) 473

Severity of osteochondrosis in three genetic lines of Duroc swine divergently selected for front-leg weakness, 19 (1988) 487

Influence of season, litter size, parity, gestation length, birth weight, sex and farrowing pen on frequency of congenital splayleg in piglets, 21 (1989) 143

Description and evaluation of a linear scoring system for exterior traits in pigs, 23 (1989) 163

Genetic parameters of fattening performance and exterior traits of boars tested in central stations, 24 (1990) 65

Linkage disequilibrium—pigs

Association between susceptibility to the malignant hyperthermia syndrome (MHS) and *H* blood types in Danish Landrace pigs explained by linkage disequilibrium, 7 (1980) 155

Lipid metabolism—pigs

In vitro studies on the synthesis of intramuscular fat in the longissimus dorsi muscle of pigs, 2 (1975) 59

Litter size—mice

Effects of selecting for litter size and body weight on the components of litter size in mice, 14 (1986) 195

Investigation of a selection limit for litter size in mice, 20 (1988) 161

Litter size—pigs

Comparison of selection schemes for improving litter size in pigs—results of a simulation study, 8 (1982) 535

Maternal influence mediated by litter size during the suckling period on reproduction traits in pigs, 13 (1985) 147

The implication of maternal effects for genetic improvement of litter size in pigs, 13 (1985) 159

Effect of stress susceptibility on some reproductive traits in Belgian Landrace pigs, 13 (1985) 279

Joint effects of fraternity size, plane of nutrition and nursing schedule on pig growth from birth to 20 weeks of age, 18 (1988) 141

Litter size—rabbits

Mixed model methodology for the estimation of genetic response to selection in litter size of rabbits, 21 (1989) 67

Litter size—sheep

The physiological basis for variation in ovulation rate and litter size in sheep: a review, 13 (1985) 3

Litter traits—pigs

The effect of age at first mating on litter characteristics in the native Nigerian pig, 8 (1981) 155

Seasonal influence on fecundity and litter performance characteristics in Iberian pigs, 10 (1983) 601

Influence of an extended photoperiod on sow and litter performance, 24 (1990) 83

Liver yield—pigs

The influence of preslaughter fasting on carcass and liver yield in pigs, 10 (1983) 273

Livestock breeding

Outlook on the future of animal breeding and genetics, 1 (1974) 247

An alternative philosophy for livestock breeding, 8 (1981) 95

Levels of investment in testing the genetic improvement of livestock, 8 (1981) 193

New perspectives in animal breeding by embryo manipulations, 10 (1983) 215

Livestock feeding

Use of feed additives in E.A.A.P. member countries—a survey, 5 (1978) 237

Food waste disposal in Dutch livestock husbandry, 7 (1980) 39

Impact of feed in livestock production, 19 (1988) 3

Livestock management

Use of microelectronics in animal breeding. Report of E.A.A.P. Working Party, 17 (1987) 293

Livestock nutrition

Current and future problems in animal nutrition research, 1 (1974) 253

Selected problems of B vitamins in animal nutrition, 4 (1977) 177

Les additifs en nutrition animale. Effets sur l'homme, les animaux et l'environnement, 6 (1979) 67

The energetic efficiency of growth, 7 (1980) 243

Replaceable gastro-intestinal cannulas for small ruminants and pigs, 11 (1984) 179

Livestock production science

25 years European association for animal production. History of foundation, activities and objects, 1 (1974) 239

Language barriers in livestock-husbandry research, 1 (1974) 421

Institutional possibilities for improving co-operation in European animal production science, 2 (1976) 79

Beef production in the E.E.C. and the co-ordination of research by the Commission of the European Communities, 3 (1976) 305

Computer programs for teaching animal breeding and genetics, 10 (1983) 589

General summary, 19 (1988) 389

Livestock selection

The influence of maternal effects on the efficiency of selection; a review, 8 (1981) 121

Physiological criteria and genetic selection, 8 (1981) 203

Loading density—pigs

Transport of pigs by car for two days; some aspects of watering and loading density, 13 (1985) 289

Lysine

Performance and blood plasma amino acid and urea concentrations in growing pigs given diets of cereals and groundnut meal and supplements with graded amounts of L-lysine, 1 (1974) 383

The effects of birth weight and dietary lysine between 21 and 84 days of age on the subsequent performance of pigs to 225 days of age, 17 (1987) 351

Lysine and threonine balance and requirements for weaned piglets 10–25 kg liveweight fed cereal-based diets, 23 (1989) 195

Management and health

Intensive animal production and its interaction with human society in Sweden, 1 (1974) 207

Intensive animal production and health of animal and man, 1 (1974) 257

Les additifs en nutrition animale. Effets sur l'homme, les animaux et l'environnement, 6 (1979) 67

Management and health—cattle

Energy intake and requirement of dairy cows during the whole year, 1 (1974) 21

Management traits in dairy cattle. Dystocia, udder characteristics related to production, and a review of other traits, 3 (1976) 13

Detection oestrus by measuring milk temperatures of dairy cows during milking, 3 (1976) 85

The potential uses of metabolic profiles in the management and selection of cattle for milk and beef production, 3 (1976) 239

Economic evaluation of replacement rates in dairy herds. I. Reduction of replacement rates through improved health, 6 (1979) 15

Problems of calf rearing in connection with their mortality and optimal growth: a review, 10 (1983) 339

Complete diet feeding for cattle, 11 (1984) 269

Beef production from a dairy farm: a linear programming simulation approach, 11 (1984) 503

An economic comparison of four insemination and culling policies in dairy herds, by method of stochastic simulation, 18 (1988) 239

Management and health—goats

The role of goats in the Mediterranean area, 10 (1983) 569

Management and health—pigs

Influence of farm management and breed type on sow's conception-weaning interval and productivity in France, 3 (1976) 75

Social hierarchy in suckling and fattening pigs: a review, 3 (1976) 363

Sow culling: reasons for and effect on productivity, 6 (1979) 167

Bulky feeds for pigs: a consideration of some non-nutritional aspects, 16 (1987) 395

Management and health—sheep

Model calculations on the economic efficiency of sheep production, 1 (1974) 67

British Sheep Production Economics, 1 (1974) 165

Frequent lambing of sheep flocks in Spain: productivity and management consequences, 10 (1983) 49

Some aspects of the production of weaner sheep in the winter rainfall regions of Australia, 10 (1983) 239

Means of assessing adequacy of nutrition of pregnant ewes, 11 (1984) 429

Review of physiological and anatomical factors influencing the milking ability of ewes and the organization of milking, 18 (1988) 253

Maternal effects

Problems in estimating maternal effects, 7 (1980) 405

The influence of maternal effects on the efficiency of selection; a review, 8 (1981) 121

Maternal effects—cattle

Aptitudes maternelles des races laitières, mixtes, rustiques et à viande pour la production de veaux de boucherie par croisement industriel, 2 (1975) 39

Calving performance and calf mortality, 3 (1976) 319

Selection problems when antagonistic effects exist between production characteristics and calving difficulties, 8 (1981) 291

Responses to sire selection for dystocia, 13 (1985) 251

Maternal effects due to cytoplasmic inheritance in dairy cattle. Influence on milk production and reproduction traits, 15 (1986) 11

Direct and maternal genetic parameters of fertility traits in Friesian cattle, 15 (1986) 153

Maternal effects—pigs

Maternal influence mediated by litter size during the suckling period on reproduction traits in pigs, 13 (1985) 147

The implication of maternal effects for genetic improvement of litter size in pigs, 13 (1985) 159

Maternal effects—sheep

First survey of results obtained in France on reproductive and maternal performance in sheep, with particular reference to the Romanov breed and crosses with it, 5 (1978) 181

Mating age—pigs

The effect of mating age on the reproductive performance, food utilisation and liveweight change of the female pig, 7 (1980) 67

The effect of age at first mating on litter characteristics in the native Nigerian pig, 8 (1981) 155

Mating system—sheep

The reproductive performance of a sheep flock on a mating schedule of three restricted periods per year, 13 (1985) 35

Meat production—cattle

Evaluation of cattle breeds for beef production in New Zealand—a review, 2 (1975) 327

The influence of slaughter weight and level of feeding of growth rate, feed conversion and carcass composition of bulls, 2 (1975) 341

Dried beet pulp as energy source for intensive bull fattening, 5 (1978) 171

Model calculations for the optimal planning of beef performance tests using German dual-purpose cattle population as an example, 13 (1985) 229

Meat production—goats

Effect of feeding methods and age at slaughter on growth performances and carcass characteristics of entire young male goats, 3 (1976) 183

Meat production—sheep

Experimental designs for building a synthetic dam line for meat production in sheep, 1 (1974) 77

Lamb production performance of 14 sire breeds mated to New Zealand Romney ewes, 2 (1975) 157

The indirect evaluation of sheep carcass composition in breeding schemes, population studies and experiments, 8 (1981) 263

Carcass and meat characteristics of crossbred lambs born to ewes of different genetic types and slaughtered at different weights, 12 (1985) 241

Selection indices for lean meat production in sheep, 21 (1989) 223

Meat production efficiency—cattle

The economic consequences of beef crossing in dual-purpose or dairy cattle populations, 1 (1974) 133

Beef production with maiden and once-calved heifers, 7 (1980) 121

Beef crossing with Dutch Friesian cows: model calculations on expected levels of calving difficulties and their consequences for profitability, 7 (1980) 419

Testing of different strains of Friesian cattle in Poland. II. Beef performance of male cross-breds of different Friesian cattle strains under intensive feeding conditions, 12 (1985) 117

Use of embryo transfer to produce twinning in beef cattle: postweaning performance of calves, 23 (1989) 295

Meat production efficiency—pigs

The effect of daily energy intake on growth rate and composition of weight gain in pigs, 7 (1980) 79

A model to estimate economic values of traits in pig breeding, 21 (1989) 49

Meat production efficiency—sheep

Model calculations on the economic efficiency of sheep production, 1 (1974) 67

British Sheep Production Economics, 1 (1974) 165

Effect on production and carcass quality characteristics of wether lambs of crossing Black-headed Mutton, Ile de France and Texel rams with Polish Merino ewes, 3 (1976) 343

Meat production traits—cattle

General recommendations on procedures for performance and progeny testing for beef characteristics, 1 (1974) 33

Breed and crossbreeding effects in a crossing experiment between Dutch Friesian and Holstein Friesian cattle, 7 (1980) 235

A comparison of Holstein Friesians, Dutch Friesians and Dutch Red and Whites. I. Production characteristics, 11 (1984) 69

A selection index for beef production capacity of performance-tested young bulls in A.I. in Dutch dual-purpose breeds, 11 (1984) 381

Performance testing of future A.I. bulls for growth rate, feed efficiency and muscularity. Genetic parameters, adjustment for systematic environmental factors, selection indices, 11 (1984) 475

Performance testing of bulls for efficiency and beef traits in dairy and dual-purpose cattle. Report of an E.A.A.P. Working Group, 20 (1988) 287

Mating double-musled and normal cattle for lean beef production, 21 (1989) 201

Studies on sire \times sex/environment interactions and their effect on response to selection in beef sires progeny-tested for fattening performance and carcass yield, 21 (1989) 287

Meat production traits—sheep

Direct, maternal and heterosis effects for slaughter and carcass characteristics in three breeds of fat tailed sheep, 23 (1989) 137

Meat quality—pigs

The heritability of pH₁ in longissimus dorsi muscle in landrace and large white pigs, 2 (1975) 271

Testing methods for PSE syndrome: current research in the U.K., 7 (1980) 305

Performance of Dutch Landrace pigs with different genotypes for the halothane-induced malignant hyperthermia syndrome, 7 (1980) 317

Testing methods for PSE syndrome: current research in Denmark, 7 (1980) 325

Parameters of meat quality and stress resistance of pigs, 7 (1980) 337

Meat quality traits—cattle

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows. IV.

Physical, chemical and palatability characteristics of longissimus dorsi and semitendinosus muscles from crossbred young bulls, 4 (1977) 31

Early calving heifers versus maiden heifers for beef production from dairy herds. II. Physico-chemical and sensorial characteristics of meat, 16 (1987) 21

The effects of fasting and transportation on beef cattle. 2. Body component changes, carcass composition and meat quality, 20 (1988) 25

Phenotypic and genetic parameters of carcass and meat-quality traits in cattle, 21 (1989) 35

Merino sheep

The influence of the Tasmanian Fine-Woolled Merino on carcass characteristics of lambs, 4 (1977) 191

Metabolic body size—pigs

The metabolic body size of the growing pig, 9 (1982) 389

Metabolic profiles—cattle

The potential uses of metabolic profiles in the management and selection of cattle for milk and beef production, 3 (1976) 239

Mice and rats—selection

Effects of selecting for litter size and body weight on the components of litter size in mice, 14 (1986) 195

Investigation of a selection limit for litter size in mice, 20 (1988) 161

Selection experiments for body composition in mice and rats: a review, 23 (1989) 17

Effect of selection for growth, body composition and food intake in mice: utilization of increased energy intake by "cafeteria" feeding, 24 (1990) 259

Milk production cattle—composition

- An economic evaluation of different selection alternatives as means for improvement of milk protein yield, 2 (1975) 221
- A simplified method of progeny testing A.I. bulls for milk protein, 3 (1976) 33
- Influence of the composition of the ration and the feeding frequency on pH-regulation in the rumen and on feed intake in ruminants, 3 (1976) 103
- Thyroxine degradation rate in young bulls of Danish dual-purpose breeds. Genetic relationship to weight gain, feed conversion and breeding value for butterfat production, 8 (1981) 399
- Genetic parameters for dairy production of Australian Black and White cows, 12 (1985) 205
- Relationship between milk composition and some nutritional parameters in early lactation, 14 (1986) 239
- Selection on fat and protein to maximise profit in dairy herds, 20 (1988) 299
- A review of the potential of nutrition to modify milk fat and protein, 23 (1989) 219

Milk production cattle—efficiency

- Comparison between conventional tie-barn and loose housing systems with respect to milk production, feed conversion and reproductive performance of dairy cows, 4 (1977) 69
- The performance of Jersey heifers and heifers of larger dairy breeds on two complete diets with different roughage contents, 14 (1986) 1
- A comparison of different measures of persistency with special respect to variation of test-day milk yields, 16 (1987) 305
- Part-lactation predictors of complete lactation milk-energy yield, food intake and food conversion efficiency, 17 (1987) 323
- The performance of Jersey cows and cows of larger dairy breeds on two complete diets with different roughage contents, 18 (1988) 1

Milk production cattle—production

- Effects of twinning on milk production in dairy cattle, 4 (1977) 255
- Nutrient requirements of the high yielding cow, 4 (1977) 263
- Effect of silage:concentrate ratio on feed intake, growth rate and subsequent milk yield of early calving heifers, 4 (1977) 313
- Effect of level of feeding on growth, reproductive performance and milk production of beef females, 5 (1978) 159
- Economic evaluation of replacement rates in dairy herds. II. Selection of cows during the first lactation, 6 (1979) 29
- Genetic influence on clinical mastitis and its relationship with milk yield, season and stage of lactation, 11 (1984) 91
- Relative merits of various *Bos taurus* dairy breeds for cross-breeding with *Bos indicus* cattle, 13 (1985) 351
- Conversions of breeding values for milk from foreign populations, 14 (1986) 223
- Effects of stage of lactation on the response of dairy cows to abomasal infusions of casein, 15 (1986) 97
- Design of milk production trials, 16 (1987) 373

Milk production cattle—production and composition

- Strain differences in milking performance, food consumption and body size amongst Friesian cattle in Danish test stations, 3 (1976) 165
- Breed and crossbreeding effects in a crossing experiment between Dutch Friesian and Holstein Friesian cattle, 7 (1980) 235
- The effect on performance of different energy concentrations in complete rations for first lactation cows before and after calving, 10 (1983) 223
- Genetic parameters for days open, milk yield, and fat and protein content of Swiss Braunvieh cows, 11 (1984) 261

Effects of drinking water temperatures on water intake and milk yield of tied-up dairy cows, 12 (1985) 329

The effects of continuous or intermittent infusion of propionic acid on plasma insulin and milk yield in dairy cows nourished by intra-gastric infusion of nutrients, 16 (1987) 201

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on milk production and whole tract digestibility in dairy cows, 17 (1987) 19

Influence of transition feeding pattern on milk production at the turnout of cows to pasture, 20 (1988) 119

Feed intake and utilization of maize silage-based complete diets by Australian Friesian cows and heifers at various stages of lactation, 23 (1989) 275

Milk production cattle—production traits

Management traits in dairy cattle. Dystocia, udder characteristics related to production, and a review of other traits, 3 (1976) 13

Heterosis in *Bos taurus* × *Bos indicus* crosses, 12 (1985) 299

Dairy cattle cross-breeding in the Tropics: performance of secondary cross-bred populations, 23 (1989) 97

Heterosis for milk production traits by crossing Red Danish, Finnish Ayrshire and Holstein-Friesian cattle, 23 (1989) 253

Milk production goats

Nutrition and optimum performance of dairy goats, 5 (1978) 203

Milk production horses

Recent knowledge on mare milk production: a review, 22 (1989) 213

Composition of horse milk during the suckling period, 25 (1990) 163

Milk production pigs

Effect of dietary horse beans (*Vicia faba*) on colostrum and milk composition and milk yield in sows, 1 (1974) 179

Milk production sheep

Environmental and genetic factors influencing milk production and lamb output of Chios sheep, 8 (1982) 519

Milk recording—cattle

Day-to-day variation in milk yield, fat content and protein content, 4 (1977) 141

Phenotypic and genetic parameters of part lactation milk and fat records in Polish Lowland cattle, 6 (1979) 129

Lactation curves of Friesian-Bunaji crosses in Nigeria, 8 (1981) 11

Scope for evaluating dairy sires using first and second lactation records, 10 (1983) 531

Partitioning of herd, year and season variation in milk production, 16 (1987) 107

Dairy sire evaluation fitting some of the herd-year-season effects as random, 16 (1987) 117

Adjustment of lactation yield for age at calving in relation to level of production, 16 (1987) 321

Adjustment of test-day milk, fat and protein yield for age, season and stage of lactation, 16 (1987) 335

Comparison of different methods of predicting 305-day milk yield using means calculated from within-herd lactation curves, 17 (1987) 1

Estimates of variances due to sire × herd interactions and environmental covariances between paternal half-sibs for first lactation dairy production, 17 (1987) 95

Efficiency of selection for different cumulative milk, fat and protein yields in first lactation, 17 (1987) 211

Effects of incomplete records on genetic parameters among cumulative yields in first lactation and on extension of part lactations, 18 (1988) 19

Estimates of genetic parameters for first lactation test day production of Australian Black and White cows, 21 (1989) 177

Milk recording—goats

Effects of smoothing data on estimation of parameters for multiphasic lactation curves of dairy goats, 24 (1990) 205

Milk recording systems—cattle

The use of prolonged intervals between milk weighings and butterfat tests in milk recording, 3 (1976) 155

Milk recording systems—sheep

Adaptation of the principles of selection for milk production to milking ewes: a review, 9 (1982) 549

Milk temperature

Detection oestrus by measuring milk temperatures of dairy cows during milking, 3 (1976) 85

Milk temperature fluctuations during milking in cows with subclinical mastitis, 20 (1988) 223

Milkability traits cattle

Sire evaluation for milkability traits in Swiss Braunvieh, 13 (1985) 219

Mineral content—pigs

Effect of feeding level on Ca, P, K and Na content in the bodies of growing boars and gilts, 14 (1986) 211

Mineral digestibility

The effect of including various structural polysaccharides in pig diets on ileal and faecal digestibility of amino acids and minerals, 18 (1988) 157

Mineral metabolism

Review of genetic aspects of mineral metabolism with particular reference to copper in sheep, 6 (1979) 223

Phosphorus in rangeland ruminant nutrition: a review, 7 (1980) 25

Glutathione peroxidase activity in liver and kidney as indicator of selenium status in swine, 7 (1980) 175

Copper in the nutrition of pigs and rabbits: a review, 7 (1980) 253

The role of sulphur in ruminant nutrition. A review, 11 (1984) 611

Effect of Zn deficiency on serum vitamin A level, tissue enzymes and histological alterations in goats, 12 (1985) 69

Effect of sodium and potassium level on the absorption of magnesium and other macro-minerals in sheep, 24 (1990) 223

Effect of sodium and potassium on overall digestibility of a semi-purified diet and microbial protein production in the rumen of sheep, 24 (1990) 347

Mineral requirements

Content and retention of calcium phosphorus, potassium and sodium in the bodies of growing gilts, 9 (1982) 399

A review of requirements of dairy and beef cattle for major elements, 10 (1983) 327

MOET

Breeding aspects of embryo transplantation utilized in the bull dam path within a dual-purpose cattle population, 4 (1977) 305

Monoclonal antibodies

Application of monoclonal antibodies in animal production: a review, 18 (1988) 199

Sexing bovine embryos with monoclonal antibodies against the H-Y antigen, 23 (1989) 1

Moose meat production

Commercial moose meat production in Sweden, 10 (1983) 507

Multiple births—cattle

Use of embryo transfer to produce twinning in beef cattle: postweaning performance of calves, 23 (1989) 295

Muscle properties—pigs

The pH₁ of longissimus dorsi muscle purebred and commercial pigs, 2 (1975) 261

The heritability of pH₁ in longissimus dorsi muscle in landrace and large white pigs, 2 (1975) 271

Meat quality of British crossbred pigs, 5 (1978) 265

Halothane-induced malignant hyperthermia in Irish pig breeds, 7 (1980) 147

Testing methods for PSE syndrome: current research in the U.K., 7 (1980) 305

Testing methods for PSE syndrome: current research in Denmark, 7 (1980) 325

Parameters of meat quality and stress resistance of pigs, 7 (1980) 337

Meat quality as influenced by halothane sensitivity and ultimate pH in three porcine breeds, 18 (1988) 171

Use of erythrocyte fragility and plasma CPK activity for the prediction of pork quality, 18 (1988) 187

Muscle properties—sheep

An attempt to correlate early muscle characteristics with carcass traits at slaughter in lambs, 11 (1984) 195

Nervous system—sheep

The influence of superior cervical sympathetic ganglionectomy on cycles of appetite and growth in Soay rams on a six-month photoperiod, 11 (1984) 529

Nitrogen balance

Nitrogen balance in lactating sows fed on diets containing soybean oil meal or horsebean (*Vicia faba*) as a protein concentrate, 2 (1974) 147

Influence of methionine and palm oil supplementation of cassava flour-soybean meal diets on performance, nitrogen retention and rate of tissue deposition in weanling pigs, 11 (1984) 315

The effect of a β -agonist (clenbuterol) on the heart rate, nitrogen balance and some carcass characteristics of veal calves, 15 (1986) 289

Nitrogen metabolism

Prediction of duodenal flow of non-ammonia nitrogen and amino acid nitrogen in dairy cows, 14 (1986) 29

Influence of the gut flora and of some growth-promoting feed additives on nitrogen metabolism in pigs. I. Studies in vitro, 14 (1986) 161

Influence of the gut flora and of some growth-promoting feed additives on nitrogen metabolism in pigs. II. Studies in vivo, 14 (1986) 177

Effects of a β -adrenoceptor agonist on growth performance, nitrogen balance, body composition and retention of nitrogen, fat and energy of finishing pigs during restricted and ad libitum feeding, 25 (1990) 231

Non-return rate—cattle

Genetic effects on return intervals in cows, 7 (1980) 225

Selection for fertility on the basis of AI data, 8 (1981) 247

Nurse cows

Comparison of two techniques for estimating the milk production of suckler cows, 6 (1979) 277

Evaluation of energy requirements of beef cows during early lactation, 8 (1981) 139

Productivity aspects of keeping dairy cow and calf together in the post-partum period, 16 (1987) 385

Nutrient balance—pigs

Dietary factors involved in feed intake regulation in growing pigs: a review, 12 (1985) 339

Protein and energy balance in pregnant gilts, 15 (1986) 249

The effect of pregnancy on protein, water and fat deposition in the body of gilts, 15 (1986) 261

Nutrient digestibility—pigs

Digestibility and absorption of nutrients as affected by fibre content in the diet of the pig. Quantitative aspects, 15 (1986) 53

Nutrient intake—ruminants

A study of the influence of the energy and protein supply on the fertility of dairy cows, 4 (1977) 327

A note on the relationship between the production rates of volatile fatty acids and their concentration, digestible organic matter and total digestible nutrient intake in buffalo calves, 5 (1978) 253

Nutrient transport

Separation and retrograde transport in the large intestine of herbivores, 8 (1981) 351

Nutritional requirements

Selected problems of B vitamins in animal nutrition, 4 (1977) 177

Nutrient requirements of the high yielding cow, 4 (1977) 263

Feed evaluation and nutritional requirements, 1. Introduction, 19 (1988) 211

Feed evaluation and nutritional requirements, 2. Ruminants, 19 (1988) 217

Feed evaluation and nutritional requirements, 3. Non-ruminant herbivores; horses, 19 (1988) 279

Feed evaluation and nutritional requirements, 3. Non-ruminant herbivores; rabbits, 19 (1988) 289

Feed evaluation and nutritional requirements, 4. Pigs and poultry, 19 (1988) 299

Feed evaluation and nutritional requirements, 5. Fur-bearing animals, 19 (1988) 355

Feed evaluation and nutritional requirements, 6. Farmed Atlantic salmon and rainbow trout, 19 (1988) 369

Oestrone excretion

Urinary oestrone concentration in relation to piglet viability, growth and mortality, 6 (1979) 313

Oestrous cycle

The reproductive performance of Finn x German Mutton Merino and purebred German Mutton Merino ewes, 7 (1980) 49

Some interactions of season of foaling, photoperiod and ovarian activity in the equine, 10 (1983) 197

Seasonal modulation of puberty and the postpartum anestrus in cattle: a review, 12 (1985) 309

Evidence for different types of seasonal anoestrus in the dairy goat as revealed by progesterone determination in milk fat, 13 (1985) 71

Oestrous detection

The use of a vasectomized stallion for heat detection in a herd of mares kept at liberty, 1 (1974) 219

Detection oestrus by measuring milk temperatures of dairy cows during milking, 3 (1976) 85

Oestrous induction—goats and sheep

The physiological responses of anovulatory ewes to the introduction of rams—a review, 15 (1986) 219

Possibilities for using bucks to stimulate ovarian and oestrous cycles in anovulatory goats—a review, 17 (1987) 135

Once-calved heifers

Beef production with maiden and once-calved heifers, 7 (1980) 121

Early calving heifers versus maiden heifers for beef production from dairy herds. I. The effects of genotype (Friesian and Charolais x Friesian) and two feeding levels in the rearing period on growth and carcass quality, 16 (1987) 1

Early calving heifers versus maiden heifers for beef production from dairy herds. II. Physico-chemical and sensorial characteristics of meat, 16 (1987) 21

Organoleptic properties

Consumer testing of pork and processed meat from boars: the influence of fat androstenone level, 9 (1982) 707

Consumer reactions to boar meat—a review, 10 (1983) 187

Carcass and meat characteristics of crossbred lambs born to ewes of different genetic types and slaughtered at different weights, 12 (1985) 241

Overlapping generations

Selection theory with overlapping generations, 6 (1979) 215

Ovulation

The physiological basis for variation in ovulation rate and litter size in sheep: a review, 13 (1985) 3

Follicle population dynamics in sheep with different ovulation rate potentials, 13 (1985) 21

Effects of active immunization against androstenedione on ovulation rate and fecundity in Galway and Finnish Landrace sheep, 15 (1986) 27

The genetic relationship between ovulation rate and testicular diameter in a random-breeding Merino flock, 18 (1988) 35

HCG-induced ovulation in two rabbit breeds: effects of dose, season and sexual behaviour, 20 (1988) 257

Parasites

Genetic analyses of nematode egg counts in Hereford and crossbred Hereford cattle in the subtropics of New South Wales, 12 (1985) 79

Current methods for estimating parasite populations: potential and limits to control gastrointestinal and pulmonary strongyles of sheep on pasture, 13 (1985) 53

Parity effects—cattle

Effects of isolating first-lactation cows from older cows, 6 (1979) 137

Genetic relationships between fertility traits for dairy cows in different parities, 17 (1987) 337

Inheritance of somatic cell count and its genetic relationship with milk yield in different parities, 18 (1988) 115

Estimation of genetic parameters for milk production in the first three lactations, 20 (1988) 193

Parity effects on feed intake and feed efficiency in four dairy breeds fed ad libitum two different diets, 21 (1989) 115

Genetic relationships between level of production in different lactations, rate of maturity and longevity in a dual purpose cattle population, 23 (1989) 33

Parturition—sheep

Prediction of the onset of parturition in sheep from observations of rectal temperature changes, 2 (1975) 393

Performance testing—cattle

A review of central performance testing of beef bulls and of recent research in New Zealand, 5 (1978) 147

Performance testing of bulls in AI: Report of a working group of the Commission on Cattle Production, 8 (1981) 101

Model calculations for the optimal planning of beef performance tests using German dual-purpose cattle population as an example, 13 (1985) 229

Non-genetic influences of performance testing of beef cattle, 16 (1987) 349

Performance testing of bulls for efficiency and beef traits in dairy and dual-purpose cattle. Report of an E.A.A.P. Working Group, 20 (1988) 287

Performance testing—horses

Results on a more objective measurement of performance traits of stallions in performance testing at station, 7 (1980) 607

Physiological functions

Physiological criteria and genetic selection, 8 (1981) 203

Physiological functions—buffaloes

Response of buffaloes to heavy working load under tropical conditions, 13 (1985) 199

Physiological functions—cattle

Regulation of food intake in dairy cows in relation to milk production, 3 (1976) 115

Physiological factors affecting the voluntary intake of feed by cows: a review, 3 (1976) 129

Physiological impact on fertility in cattle, with special emphasis on assessment of the reproductive function by progesterone assay, 8 (1981) 233

Genetic factors controlling feed efficiency in dairy cows, 13 (1985) 87

The physiological and behavioural responses of crossbred Friesian steers to short-haul transport by road, 17 (1987) 63

The effects of fasting and transportation on beef cattle. 1. Acid-base-electrolyte balance and infrared heat loss of beef cattle, 20 (1988) 15

Cardio-respiratory activity in Zebu and their F_1 crosses with European breeds of dairy cattle at different ambient temperatures, 24 (1990) 119

Physiological functions—goats

Physiological reactions of three breeds of goats to cold, heat and high altitude, 5 (1978) 57

Nutrition and optimum performance of dairy goats, 5 (1978) 203

Physiological functions—ruminants

Effects of lighting pattern on growth, lactation and food intake of sheep, cattle and deer, 9 (1982) 361

Physiological functions—sheep

The physiological basis for variation in ovulation rate and litter size in sheep: a review, 13 (1985) 3

Performance-related responses of lambs to changes in environmental temperature and daylength, 16 (1987) 37

Review of physiological and anatomical factors influencing the milking ability of ewes and the organization of milking, 18 (1988) 253

Physiological state—horses

Influence of level of feeding and physiological state on diet digestibility in light and heavy breed horses, 25 (1990) 257

Physiological state—sheep

The effect of physiological state on digestion in the ewe and its influence on the quantity of protein reaching the abomasum, 12 (1985) 59

Pigs—behaviour

Social hierarchy in suckling and fattening pigs: a review, 3 (1976) 363

A note on the genetics of aggressiveness of primiparous sows towards their piglets, 17 (1987) 161

Effects of feed station design on the behaviour of group-housed sows using an electronic individual feeding system, 19 (1988) 511

Pigs—boar taint

The effect of controlled growth rate on the performance of boars and on the odour of subcutaneous fat at 85 and 122 kg live weight, 7 (1980) 163

Pigs—body composition

The chemical composition of the live-weight gain and the performance of growing pigs, 3 (1976) 257

Partition of whole body protein in different body fractions and some constants in body composition in pigs, 20 (1988) 37

Pigs—breeding

Economic efficiency of pig breeding schemes: a breeding company view, 4 (1977) 245

Efficiency of breeding and utilisation of the gene pool in commercial pig production, 4 (1977) 291

Production characteristics of Dutch Landrace and Dutch Yorkshire pigs as related to their susceptibility for the haloethane-induced malignant hyperthermia syndrome, 5 (1978) 277

The importance of selection criteria and feeding regimes in the selection and improvement of pigs, 5 (1978) 415

Estimation of breeding value in pigs. Report of a working group of the commission on animal genetics, 7 (1980) 269

Integrated data acquisition, transmission and processing systems in two pig breeding schemes in the Federal Republic of Germany, 12 (1985) 13

Genotype environment interaction in pig breeding programmes: methods of estimation and relevance of the estimates, 13 (1985) 135

Selection regime by production system interaction in pig improvement: a review of possible causes and solutions, 14 (1986) 41

Genotype \times environment interactions in pig breeding programmes. I. Central test, 14 (1986) 365

Genotype \times environment interactions in pig breeding programmes. II. Environmental effects and genetic parameters in central test, 16 (1987) 215

Application of bending theory in a pig-breeding situation, 18 (1988) 85

Genotype \times environment interactions in pig breeding programmes. III. Environmental effects and genetic parameters in on-farm test, 18 (1988) 129

Genotype \times environment interactions in pig breeding programmes. IV. Sire \times herd interaction in on-farm test results, 20 (1988) 325

Genotype \times environment interactions in pig breeding programmes. V. Genetic parameters and sire \times herd interaction in commercial fattening, 22 (1989) 99

Genotype \times environment interactions in pig breeding programmes. VI. Genetic relations between performances in central test, on-farm test and commercial fattening, 22 (1989) 325

Pigs—breeding efficiency

Optimization of the selection in a closed line of pigs at a low level of inbreeding (in German), 3 (1976) 351

Pigs—breeds

Retarded growth in Hampshire piglets, 2 (1975) 69

An international comparison of pig breeds using a common control stock, 2 (1975) 367

Some performance characteristics of prolific breeds of pigs in China, 10 (1983) 59

Changes in the phenotype for halothane sensitivity in pigs, 10 (1983) 365

Twenty-four hour profiles of growth hormone (GH) concentrations in mature female and entire male domestic pigs in comparison with mature wild boars (*Sus scrofa* L.), 25 (1990) 247

Pigs—carcass composition

The composition of adipose tissue and its usefulness as a parameter for carcass composition in growing pigs, 7 (1980) 291

Development of automatic equipment for grading of pig carcasses in Denmark, 9 (1982) 675

Prediction of lean parts and carcass price from ultrasonic backfat measurements in live pigs, 14 (1986) 55

Pigs—carcass traits

Rate of gain and carcass quality in fattening pigs at low ambient temperatures, 6 (1979) 51

Effect of environmental temperature and dietary energy concentration on the performance and carcass characteristics of growing-finishing pigs fed to equal rate of gain, 17 (1987) 235

Prediction of carcass lean content from fat and muscle thickness measurements in Large White and Pietrain pigs, 21 (1989) 325

Pigs—congenital defects

Congenital defects inheritance of AI boars: genetic parameters and breeding value estimation procedures, 15 (1986) 337

Influence of season, litter size, parity, gestation length, birth weight, sex and farrowing pen

- on frequency of congenital splayleg in piglets, 21 (1989) 143

Pigs—crossbreeding

- The basis of crossbreeding in pigs; a review, 3 (1976) 203
- Economic aspects of the hybridisation programme in pig breeding in Czechoslovakia, 4 (1977) 217
- Performance of purebred Dutch Yorkshire boars versus crossbred (Belgian Landrace x Dutch Yorkshire) boars. A field trial, 16 (1987) 51
- Growth and carcass quality of crossbred pigs sired by Duroc, Landrace and Large White boars, 18 (1988) 275

Pigs—fat composition

- The chemical composition of fat tissues in the pig: effects of castration and feeding treatment, 15 (1986) 73
- Backfat composition in pigs: differences between fat thickness groups and sexes, 22 (1989) 351

Pigs—fertility

- Maternal influence mediated by litter size during the suckling period on reproduction traits in pigs, 13 (1985) 147
- The implication of maternal effects for genetic improvement of litter size in pigs, 13 (1985) 159
- Effect of stress susceptibility on some reproductive traits in Belgian Landrace pigs, 13 (1985) 279

Pigs—genetics

- Design and analysis of quantitative genetic experiments: a review with particular reference to pigs, 7 (1980) 539

Pigs—growth

- Effect of environmental design on the growth and behaviour of weaned pigs, 8 (1981) 367
- Effect of dietary energy level on the performance of individually housed early-weaned piglets in relation to environmental temperature, 14 (1986) 255
- Comparison of early castration at day 1, 7 or 14 on growth and carcass traits in swine, 20 (1988) 269
- Effects of a β -adrenoceptor agonist on growth performance, nitrogen balance, body composition and retention of nitrogen, fat and energy of finishing pigs during restricted and ad libitum feeding, 25 (1990) 231

Pigs—handling

- Recent developments in the handling and weighing of farm animals, 2 (1975) 289

Pigs—housing

- Housing and climatic conditions for early weaned piglets, 5 (1978) 71
- Effect of season and environmental control on mortality and feed conversion of pigs, 11 (1984) 235
- Foothold of sows on farrowing crate floors, 15 (1986) 191
- Initial test of a farrowing crate with inward-sloping sides, 20 (1988) 249

Pigs—immunology

- Immunization against 5 α -androstenone in boars, 12 (1985) 251

Pigs—intestinal microorganisms

- Survival of orally administered *Lactobacillus* strains in the gut of cannulated pigs, 12 (1985) 279

Pigs—management and health

- The effect of high environmental temperatures on fattening performance and growth of boars, 3 (1976) 65
- A study of air quality and respiratory infections in pigs raised in confinement, 9 (1982) 521
- Methods of early recognition of puerperal and fertility disorders in the sow, 10 (1983) 253
- The effect of various flooring materials on performance and foot health of early-weaned pigs, 13 (1985) 373
- Leg weakness and osteochondrosis in pigs; differences between the sexes of four breeds, 16 (1987) 65
- Lasting effects of housing conditions after weaning on feed efficiency and carcass grades of growing-finishing pigs. An analysis of field data, 16 (1987) 175
- The effect of different climatic environment on metabolism and its relation to time of *Haemophilus pleuropneumoniae* infection in pigs, 17 (1987) 365
- Sow replacement: a comparison of farmers' actual decisions and model recommendations, 23 (1989) 207
- Influences of climatic treatments on systematic immunological parameters in pigs, 24 (1990) 249
- Thermal microclimate in winter farrowing nests of free-ranging domestic pigs, 25 (1990) 177

Pigs—performance sows

- Influence of postpartum feeding method on performance of the lactating sow, 16 (1987) 91

Pigs—population structure

- Genetic variability expressed by marker-systems in two Belgian pig populations, 10 (1983) 386

Pigs—production

- Orientation on the future of pig production, 1 (1974) 269
- The assessment of thermal environment in relation to pig production, 2 (1975) 381
- Variation and trends in the weight and fat thickness of commercial British pigs, 5 (1978) 215
- The effects of restricted floor space allowance and virginiamycin supplementation on the feedlot performance of swine, 10 (1983) 397
- Comparison of halothane-sensitive and halothane-resistant litter-mate pigs for growth, carcass composition, hormonal status and energy balance, 11 (1984) 303

Pigs—productivity sows

- Influence of farm management and breed type on sow's conception-weaning interval and productivity in France, 3 (1976) 75
- An assessment of the most profitable length of lactation for producing piglets of 20 kg body weight, 5 (1978) 81
- Sow culling: reasons for and effect on productivity, 6 (1979) 167
- Reproductive lifetime of sows in relation to economy of production, 6 (1979) 179
- Sow and litter recording procedures. Report of a working party of the E.A.A.P. commission on pig production, 7 (1980) 393
- The behavioural response of sows to the presence of human beings and its relation to productivity, 8 (1981) 67
- Effects of air-conditioned versus naturally ventilated housing during hot weather on the reproductive efficiency of gilts or sows, 10 (1983) 387
- Biotin in swine production: a review, 14 (1986) 65
- A note on the effect of the halothane-type of sows on lifetime prolificacy and litter parity at culling, 14 (1986) 205

Changes in productivity and culling rate according to pregnancy feed intake and litter parity, 17 (1987) 247

Longevity and maternal productivity of F₁ crossbred Landrace sows managed in two different gestation systems, 19 (1988) 499

Influence of an extended photoperiod on sow and litter performance, 24 (1990) 83

Pigs—rearing

Effects of temperature and level of feeding during rearing on carcass and reproductive traits in pigs, 2 (1975) 247

Effects of environmental temperature on the growth rates of early-weaned piglets, 8 (1981) 75

The effects of birth weight and dietary lysine between 21 and 84 days of age on the subsequent performance of pigs to 225 days of age, 17 (1987) 351

Joint effects of fraternity size, plane of nutrition and nursing schedule on pig growth from birth to 20 weeks of age, 18 (1988) 141

Relationships between energy intake and protein and energy metabolism, growth and body composition of pigs kept at 14 or 32°C from 9 to 20 kg, 18 (1988) 289

Pigs—reproduction

The improvement of sow productivity, a review of recent experiments in France, 2 (1975) 235

Development of artificial insemination in pigs in E.A.A.P. countries, 5 (1978) 285

Boar sperm production: use in artificial insemination—a review, 5 (1978) 293

Urinary oestrone concentration in relation to piglet viability, growth and mortality, 6 (1979) 313

The effect of mating age on the reproductive performance, food utilisation and liveweight change of the female pig, 7 (1980) 67

The effect of age at first mating on litter characteristics in the native Nigerian pig, 8 (1981) 155

Seasonal influence on fecundity and litter performance characteristics in Iberian pigs, 10 (1983) 601

The partition of body weight gain in the pregnant sow, 11 (1984) 517

Pigs—transport

Transport of pigs by car for two days; some aspects of watering and loading density, 13 (1985) 289

Pigs feeding—growing pigs

Some effects on the growth and composition of the carcass of the bacon pig of feeding micronized or ground maize or barley based diets to give three different digestible energy intakes, 4 (1977) 343

The effect of daily energy intake on growth rate and composition of weight gain in pigs, 7 (1980) 79

Problems in experimental design for station and field experiments with growing pigs, 7 (1980) 525

Effects of feeding level from 20 to 45 kg on the performance and carcass composition of pigs grown to 90 kg live weight, 10 (1983) 265

The influence of preslaughter fasting on carcass and liver yield in pigs, 10 (1983) 273

Dietary factors involved in feed intake regulation in growing pigs: a review, 12 (1985) 339

Restriction of feed intake to optimize the overall performance and composition of pigs, 15 (1986) 353

A refinement and evaluation of the isotope dilution method for estimating milk intake by piglets, 16 (1987) 163

Bulky feeds for pigs: a consideration of some non-nutritional aspects, 16 (1987) 395

Effect of ascorbic acid supplementation in performance and foot-leg traits in swine, 17 (1987) 277

Vitamin E and vitamin C supplementation and stress-susceptible pigs: effects of halothane and pharmacologically induced muscle contractions, 22 (1989) 341

Pigs feeding—piglets

Effect of replacing barley with tapioca meal at two different levels of feeding on the growth and health of early weaned pigs, 2 (1975) 281

Pigs feeding—piglets and growing pigs

A review of ten years of experience in feed additives in pig diets on large-scale farms in Yugoslavia, 6 (1979) 61

Pigs feeding—sows

Effect of dietary horse beans (*Vicia faba*) on colostrum and milk composition and milk yield in sows, 1 (1974) 179

Voluntary feed intake by lactating sows, 12 (1985) 355

Reproductive performance of first and second parity sows fed daily or every third day, 13 (1985) 179

The influence of additional fat in the diet of sows before and after parturition on piglet viability and performance, 13 (1985) 191

Pigs meat quality—boars

Fattening of young boars: quantification of negative and positive aspects, 1 (1974) 187

Incidence of boar taint in Swedish Landrace and Yorkshire boars, 1 (1974) 411

Compounds responsible for boar taint, with special emphasis on androstenone: a review, 9 (1982) 687

Consumer testing of pork and processed meat from boars: the influence of fat androstenone level, 9 (1982) 707

Consumer reactions to boar meat—a review, 10 (1983) 187

The size of Cowper's (bulbo-urethral) glands as an estimate of boar taint on the slaughter line, 13 (1985) 169

Skatole, androstenone and taint in boars fed two different diets, 18 (1988) 55

Pigs meat quality—muscles

In vitro studies on the synthesis of intramuscular fat in the longissimus dorsi muscle of pigs, 2 (1975) 59

The pH₁ of longissimus dorsi muscle purebred and commercial pigs, 2 (1975) 261

Meat quality of British crossbred pigs, 5 (1978) 265

Halothane-induced malignant hyperthermia in Irish pig breeds, 7 (1980) 147

Association between susceptibility to the malignant hyperthermia syndrome (MHS) and H blood types in Danish Landrace pigs explained by linkage disequilibrium, 7 (1980) 155

Meat and fat quality in boars, castrates and gilts, 16 (1987) 187

Meat quality as influenced by halothane sensitivity and ultimate pH in three porcine breeds, 18 (1988) 171

Use of erythrocyte fragility and plasma CPK activity for the prediction of pork quality, 18 (1988) 187

Pigs nutrition

Copper in the nutrition of pigs and rabbits: a review, 7 (1980) 253

Evaluation of the background for determination of vitamin requirements in pigs, 7 (1980) 569

- Digestibility and availability of amino acids from feedstuffs for pigs: a review, 9 (1982) 511
- Enzyme digestion in the proximal digestive tract of the pig: a review, 9 (1982) 581
- The pantothenic acid status of pigs fed diets containing 200 mg copper per kg, 9 (1982) 591
- The net energy value of diets for growth in pigs in relation to the fermentative processes in the digestive tract and the site of absorption of the nutrients, 10 (1983) 171
- Prediction of metabolizable energy for pigs on the basis of crude nutrients in the feeds, 11 (1984) 105
- Panthonenic acid status of pigs fed diets containing maize oil, with and without 200 mg copper per kg diet, 12 (1985) 265
- Influence of the gut flora and of some growth-promoting feed additives on nitrogen metabolism in pigs. I. Studies in vitro, 14 (1986) 161
- Influence of the gut flora and of some growth-promoting feed additives on nitrogen metabolism in pigs. II. Studies in vivo, 14 (1986) 177
- Digestibility and absorption of nutrients as affected by fibre content in the diet of the pig. Quantitative aspects, 15 (1986) 53
- Digestibility of amino acids in swine: results and their practical applications. A review, 15 (1986) 367
- The effect of including various structural polysaccharides in pig diets on ileal and faecal digestibility of amino acids and minerals, 18 (1988) 157
- Determination of ileal digestibility by shunt technique in the early-weaned pig: methodological aspects and utilisation of starch-rich diets, 20 (1988) 233
- Synthesis and absorption of biotin in the large intestine of pigs, 25 (1990) 95
- Ileal and total digestibility studies in pigs fed molasses Type A or starch diets supplemented with torula yeast or soybean meal, 25 (1990) 151
- Pigs nutrition—boars**
- The effect of environmental temperature on metabolic rate and partitioning of energy intake in breeding boars, 23 (1989) 329
- Pigs nutrition—growing pigs**
- Performance and blood plasma amino acid and urea concentrations in growing pigs given diets of cereals and groundnut meal and supplements with graded amounts of L-lysine, 1 (1974) 383
- Pruteen, a new source of protein for growing pigs. I. Metabolic experiment: utilization of nitrogen, 4 (1977) 79
- Pruteen, a new source of protein for growing pigs. II. Feeding trial: growth rate, feed utilization and carcass and meat quality, 4 (1977) 91
- Glutathione peroxidase activity in liver and kidney as indicator of selenium status in swine, 7 (1980) 175
- Energetic aspects of feed conversion in growing pigs, 7 (1980) 483
- The net energy value of balanced diets for growing pigs, 8 (1982) 541
- The net energy value of crude (catabolized) protein for growth in pigs, 9 (1982) 349
- The metabolic body size of the growing pig, 9 (1982) 389
- Content and retention of calcium phosphorus, potassium and sodium in the bodies of growing gilts, 9 (1982) 399
- The net energy value of crude fat for growth in pigs, 9 (1982) 501
- The influence of crude fibre from cereals on the net energy value of diets for growth in pigs, 9 (1982) 569
- The influence of ground barley straw on the net energy value of diets for growth in pigs, 9 (1982) 717
- Maintenance requirement and the net energy value of different diets for growth in pigs, 10 (1983) 487

Correlations of protein deposited in growing female pigs to ileal and faecal digestible crude protein and amino acids, 12 (1985) 145

Effect of feeding level on Ca, P, K and Na content in the bodies of growing boars and gilts, 14 (1986) 211

Anomalous tissue vitamin E distribution in stress-susceptible pigs after dietary vitamin E supplementation and effects on plasma pyruvate kinase and creatine kinase activities, 17 (1987) 169

Between- and within-herd variation in the digestibility of feed for growing-finishing pigs, 23 (1989) 183

Studies on the threonine requirements of growing pigs based on the total, ileal and faecal digestible supply, 25 (1990) 105

Pigs nutrition—piglets

Age at weaning, development of chemical body components, and energy utilization in piglets from 3–25 kg live weight, 9 (1982) 603

Effect of environmental temperature and feeding level on energy balance traits of early-weaned piglets, 9 (1982) 619

Growth rate and protein and fat gain in early-weaned piglets housed below thermoneutrality, 9 (1982) 731

Influence of methionine and palm oil supplementation of cassava flour–soybean meal diets on performance, nitrogen retention and rate of tissue deposition in weanling pigs, 11 (1984) 315

Lysine and threonine balance and requirements for weaned piglets 10–25 kg liveweight fed cereal-based diets, 23 (1989) 195

Pigs nutrition—sows

The effect of nutrition during the growing period and the oestrous cycle on the reproductive performance of the pig, 1 (1974) 7

Nitrogen balance in lactating sows fed on diets containing soybean oil meal or horsebean

(*Vicia faba*) as a protein concentrate, 2 (1974) 147

Protein and energy retentions in pregnant and non-pregnant gilts. I. Protein retention, 7 (1980) 497

Protein and energy retentions in pregnant and non-pregnant gilts. II. Energy retention, 7 (1980) 505

Some aspects of the nutritional requirements of sows: their relevance in the development of a feeding strategy, 15 (1986) 39

Protein and energy balance in pregnant gilts, 15 (1986) 249

The effect of pregnancy on protein, water and fat deposition in the body of gilts, 15 (1986) 261

Energy requirements of pigs during pregnancy: a review, 16 (1987) 75

Utilization of high fibre feeds and cereals by sows, a review, 16 (1987) 229

Metabolic utilization of energy and maintenance requirements in pregnant sows, 16 (1987) 243

Effect of ambient temperature and addition of straw or alfalfa in the diet on energy metabolism in pregnant sows, 21 (1989) 309

Vitamin E and its role in the nutrition of the gilt and sow: a review, 24 (1990) 1

Pigs selection

Antagonistic traits in pig breeding, 8 (1981) 407

The A–O and H blood group systems, some enzyme systems and halothane sensitivity of two divergent lines of Landrace pigs using index selection procedures, 10 (1983) 159

Studies on breeding schemes in a closed pig population. I. Population size and selection intensities, 19 (1988) 417

Studies on breeding schemes in a closed pig population. II. Mating policy, 19 (1988) 443

Effect of selection index versus mixed model methods of prediction of breeding value on

response to selection in a simulated pig population, 20 (1988) 135

Optimal population size and sow/boar ratio in a closed dam line of pigs, 22 (1989) 305

Effects of family size in selection and testing in a closed dam line of pigs, 24 (1990) 47

Multi-stage selection in a closed dam line of pigs, 24 (1990) 159

Correlated response in reproduction, growth and composition to selection in gilts for extremes in age at puberty and backfat, 24 (1990) 237

Optimal use of nucleus and testing capacity in a pig breeding system with sire and dam lines, 25 (1990) 217

Pigs selection—disease resistance

Selection for haemoglobin level in piglets to develop an anemic-resistant line of swine, 5 (1978) 225

Genetic control of front-leg weakness in Duroc swine. I. Direct response to five generations of divergent selection, 19 (1988) 459

Genetic control of front-leg weakness in Duroc swine. II. Correlated responses in growth rate, backfat and reproduction from five generations of divergent selection, 19 (1988) 473

Severity of osteochondrosis in three genetic lines of Duroc swine divergently selected for front-leg weakness, 19 (1988) 487

Pigs selection—fertility

Some notes concerning the genetic possibilities of improving sow fertility, 8 (1981) 431

Comparison of selection schemes for improving litter size in pigs—results of a simulation study, 8 (1982) 535

Selection for components of reproduction in swine, 11 (1984) 541

Pigs selection—meat quality

Genetics of sex odour in boars, 1 (1974) 53

The heritability of pH₁ in longissimus dorsi muscle in landrace and large white pigs, 2 (1975) 271

Results of halothane testing in offspring of Dutch Landrace A.I. boars of different halothane phenotypes, 7 (1980) 283

Testing methods for PSE syndrome: current research in the U.K., 7 (1980) 305

Performance of Dutch Landrace pigs with different genotypes for the halothane-induced malignant hyperthermia syndrome, 7 (1980) 317

Testing methods for PSE syndrome: current research in Denmark, 7 (1980) 325

Parameters of meat quality and stress resistance of pigs, 7 (1980) 337

The physiological reaction of halothane tested pigs to treadmill exercise, and to slaughter, 7 (1980) 473

Pigs selection—production

Methods of pig improvement through breeding in the European countries; a review, 2 (1975) 1

Danish investigations concerning body composition of pigs in relation to nutrition, sex and slaughter weight, 3 (1976) 271

Economic efficiency of pig breeding schemes: aspects of a national two-breed programme, 4 (1977) 225

Estimated responses to eleven years of boar selection, 7 (1980) 57

Estimates of costs and returns of selecting pigs on growth rate and backfat thickness, 7 (1980) 135

Selection index for central test in Dutch pig herdbook breeding from 1984, 12 (1985) 85

Genetic variation and covariation in voluntary feed intake in pig selection programmes, 12 (1985) 367

A model to estimate economic values of traits in pig breeding, 21 (1989) 49

Description and evaluation of a linear scoring system for exterior traits in pigs, 23 (1989) 163

Genetic parameters of fattening performance and exterior traits of boars tested in central stations, 24 (1990) 65

Population size

Optimization of the selection in a closed line of pigs at a low level of inbreeding (in German), 3 (1976) 351

Predicting the genetic drift in small populations, 13 (1985) 207

Studies on breeding schemes in a closed pig population. I. Population size and selection intensities, 19 (1988) 417

Studies on breeding schemes in a closed pig population. II. Mating policy, 19 (1988) 443

A note on minimization of inbreeding in small-scale selection programmes, 20 (1988) 317

Optimal population size and sow/boar ratio in a closed dam line of pigs, 22 (1989) 305

Effects of family size in selection and testing in a closed dam line of pigs, 24 (1990) 47

Multi-stage selection in a closed dam line of pigs, 24 (1990) 159

Optimal use of nucleus and testing capacity in a pig breeding system with sire and dam lines, 25 (1990) 217

Poultry—nutrition

Energetic feed evaluation for poultry, 2 (1975) 109

Pregnancy—pigs

Protein and energy retentions in pregnant and non-pregnant gilts. I. Protein retention, 7 (1980) 497

Protein and energy retentions in pregnant and non-pregnant gilts. II. Energy retention, 7 (1980) 505

The partition of body weight gain in the pregnant sow, 11 (1984) 517

Protein and energy balance in pregnant gilts, 15 (1986) 249

The effect of pregnancy on protein, water and fat deposition in the body of gilts, 15 (1986) 261

Energy requirements of pigs during pregnancy: a review, 16 (1987) 75

Metabolic utilization of energy and maintenance requirements in pregnant sows, 16 (1987) 243

Pregnancy—sheep

Means of assessing adequacy of nutrition of pregnant ewes, 11 (1984) 429

Pregnancy diagnosis—horses

Early pregnancy diagnosis in the mare by estimation of the level of progesterone in the peripheral blood, 1 (1974) 197

Prenatal development—sheep

Prenatal growth and development in the sheep and its implications for the viability of the newborn lamb, 8 (1981) 273

Pricing systems

A comparison of Holstein Friesians, Dutch Friesians and Dutch Red and Whites. II. Economic synthesis with different pricing systems for milk and meat, 11 (1984) 83

Optimal selection responses under varying milk prices and margins for milk production, 14 (1986) 109

Production economics—cattle

A comparison of Holstein Friesians, Dutch Friesians and Dutch Red and Whites. II. Economic synthesis with different pricing systems for milk and meat, 11 (1984) 83

Studies on the replacement policies in dairy cattle. II. Optimum policy and influence of changes in production and prices, 13 (1985) 101

Studies on the replacement policies in dairy cattle. III. Influence of variation in reproduction and production, 13 (1985) 333

Studies on the replacement policies in dairy cattle. IV. Influence of seasonal variation in performance and prices, 14 (1986) 15

Optimal selection responses under varying milk prices and margins for milk production, 14 (1986) 109

A farm-level analysis of short-term selective yield enhancing measures in milk production—the example of bovine somatotropin (bST), 25 (1990) 43

Production recording—sheep

A review of sheep recording and evaluation of breeding animals in European countries: a group report, 7 (1980) 373

The value of multiple lamb weaning records in selection indices for Dorset sheep in Australia, 9 (1982) 561

Production recording—sows and litters

Sow and litter recording procedures. Report of a working party of the E.A.A.P. commission on pig production, 7 (1980) 393

Progeny testing—cattle

Statistical efficiency in bull progeny testing for calving difficulty, 3 (1976) 147

Comparison of several sire evaluation methods in dairy cattle breeding, 4 (1977) 129

Comments on statistical efficiency in bull progeny testing for calving difficulty, 4 (1977) 203

The value of daughters of bull dams in dairy cattle progeny testing schemes, 23 (1989) 267

Progesterone assay

Early pregnancy diagnosis in the mare by estimation of the level of progesterone in the peripheral blood, 1 (1974) 197

Physiological impact on fertility in cattle, with special emphasis on assessment of the reproductive function by progesterone assay, 8 (1981) 233

Evidence for different types of seasonal anoestrus in the dairy goat as revealed by progesterone determination in milk fat, 13 (1985) 71

Propionic acid

The effects of continuous or intermittent infusion of propionic acid on plasma insulin and milk yield in dairy cows nourished by intragastric infusion of nutrients, 16 (1987) 201

Protein metabolism

Aspects of protein metabolism and its control, 7 (1980) 111

Protein metabolism—pigs

Pruteen, a new source of protein for growing pigs. I. Metabolic experiment: utilization of nitrogen, 4 (1977) 79

Digestibility and availability of amino acids from feedstuffs for pigs: a review, 9 (1982) 511

Correlations of protein deposited in growing female pigs to ileal and faecal digestible crude protein and amino acids, 12 (1985) 145

Relationships between energy intake and protein and energy metabolism, growth and body composition of pigs kept at 14 or 32°C from 9 to 20 kg, 18 (1988) 289

Protein metabolism—ruminants

Effect of the level of feed intake on nitrogen entering the small intestine of dairy cows, 6 (1979) 255

Response of dairy cows to protein level in early lactation, 8 (1981) 21

Studies on degradation and outflow rate of protein supplements in the rumen of sheep and cattle, 10 (1983) 17

The effect of physiological state on digestion in the ewe and its influence on the quantity of protein reaching the abomasum, 12 (1985) 59

Effect of lactation and of roughage to concentrate ratios on outflow rates of protein supplements from the rumen of sheep and goats, 24 (1990) 37

Effect of sodium and potassium on overall digestibility of a semi-purified diet and microbial protein production in the rumen of sheep, 24 (1990) 347

The efficiency of casein N utilization in dairy cows, 25 (1990) 67

Protein requirements—cattle

Different energy and protein levels for dairy cows in the early weeks of lactation, 7 (1980) 555

Protein requirements—sheep

The application of modern concepts of ruminants and protein nutrition to sheep-production systems, 8 (1981) 339

Protein synthesis

The chemical composition of the live-weight gain and the performance of growing pigs, 3 (1976) 257

The energetic efficiency of growth, 7 (1980) 243

Protein and energy retentions in pregnant and non-pregnant gilts. I. Protein retention, 7 (1980) 497

Pruteen

Pruteen, a new source of protein for growing pigs. I. Metabolic experiment: utilization of nitrogen, 4 (1977) 79

Pruteen, a new source of protein for growing pigs. II. Feeding trial: growth rate, feed utilization and carcass and meat quality, 4 (1977) 91

Puberty

Regulation of puberty and reproduction in female lambs: a review, 8 (1981) 37

Natural factors affecting puberty and reproductive performance in ewe lambs: a review, 8 (1981) 55

Seasonal modulation of puberty and the post-partum anestrus in cattle: a review, 12 (1985) 309

Correlated response in reproduction, growth and composition to selection in gilts for extremes in age at puberty and backfat, 24 (1990) 237

Rabbits

Copper in the nutrition of pigs and rabbits: a review, 7 (1980) 253

Utilization of caecal digesta by caecotrophy (soft faeces ingestion) in the rabbit, 8 (1981) 361

Development of commercial characteristics of rabbit carcasses during growth, 15 (1986) 271

Optimum structure for genetic improvement of Angora rabbits, 18 (1988) 69

HCG-induced ovulation in two rabbit breeds: effects of dose, season and sexual behaviour, 20 (1988) 257

Mixed model methodology for the estimation of genetic response to selection in litter size of rabbits, 21 (1989) 67

Race horses

Heritability of racing ability in thoroughbreds—a review, 7 (1980) 591

Fertilité des juments de pur sang élevées en Italie, 8 (1982) 567

Advantages of BLUP animal model for breeding value estimation in horses, 20 (1988) 149

Racing performance

Heritability of racing performance in thoroughbred horses, 1 (1974) 87

Rations

Some views on the interaction between the gastro-intestinal microflora of animals and their diet, 6 (1979) 243

Rations pigs—energy concentration

Some effects on the growth and composition of the carcass of the bacon pig of feeding micronized or ground maize or barley based diets to give three different digestible energy intakes, 4 (1977) 343

The net energy value of balanced diets for growing pigs, 8 (1982) 541

The net energy value of diets for growth in pigs in relation to the fermentative processes in

the digestive tract and the site of absorption of the nutrients, 10 (1983) 171

Effect of dietary energy level on the performance of individually housed early-weaned piglets in relation to environmental temperature, 14 (1986) 255

Effect of environmental temperature and dietary energy concentration on the performance and carcass characteristics of growing-finishing pigs fed to equal rate of gain, 17 (1987) 235

Rations pigs—fibrous feedstuffs

Bulky feeds for pigs: a consideration of some non-nutritional aspects, 16 (1987) 395

Rations pigs—nutrient content

Maintenance requirement and the net energy value of different diets for growth in pigs, 10 (1983) 487

Prediction of metabolizable energy for pigs on the basis of crude nutrients in the feeds, 11 (1984) 105

Influence of methionine and palm oil supplementation of cassava flour-soybean meal diets on performance, nitrogen retention and rate of tissue deposition in weanling pigs, 11 (1984) 315

Skatole, androstenone and taint in boars fed two different diets, 18 (1988) 55

Ileal and total digestibility studies in pigs fed molasses Type A or starch diets supplemented with torula yeast or soybean meal, 25 (1990) 151

Rations ruminants—energy concentration

Influence of the composition of the ration and the feeding frequency on pH-regulation in the rumen and on feed intake in ruminants, 3 (1976) 103

- Effect of silage:concentrate ratio on feed intake, growth rate and subsequent milk yield of early calving heifers, 4 (1977) 313
- Nutrition and optimum performance of dairy goats, 5 (1978) 203
- Differences in the intake of roughage between cows of three breeds fed two levels of concentrates according to milk yield, 6 (1979) 147
- Influence of metabolizable energy content of the diet and of feeding level on lamb performances. I. Growth and body composition, 9 (1982) 471
- Influence of metabolizable energy content of the diet and of feeding level on lamb performances. II. Utilization of metabolizable energy for growth and fattening, 9 (1982) 487
- The effect on performance of different energy concentrations in complete rations for first lactation cows before and after calving, 10 (1983) 223
- The importance of roughage in the rearing period on the feed intake and performance of adult dairy cows, 11 (1984) 287
- Holstein Friesians, Dutch Friesians and Dutch Red and Whites on two complete diets with a different amount of roughage: performance in first lactation, 11 (1984) 401
- Holstein Friesians, Dutch Friesians and Dutch Red and Whites on two complete diets with a different amount of roughage: differences in performance between first and second lactation, 11 (1984) 417
- The performance of Jersey heifers and heifers of larger dairy breeds on two complete diets with different roughage contents, 14 (1986) 1
- The performance of Jersey cows and cows of larger dairy breeds on two complete diets with different roughage contents, 18 (1988) 1
- Parity effects on feed intake and feed efficiency in four dairy breeds fed *ad libitum* two different diets, 21 (1989) 115
- The economic value of feed intake capacity of dairy cows, 22 (1989) 269
- A review of the potential of nutrition to modify milk fat and protein, 23 (1989) 219
- Feed intake and utilization of maize silage-based complete diets by Australian Friesian cows and heifers at various stages of lactation, 23 (1989) 275
- Apparent and true digestibility of protein and amino acids in the small intestine of sheep as related to the duodenal passage of protein and non-protein dry matter, 23 (1989) 317
- Effect of lactation and of roughage to concentrate ratios on outflow rates of protein supplements from the rumen of sheep and goats, 24 (1990) 37
- ### Rations ruminants—nutritive value
- A note on the relationship between the production rates of volatile fatty acids and their concentration, digestible organic matter and total digestible nutrient intake in buffalo calves, 5 (1978) 253
- Different energy and protein levels for dairy cows in the early weeks of lactation, 7 (1980) 555
- Urea concentrations in milk and blood as influenced by feeding varying amounts of protein and energy to dairy cows, 10 (1983) 457
- Urea concentrations in milk in relation to milk yield, live weight, lactation number and amount and composition of feed given to dairy cows, 12 (1985) 47
- Intake, digestion and daily gain by cattle consuming bermudagrass hay and receiving concentrate supplements, 22 (1989) 255
- ### Rations ruminants—protein sources
- Rate of passage of digesta during and after weaning in calves fed concentrate diets containing pea or soya-bean meal, 24 (1990) 333
- ### Rations ruminants—young ruminants
- Effect of feeding methods and age at slaughter on growth performances and carcass characteristics of entire young male goats, 3 (1976) 183

Ethanol and *Torulopsis glabrata* in the rumens of milk-replacer fed farm calves: a survey, 4 (1977) 335

The effect of dietary electrolyte balance on blood parameters and the performance of veal calves, 21 (1989) 213

Recombination effects

Two breeding schemes for estimation of heterosis and recombination effects, 11 (1984) 227

Recording energy yield—cattle

Part-lactation predictors of complete lactation milk-energy yield, food intake and food conversion efficiency, 17 (1987) 323

Recording feed intake—cattle

Part-lactation predictors of complete lactation milk-energy yield, food intake and food conversion efficiency, 17 (1987) 323

Recording non-return rate—cattle

Adjustment of non-return rates of AI technicians and dairy bulls, 16 (1987) 363

Recording production diseases—cattle

Recording of production diseases in cattle and possibilities for genetic improvements: a review, 20 (1988) 89

Recording weight—cattle

Cattle liveweight sampled on a continuous versus intermittent basis, 23 (1989) 117

Replacement policy—cattle

An economic comparison of four insemination and culling policies in dairy herds, by method of stochastic simulation, 18 (1988) 239

Reproductive efficiency—horses

Inbreeding and the inheritance of fertility in the thoroughbred mare, 9 (1982) 743

Reproductive efficiency—sheep

First survey of results obtained in France on reproductive and maternal performance in sheep, with particular reference to the Romanov breed and crosses with it, 5 (1978) 181

Reproductive efficiency of Iceland sheep, 5 (1978) 231

The technical development of sheep production from hill land in Great Britain, 6 (1979) 379

Reproductive performance—cattle

Comparison between conventional tie-barn and loose housing systems with respect to milk production, feed conversion and reproductive performance of dairy cows, 4 (1977) 69

Effect of level of feeding on growth, reproductive performance and milk production of beef females, 5 (1978) 159

Reproductive performance—pigs

The effect of nutrition during the growing period and the oestrous cycle on the reproductive performance of the pig, 1 (1974) 7

Reproductive performance of first and second parity sows fed daily or every third day, 13 (1985) 179

Reproductive traits—cattle

Management traits in dairy cattle. Dystocia, udder characteristics related to production, and a review of other traits, 3 (1976) 13

Breed and crossbreeding effects in a crossing experiment between Dutch Friesian and Holstein Friesian cattle, 7 (1980) 235

A comparison of Holstein Friesians, Dutch Friesians and Dutch Red and Whites. I. Production characteristics, 11 (1984) 69

Genetic analysis of some maternal reproductive traits in the Belgian Blue cattle breed, 23 (1989) 79

Estimates of heritability and repeatability for reproductive traits in Australian beef cattle, 25 (1990) 15

Reproductive traits—horses

Fertilité des juments de pur sang élevées en Italie, 8 (1982) 567

Reproductive traits—pigs

Effects of temperature and level of feeding during rearing on carcass and reproductive traits in pigs, 2 (1975) 247

Performance of purebred Dutch Yorkshire boars versus crossbred (Belgian Landrace × Dutch Yorkshire) boars. A field trial, 16 (1987) 51

Reproductive traits—sheep

Results of a crossbreeding experiment with sheep for different systems of fat lamb production. I. Reproductive traits, 2 (1975) 167

Productivity of crosses based on prolific breeds of sheep (Summarizing report), 4 (1977) 379

Performance of Merinolandschaf and Bergschaf under an accelerated lambing system, 21 (1989) 131

Improvement of the reproductive performance of Rasa Aragonesa flocks in frequent lambing systems. I. Effects of management system, age of ewe and season, 22 (1989) 69

Improvement of the reproductive performance of Rasa Aragonesa flocks in frequent lambing systems. II. Repeatability and heritability of sexual precocity, fertility and litter size. Selection strategies, 22 (1989) 87

I.N.R.A. research on the Romanov sheep breed in France: a review, 24 (1990) 305

Riding horses

Relative importance of performance tests and progeny tests in horse breeding, 5 (1978) 303

Results on a more objective measurement of performance traits of stallions in performance testing at station, 7 (1980) 607

Contribution of various factors to genetic evaluations of stallions, 16 (1987) 407

Estimated parameters of performance in jumping and dressage competition of the Dutch Warmblood horse, 21 (1989) 333

Alternative selection strategies for performance of the Swedish warmblood horse, 24 (1990) 273

Composition of horse milk during the suckling period, 25 (1990) 163

Romanov sheep

First survey of results obtained in France on reproductive and maternal performance in sheep, with particular reference to the Romanov breed and crosses with it, 5 (1978) 181

I.N.R.A. research on the Romanov sheep breed in France: a review, 24 (1990) 305

Rumen fermentation

Studies on the ruminal concentration of total volatile fatty acids (VFA's) and their molar proportions in African cattle, sheep and goats, 3 (1976) 43

Influence of the composition of the ration and the feeding frequency on pH-regulation in the rumen and on feed intake in ruminants, 3 (1976) 103

Ethanol and *Torulopsis glabrata* in the rumens of milk-replacer fed farm calves: a survey, 4 (1977) 335

A note on the relationship between the production rates of volatile fatty acids and their concentration, digestible organic matter and total digestible nutrient intake in buffalo calves, 5 (1978) 253

Effect of monensin on rumen fermentation, performance and body composition of growing bulls, 8 (1982) 479

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on rumen fermentation in dairy cows, 15 (1986) 173

Influence of declining level of feed intake and varying the proportion of starch in the concentrate on rumen ingesta quantity, composition and kinetics of ingesta turnover in dairy cows, 17 (1987) 37

Feed intake and utilization of maize silage-based complete diets by Australian Friesian cows and heifers at various stages of lactation, 23 (1989) 275

Rumen microorganisms

Amino acid and fatty acid composition of microorganisms passing into the abomasum of sheep, 3 (1976) 57

Ruminants—nutrition

Studies on the ruminal concentration of total volatile fatty acids (VFA's) and their molar proportions in African cattle, sheep and goats, 3 (1976) 43

Nutritional principles and evaluation of by-products, waste products and new feeds for ruminants, 4 (1977) 165

Feed evaluation for ruminants: new energy systems in The Netherlands, France and Switzerland, 5 (1978) 327

Feed evaluation for ruminants. I. The systems in use from May 1977 onwards in The Netherlands, 5 (1978) 331

Feed evaluation for ruminants. II. The new energy systems proposed in France, 5 (1978) 347

Feed evaluation of ruminants. III. Proposed application of the new system of energy evaluation in Switzerland, 5 (1978) 367

Estimation of digestibility, metabolizable energy and net energy of forage by a cellulase method, 5 (1978) 373

Recent informations on processing of grain for ruminants, 6 (1979) 335

A new system for the protein feeding of ruminants: the PDI system, 6 (1979) 349

Phosphorus in rangeland ruminant nutrition: a review, 7 (1980) 25

Some factors which influence thermal energy losses during the metabolism of ruminants, 9 (1982) 447

The role of sulphur in ruminant nutrition. A review, 11 (1984) 611

Hormonal regulation of metabolism in ruminants: a review, 14 (1986) 313

Ruminants—productivity

Effects of lighting pattern on growth, lactation and food intake of sheep, cattle and deer, 9 (1982) 361

Ruminants—reproduction

Interference of trophoblastin in ruminant embryonic mortality. A review, 17 (1987) 193

Selection economics

The economic consequences of beef crossing in dual-purpose or dairy cattle populations, 1 (1974) 133

An economic evaluation of different selection alternatives as means for improvement of milk protein yield, 2 (1975) 221

Levels of investment in testing the genetic improvement of livestock, 8 (1981) 193

A comparison of benefits and costs of birth recording on heifers and second calvers, 10 (1983) 431

Selection on fat and protein to maximise profit in dairy herds, 20 (1988) 299

A model to estimate economic values of traits in pig breeding, 21 (1989) 49

Economic values in cattle breeding. I. Influences of production circumstances in situations without output limitations, 22 (1989) 1

Economic values in cattle breeding. II. Influences of production circumstances in situations with output limitations, 22 (1989) 17

The economic value of feed intake capacity of dairy cows, 22 (1989) 269

Selection efficiency—cattle

An economic evaluation of different selection alternatives as means for improvement of milk protein yield, 2 (1975) 221

Breeding aspects of embryo transplantation utilized in the bull dam path within a dual-purpose cattle population, 4 (1977) 305

Problems in cow evaluation and current use of cow index. Report of a working group on cow evaluation, 5 (1978) 3

Efficiency of selection for different cumulative milk, fat and protein yields in first lactation, 17 (1987) 211

Studies on sire \times sex/environment interactions and their effect on response to selection in beef sires progeny-tested for fattening performance and carcass yield, 21 (1989) 287

Impact of the potential use of bovine somatotropin on the efficiency of a conventional dairy cattle breeding scheme, 22 (1989) 31

Selection efficiency—livestock

The influence of maternal effects on the efficiency of selection; a review, 8 (1981) 121

Levels of investment in testing the genetic improvement of livestock, 8 (1981) 193

Selection efficiency—pigs

Economic efficiency of pig breeding schemes: a breeding company view, 4 (1977) 245

The importance of selection criteria and feeding regimes in the selection and improvement of pigs, 5 (1978) 415

Estimated responses to eleven years of boar selection, 7 (1980) 57

Estimates of costs and returns of selecting pigs on growth rate and backfat thickness, 7 (1980) 135

Comparison of selection schemes for improving litter size in pigs—results of a simulation study, 8 (1982) 535

Effect of selection index versus mixed model methods of prediction of breeding value on response to selection in a simulated pig population, 20 (1988) 135

Selection efficiency—sheep

The value of multiple lamb weaning records in selection indices for Dorset sheep in Australia, 9 (1982) 561

Improvement of the reproductive performance of Rasa Aragonesa flocks in frequent lambing systems. II. Repeatability and heritability of sexual precocity, fertility and litter size. Selection strategies, 22 (1989) 87

Selection methods

Selection theory with overlapping generations, 6 (1979) 215

A note on minimization of inbreeding in small-scale selection programmes, 20 (1988) 317

Approximate accuracy of genetic evaluation under an animal model, 21 (1989) 87

Selection methods—cattle

Breeding for veal production in Black and White dairy cattle, 15 (1986) 325

Optimal replacement and ranking of dairy cows determined by a hierarchic Markov process, 16 (1987) 131

Breeding for veal and beef production in Dutch Red and White cattle, 25 (1990) 183

Selection methods—horses

Alternative selection strategies for performance of the Swedish warmblood horse, 24 (1990) 273

Selection methods—pigs

Selection for components of reproduction in swine, 11 (1984) 541

The implication of maternal effects for genetic improvement of litter size in pigs, 13 (1985) 159

Selection parameters

Physiological criteria and genetic selection, 8 (1981) 203

Selection parameters—cattle

Genetic aspects of female fertility in dairy cattle, 8 (1981) 307

Indirect selection of bulls for improved resistance to diseases in dairy cattle, 8 (1981) 321

Thyroxine degradation rate in young bulls of Danish dual-purpose breeds. Genetic relationship to weight gain, feed conversion and breeding value for butterfat production, 8 (1981) 399

A genetic analysis of the concentrations of blood metabolites and their relationships with age and liveweight gain in young British Friesian bulls, 10 (1983) 1

Dystocia and stillbirth in cattle—a review of causes, relations and implications, 11 (1984) 143

Claw measurements of young bulls at performance testing stations in Bavaria, 11 (1984) 587

A method for β -lactoglobulin genotyping of cattle, 25 (1990) 173

Selection parameters—pigs

Testing methods for PSE syndrome: current research in the U.K., 7 (1980) 305

Testing methods for PSE syndrome: current research in Denmark, 7 (1980) 325

Parameters of meat quality and stress resistance of pigs, 7 (1980) 337

The size of Cowper's (bulbo-urethral) glands as an estimate of boar taint on the slaughter line, 13 (1985) 169

Application of bending theory in a pig-breeding situation, 18 (1988) 85

Correlated response in reproduction, growth and composition to selection in gilts for extremes in age at puberty and backfat, 24 (1990) 237

Selection parameters—sheep

The indirect evaluation of sheep carcass composition in breeding schemes, population studies and experiments, 8 (1981) 263

Objectives and selection criteria for Dorset sheep in Australia, 8 (1981) 331

Genetic studies on carcass traits in Iceland twin ram lambs. II. Analysis of principal components and construction of selection indices, 8 (1982) 507

An attempt to correlate early muscle characteristics with carcass traits at slaughter in lambs, 11 (1984) 195

The genetic relationship between ovulation rate and testicular diameter in a random-breeding Merino flock, 18 (1988) 35

Selection plateau—mice

Investigation of a selection limit for litter size in mice, 20 (1988) 161

Selenium

Glutathione peroxidase activity in liver and kidney as indicator of selenium status in swine, 7 (1980) 175

Selenium-vitamin E supplementation and production efficiency in ewes marginally deficient in selenium, 14 (1986) 149

Semen production—boars

Boar sperm production: use in artificial insemination—a review, 5 (1978) 293

Semen quality—sheep

Fertility in the ewe after artificial insemination with fresh and frozen semen at the induced oestrus, and influence of the photoperiod on the semen quality of the ram, 6 (1979) 153

Semen quality after vasectomy in the ram, 8 (1982) 529

Sex effects—pigs

Leg weakness and osteochondrosis in pigs; differences between the sexes of four breeds, 16 (1987) 65

Meat and fat quality in boars, castrates and gilts, 16 (1987) 187

Twenty-four hour profiles of growth hormone (GH) concentrations in mature female and entire male domestic pigs in comparison with mature wild boars (*Sus scrofa* L.), 25 (1990) 247

Sex phenotype—sheep

An assessment of the interaction between photoperiod and sex phenotype in relation to appetite development in sheep, 22 (1989) 283

Sex ratio

The effect of changing the sex ratio on the efficiency of cattle breeding operations, 2 (1975) 29

Causes of variation in sex ratio and sex combination in multiple births in sheep, 6 (1979) 387

Sheep—appetite

The influence of superior cervical sympathetic ganglionectomy on cycles of appetite and growth in Soay rams on a six-month photoperiod, 11 (1984) 529

An assessment of the interaction between photoperiod and sex phenotype in relation to appetite development in sheep, 22 (1989) 283

Sheep—body proportions

Changes in size and shape with time of cross-bred West African hair sheep raised under tree-crop plantations, 21 (1989) 235

Sheep—breeding

Reproductive efficiency of Iceland sheep, 5 (1978) 231

The significance of interactions in practical sheep breeding in northern Europe, 10 (1983) 39

I.N.R.A. research on the Romanov sheep breed in France: a review, 24 (1990) 305

Sheep—breeds

Review of genetic aspects of mineral metabolism with particular reference to copper in sheep, 6 (1979) 223

Contemporary comparisons between progeny by Finnish Landrace and Romanov rams out of Mutton Merino and Awassi ewes, 6 (1979) 283

Inheritance of colours, fur characteristics and skin quality traits in North European sheep breeds: a review, 10 (1983) 555

Performance of Merinolandschaf and Bergschaf under an accelerated lambing system, 21 (1989) 131

Sheep—carcass composition

The estimation of the composition of lamb carcasses by use of an image analyser, "Classimat", on multiple cross-sections, 4 (1977) 283

The indirect evaluation of sheep carcass composition in breeding schemes, population studies and experiments, 8 (1981) 263

Predicting the fatness of lamb carcasses from carcass wall thickness measured by ruler or by a total depth indicator (TDI) probe, 11 (1984) 185

Sheep—crossbreeding

Experimental designs for building a synthetic dam line for meat production in sheep, 1 (1974) 77

Lamb production performance of 14 sire breeds mated to New Zealand Romney ewes, 2 (1975) 157

Results of a crossbreeding experiment with sheep for different systems of fat lamb production. I. Reproductive traits, 2 (1975) 167

Results of a crossbreeding experiment with sheep for different systems of fat lamb production. II. Growth and carcass traits, 2 (1975) 179

Effect on production and carcass quality characteristics of wether lambs of crossing Black-headed Mutton, Ile de France and Texel rams with Polish Merino ewes, 3 (1976) 343

The influence of the Tasmanian Fine-Woolled Merino on carcass characteristics of lambs, 4 (1977) 191

Productivity of crosses based on prolific breeds of sheep (Summarizing report), 4 (1977) 379

First survey of results obtained in France on reproductive and maternal performance in sheep, with particular reference to the Romanov breed and crosses with it, 5 (1978) 181

Carcass and meat characteristics of crossbred lambs born to ewes of different genetic types and slaughtered at different weights, 12 (1985) 241

Tissue growth and development in crossbred lambs sired by ten breeds, 16 (1987) 145

Development of a synthetic dam line in a reciprocal cross between Finnish Landrace and Ile de France in The Netherlands, 17 (1987) 77

Sheep—feeding

Influence of metabolizable energy content of the diet and of feeding level on lamb performances. I. Growth and body composition, 9 (1982) 471

Influence of metabolizable energy content of the diet and of feeding level on lamb performances. II. Utilization of metabolizable energy for growth and fattening, 9 (1982) 487

Means of assessing adequacy of nutrition of pregnant ewes, 11 (1984) 429

Sheep—immunology

- A novel approach to growth promotion using auto-immunisation against somatostatin. I. Effects on growth and hormone levels in lambs, 10 (1983) 25
- A novel approach to growth promotion using auto-immunisation against somatostatin. II. Effects on appetite, carcass composition and food utilisation in lambs, 10 (1983) 469
- A novel approach to growth promotion using auto-immunisation against somatostatin. III. Effects in a commercial breed of sheep, 13 (1985) 43

Sheep—management and health

- Prenatal growth and development in the sheep and its implications for the viability of the newborn lamb, 8 (1981) 273
- Current methods for estimating parasite populations: potential and limits to control gastrointestinal and pulmonary strongyles of sheep on pasture, 13 (1985) 53

Sheep—milkability

- Review of physiological and anatomical factors influencing the milking ability of ewes and the organization of milking, 18 (1988) 253

Sheep—nutrition

- Amino acid and fatty acid composition of microorganisms passing into the abomasum of sheep, 3 (1976) 57
- Efficiency of energy utilization in undernourished and realimented sheep, 7 (1980) 465
- The application of modern concepts of ruminants and protein nutrition to sheep-production systems, 8 (1981) 339
- Studies on degradation and outflow rate of protein supplements in the rumen of sheep and cattle, 10 (1983) 17

Some aspects of the production of weaner sheep in the winter rainfall regions of Australia, 10 (1983) 239

The effect of physiological state on digestion in the ewe and its influence on the quantity of protein reaching the abomasum, 12 (1985) 59

Apparent and true digestibility of protein and amino acids in the small intestine of sheep as related to the duodenal passage of protein and non-protein dry matter, 23 (1989) 317

Effect of lactation and of roughage to concentrate ratios on outflow rates of protein supplements from the rumen of sheep and goats, 24 (1990) 37

Effect of sodium and potassium level on the absorption of magnesium and other macro-minerals in sheep, 24 (1990) 223

Effect of sodium and potassium on overall digestibility of a semi-purified diet and microbial protein production in the rumen of sheep, 24 (1990) 347

Sheep—parturition

Behaviour at parturition and lamb survival of Booroola Merino sheep, 13 (1985) 359

Sheep—physiological functions

Physiological response to climatic changes in Finnish Landrace ewes imported to Egypt and their half-sibs raised in Finland, 17 (1987) 179

Sheep—pregnancy diagnosis

Diagnosis of pregnancy and number of fetuses in sheep by real-time ultrasonic imaging. I. Effects of number of fetuses, stage of gestation, operator and breed of ewe on accuracy of diagnosis, 11 (1984) 437

Sheep—production

- Model calculations on the economic efficiency of sheep production, 1 (1974) 67
- British Sheep Production Economics, 1 (1974) 165
- The future of sheep and goat production, 1 (1974) 265
- The effect on wool production of changes in management designed to increase output in lamb from hill land in the United Kingdom, 3 (1976) 173
- Productivity of pure Finnsheep in Finland and abroad, 4 (1977) 355
- The technical development of sheep production from hill land in Great Britain, 6 (1979) 379
- Environmental and genetic factors influencing milk production and lamb output of Chios sheep, 8 (1982) 519
- Frequent lambing of sheep flocks in Spain: productivity and management consequences, 10 (1983) 49
- Selenium-vitamin E supplementation and production efficiency in ewes marginally deficient in selenium, 14 (1986) 149
- Performance-related responses of lambs to changes in environmental temperature and daylength, 16 (1987) 37
- Factors affecting milk yield and prolificacy of Karagouniko sheep in West Thessaly (Greece), 24 (1990) 179

Sheep—reproduction

- Prediction of the onset of parturition in sheep from observations of rectal temperature changes, 2 (1975) 393
- Controlled breeding in sheep using the prostaglandin analogue, ICI 80996, 5 (1978) 313
- Hormonal control of oestrous cycle in the ewe (a review), 6 (1979) 39
- Fertility in the ewe after artificial insemination with fresh and frozen semen at the induced oestrus, and influence of the photoperiod on the semen quality of the ram, 6 (1979) 153

Control of reproduction in adult ewes and ewe lambs, and estimation of reproductive wastage in ewe lambs following treatment with progestagen impregnated sponges and PMSG, 6 (1979) 295

Causes of variation in sex ratio and sex combination in multiple births in sheep, 6 (1979) 387

The reproductive performance of Finn x German Mutton Merino and purebred German Mutton Merino ewes, 7 (1980) 49

Regulation of puberty and reproduction in female lambs: a review, 8 (1981) 37

Natural factors affecting puberty and reproductive performance in ewe lambs: a review, 8 (1981) 55

Semen quality after vasectomy in the ram, 8 (1982) 529

The reproductive performance of a sheep flock on a mating schedule of three restricted periods per year, 13 (1985) 35

Effects of active immunization against androstenedione on ovulation rate and fecundity in Galway and Finnish Landrace sheep, 15 (1986) 27

The physiological responses of anovulatory ewes to the introduction of rams—a review, 15 (1986) 219

Livestock production in central Mali; reproductive components in traditionally-managed sheep and goats, 19 (1988) 523

Improvement of the reproductive performance of Rasa Aragonesa flocks in frequent lambing systems. I. Effects of management system, age of ewe and season, 22 (1989) 69

Improvement of the reproductive performance of Rasa Aragonesa flocks in frequent lambing systems. II. Repeatability and heritability of sexual precocity, fertility and litter size. Selection strategies, 22 (1989) 87

Sheep fertility

The physiological basis for variation in ovulation rate and litter size in sheep: a review, 13 (1985) 3

Follicle population dynamics in sheep with different ovulation rate potentials, 13 (1985) 21

Sheep selection

An assessment of genetical methods in the control of scrape, 6 (1979) 233

A review of sheep recording and evaluation of breeding animals in European countries: a group report, 7 (1980) 373

A review of genetic aspects of survival and resistance to cold in newborn lambs, 8 (1981) 419

Adaptation of the principles of selection for milk production to milking ewes: a review, 9 (1982) 549

An attempt to correlate early muscle characteristics with carcass traits at slaughter in lambs, 11 (1984) 195

The genetic relationship between ovulation rate and testicular diameter in a random-breeding Merino flock, 18 (1988) 35

Sheep selection—carcass traits

Genetic studies on carcass traits in Iceland twin ram lambs. I. Estimates of genetic parameters on carcass traits, live weight at weaning and carcass weight, 8 (1982) 489

Genetic studies on carcass traits in Iceland twin ram lambs. II. Analysis of principal components and construction of selection indices, 8 (1982) 507

Selection indices for lean meat production in sheep, 21 (1989) 223

Direct, maternal and heterosis effects for slaughter and carcass characteristics in three breeds of fat tailed sheep, 23 (1989) 137

Sheep selection—lamb production

Objectives and selection criteria for Dorset sheep in Australia, 8 (1981) 331

The value of multiple lamb weaning records in selection indices for Dorset sheep in Australia, 9 (1982) 561

Adjustment factors for growth traits of Chios sheep, 19 (1988) 409

Sire breed evaluation—cattle

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows, 3 (1976) 227

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows. III. Daily gain, feed conversion and carcass quality of intensively fed young bulls, 4 (1977) 19

Crossbreeding experiment with beef and dual-purpose sire breeds on Danish dairy cows. IV. Physical, chemical and palatability characteristics of longissimus dorsi and semitendinosus muscles from crossbred young bulls, 4 (1977) 31

Beef breed bulls versus selected dual purpose bulls in producing calves for meat production, 5 (1978) 245

A genetic analysis of performance and progeny test data for young bulls of Norwegian Red Cattle and various Friesian crosses, 10 (1983) 123

Comparison of proven sires from five Holstein-Friesian strains in high-yield Israeli dairy herds, 17 (1987) 305

Phenotypic and genetic parameters of carcass and meat-quality traits in cattle, 21 (1989) 35

Sire breed evaluation—sheep

Lamb production performance of 14 sire breeds mated to New Zealand Romney ewes, 2 (1975) 157

Effect on production and carcass quality characteristics of wether lambs of crossing Black-headed Mutton, Ile de France and Texel rams with Polish Merino ewes, 3 (1976) 343

Tissue growth and development in crossbred lambs sired by ten breeds, 16 (1987) 145

Sire evaluation—cattle

- Comparison of sire evaluation methods for carcass gain using field data, 4 (1977) 11
- Comparisons of dairy progeny tests for sires and their sons, 4 (1977) 45
- AI bull evaluation standards for dairy and dual purpose breeds, 4 (1977) 115
- Sire evaluation standards and breeding strategies for limiting dystocia and stillbirth. Report of an E.E.C./E.A.A.P. working group, 6 (1979) 111
- Sire evaluation for milkability traits in Swiss Braunvieh, 13 (1985) 219
- Sire effects on cow fertility and late embryonic mortality in the Montbeliard breed, 14 (1986) 139
- Genetic parameters of conformation traits in Norwegian Red Cattle estimated with a multiple trait model, 14 (1986) 335
- Estimates of variances due to sire \times herd interactions and environmental covariances between paternal half-sibs for first lactation dairy production, 17 (1987) 95
- Relationships between breeding values for growth of beef sires in purebreeding and crossbreeding, 21 (1989) 275
- International evaluation of Holstein-Friesian dairy sires from three countries, 24 (1990) 15

Sire evaluation—horses

- Estimation of the breeding value of stallions from the tournament performance of their offspring, 8 (1981) 465
- Contribution of various factors to genetic evaluations of stallions, 16 (1987) 407

Sire evaluation—pigs

- Performance of purebred Dutch Yorkshire boars versus crossbred (Belgian Landrace \times Dutch Yorkshire) boars. A field trial, 16 (1987) 51

Sire evaluation methods—cattle

- A comparison of benefits and costs of birth recording on heifers and second calvers, 10 (1983) 431
- Scope for evaluating dairy sires using first and second lactation records, 10 (1983) 531
- Model for international evaluation of dairy sires, 12 (1985) 105
- A method of comparing sires evaluated in different countries, 13 (1985) 321
- Considering relationships and genetic grouping in mixed model sire evaluation: a simulation study, 14 (1986) 123
- Sire evaluations for type traits with linear and non-linear procedures, 15 (1986) 165
- Partitioning of herd, year and season variation in milk production, 16 (1987) 107
- Dairy sire evaluation fitting some of the herd-year-season effects as random, 16 (1987) 117

Sire of foetus effect—cattle

- Effect of sire of foetus on current and subsequent milk yield of the dam, 20 (1988) 107

Skatole

- Skatole, androsthenone and taint in boars fed two different diets, 18 (1988) 55

Slaughter age—cattle

- The effects of slaughter age on growth and carcass traits in an intensively managed crossbred beef herd, 9 (1982) 375

Slaughter weight—cattle

- The influence of energy level, weight at slaughter and castration on growth and feed efficiency in cattle, 11 (1984) 559

Influence of energy level, weight at slaughter and castration on carcass quality in cattle, 11 (1984) 571

Somatic cell counts—cattle

Inheritance of somatic cell count and its genetic relationship with milk yield in different parities, 18 (1988) 115

Somatostatin

A novel approach to growth promotion using auto-immunisation against somatostatin. I. Effects on growth and hormone levels in lambs, 10 (1983) 25

A novel approach to growth promotion using auto-immunisation against somatostatin. II. Effects on appetite, carcass composition and food utilisation in lambs, 10 (1983) 469

A novel approach to growth promotion using auto-immunisation against somatostatin. III. Effects in a commercial breed of sheep, 13 (1985) 43

Somatotropin

The effect of treatment of dairy cows of different breeds with recombinantly derived bovine somatotropin in a sustained-delivery vehicle, 21 (1989) 13

Impact of the potential use of bovine somatotropin on the efficiency of a conventional dairy cattle breeding scheme, 22 (1989) 31

A farm-level analysis of short-term selective yield enhancing measures in milk production—the example of bovine somatotropin (bST), 25 (1990) 43

Sow productivity

The improvement of sow productivity, a review of recent experiments in France, 2 (1975) 235

Some aspects of the nutritional requirements of sows: their relevance in the development of a feeding strategy, 15 (1986) 39

Stress resistance—pigs (see also: Halothane sensitivity)

Parameters of meat quality and stress resistance of pigs, 7 (1980) 337

Synthetic populations

Experimental designs for building a synthetic dam line for meat production in sheep, 1 (1974) 77

The development of a new red and white breed of cattle in the United Kingdom, 1 (1974) 401

Development of a synthetic dam line in a reciprocal cross between Finnish Landrace and Ile de France in The Netherlands, 17 (1987) 77

Test-day yield—cattle

Adjustment of test-day milk, fat and protein yield for age, season and stage of lactation, 16 (1987) 335

Estimates of genetic parameters for first lactation test day production of Australian Black and White cows, 21 (1989) 177

Testicular diameter—rams

The genetic relationship between ovulation rate and testicular diameter in a random-breeding Merino flock, 18 (1988) 35

Testing systems—pigs

Selection index for central test in Dutch pig herdbook breeding from 1984, 12 (1985) 85

Genotype environment interaction in pig breeding programmes: methods of estimation and relevance of the estimates, 13 (1985) 135

Selection regime by production system interaction in pig improvement: a review of possible causes and solutions, 14 (1986) 41

Genotype \times environment interactions in pig breeding programmes. I. Central test, 14 (1986) 365

Genotype \times environment interactions in pig breeding programmes. II. Environmental effects and genetic parameters in central test, 16 (1987) 215

Genotype \times environment interactions in pig breeding programmes. III. Environmental effects and genetic parameters in on-farm test, 18 (1988) 129

Genotype \times environment interactions in pig breeding programmes. IV. Sire \times herd interaction in on-farm test results, 20 (1988) 325

Genotype \times environment interactions in pig breeding programmes. V. Genetic parameters and sire \times herd interaction in commercial fattening, 22 (1989) 99

Genotype \times environment interactions in pig breeding programmes. VI. Genetic relations between performances in central test, on-farm test and commercial fattening, 22 (1989) 325

Effects of family size in selection and testing in a closed dam line of pigs, 24 (1990) 47

Thermo regulation

Factors influencing thermal losses in non-ruminants: a review, 8 (1981) 449

Some factors which influence thermal energy losses during the metabolism of ruminants, 9 (1982) 447

Effects of the ingestion of warm, cold and frozen food on thermal balance in cattle, 23 (1989) 107

Threonine

Lysine and threonine balance and requirements for weaned piglets 10–25 kg liveweight fed cereal-based diets, 23 (1989) 195

Studies on the threonine requirements of growing pigs based on the total, ileal and faecal digestible supply, 25 (1990) 105

Thyroxine degradation—cattle

Thyroxine degradation rate in young bulls of Danish dual-purpose breeds. Genetic relationship to weight gain, feed conversion and breeding value for butterfat production, 8 (1981) 399

Tissue depth measurements

Prediction of beef carcass composition by tissue depth measurements taken over the 11th rib, 9 (1982) 337

Development of automatic equipment for grading of pig carcasses in Denmark, 9 (1982) 675

Predicting the fatness of lamb carcasses from carcass wall thickness measured by ruler or by a total depth indicator (TDI) probe, 11 (1984) 185

Prediction of carcass lean content from fat and muscle thickness measurements in Large White and Pietrain pigs, 21 (1989) 325

Trophoblastin

Interference of trophoblastin in ruminant embryonic mortality. A review, 17 (1987) 193

Trotters

Relative importance of performance tests and progeny tests in horse breeding, 5 (1978) 303

Genetical-statistical analysis of traits in the German trotter, 6 (1979) 407

Genetic selection indices for Swedish trotter broodmares, 8 (1982) 557

Type traits—cattle

Sire evaluations for type traits with linear and non-linear procedures, 15 (1986) 165

Restricted maximum likelihood (REML) estimation of genetic parameters for type traits in Normande cattle breed, 23 (1989) 47

Udder anatomy—ewes

Review of physiological and anatomical factors influencing the milking ability of ewes and the organization of milking, 18 (1988) 253

Ultrasonic imaging—sheep

Diagnosis of pregnancy and number of foetuses in sheep by real-time ultrasonic imaging. I. Effects of number of foetuses, stage of gestation, operator and breed of ewe on accuracy of diagnosis, 11 (1984) 437

Ultrasonic measurements—cattle

Recent experimental developments in ultrasonic measurement of cattle, 2 (1975) 137

Relationships of ultrasonic and carcass measurements with retail yield in beef cattle, 4 (1977) 153

Comparison of ultrasonic equipment for describing beef carcass characteristics in live cattle (Report on a joint ultrasonic trial carried out in the U.K. and Denmark), 10 (1983) 133

In vivo estimation of body composition in young bulls for slaughter. 1. The repeatability and reproducibility of a scoring system, an ultrasonic scanning technique and body measurements, 12 (1985) 221

In vivo estimation of body composition in young bulls for slaughter. 2. The prediction of carcass traits from scores, ultrasonic scanning and body measurements, 12 (1985) 231

Operator and machine effects on ultrasonic measurements of beef cows, 18 (1988) 305

Ultrasonic measurements—pigs

Prediction of lean parts and carcass price from ultrasonic backfat measurements in live pigs, 14 (1986) 55

Urea concentration in milk

Urea concentrations in milk and blood as influenced by feeding varying amounts of protein and energy to dairy cows, 10 (1983) 457

Urea concentrations in milk in relation to milk yield, live weight, lactation number and amount and composition of feed given to dairy cows, 12 (1985) 47

Urine parameters—pigs

Methods of early recognition of puerperal and fertility disorders in the sow, 10 (1983) 253

Vasectomy—sheep

Semen quality after vasectomy in the ram, 8 (1982) 529

Veal production

The effect of a β -agonist (clenbuterol) on the heart rate, nitrogen balance and some carcass characteristics of veal calves, 15 (1986) 289

Breeding for veal production in Black and White dairy cattle, 15 (1986) 325

The effect of dietary electrolyte balance on blood parameters and the performance of veal calves, 21 (1989) 213

Viability—lambs

Prenatal growth and development in the sheep and its implications for the viability of the newborn lamb, 8 (1981) 273

A review of genetic aspects of survival and resistance to cold in newborn lambs, 8 (1981) 419

Behaviour at parturition and lamb survival of Booroola Merino sheep, 13 (1985) 359

Viability—piglets

Urinary oestrone concentration in relation to piglet viability, growth and mortality, 6 (1979) 313

The influence of additional fat in the diet of sows before and after parturition on piglet viability and performance, 13 (1985) 191

Vitamin metabolism

Evaluation of the background for determination of vitamin requirements in pigs, 7 (1980) 569

The pantothenic acid status of pigs fed diets containing 200 mg copper per kg, 9 (1982) 591

Effect of Zn deficiency on serum vitamin A level, tissue enzymes and histological alterations in goats, 12 (1985) 69

Panthonenic acid status of pigs fed diets containing maize oil, with and without 200 mg copper per kg diet, 12 (1985) 265

Biotin in swine production: a review, 14 (1986) 65

Synthesis and absorption of biotin in the large intestine of pigs, 25 (1990) 95

Vitamin requirements—pigs

Evaluation of the background for determination of vitamin requirements in pigs, 7 (1980) 569

Vitamin E and its role in the nutrition of the gilt and sow: a review, 24 (1990) 1

Vitamins

Selected problems of B vitamins in animal nutrition, 4 (1977) 177

Evaluation of the background for determination of vitamin requirements in pigs, 7 (1980) 569

The pantothenic acid status of pigs fed diets containing 200 mg copper per kg, 9 (1982) 591

Effect of Zn deficiency on serum vitamin A level, tissue enzymes and histological alterations in goats, 12 (1985) 69

Panthonenic acid status of pigs fed diets containing maize oil, with and without 200 mg copper per kg diet, 12 (1985) 265

Biotin in swine production: a review, 14 (1986) 65

Selenium-vitamin E supplementation and production efficiency in ewes marginally deficient in selenium, 14 (1986) 149

Anomalous tissue vitamin E distribution in stress-susceptible pigs after dietary vitamin E supplementation and effects on plasma pyruvate kinase and creatine kinase activities, 17 (1987) 169

Effect of ascorbic acid supplementation in performance and foot-leg traits in swine, 17 (1987) 277

Vitamin E and vitamin C supplementation and stress-susceptible pigs: effects of halothane and pharmacologically induced muscle contractions, 22 (1989) 341

Vitamin E and its role in the nutrition of the gilt and sow: a review, 24 (1990) 1

Synthesis and absorption of biotin in the large intestine of pigs, 25 (1990) 95

Water intake—cattle

Effects of drinking water flow rates and social rank on performance and drinking behaviour of tied-up dairy cows, 11 (1984) 599

Effects of drinking water temperatures on water intake and milk yield of tied-up dairy cows, 12 (1985) 329

Water intake—pigs

Transport of pigs by car for two days; some aspects of watering and loading density, 13 (1985) 289

Water metabolism—goats

Physiological responses of Anglo-Nubian and Baladi goats and their crossbreds to water deprivation under sub-tropical conditions, 22 (1989) 295

Weighing device

Recent developments in the handling and weighing of farm animals, 2 (1975) 289

Weight gain composition—pigs

The effect of daily energy intake on growth rate and composition of weight gain in pigs, 7 (1980) 79

Wool production

The effect on wool production of changes in management designed to increase output in lamb from hill land in the United Kingdom, 3 (1976) 173

Zebu-crosses

Heterosis in *Bos taurus* × *Bos indicus* crosses, 12 (1985) 299

A reciprocal translocation difference in the autosomes of F₁ Brahman × Hereford hybrid cattle, visualized by electron microscopy, 13 (1985) 123

Relative merits of various *Bos taurus* dairy breeds for cross-breeding with *Bos indicus* cattle, 13 (1985) 351

Cardio-respiratory activity in Zebu and their F₁ crosses with European breeds of dairy cattle at different ambient temperatures, 24 (1990) 119
